we also other standard publications as Hall's Annual, Who's Who, A B C Guide, Daily Mail Year Book, Burke's Peerage, Post Office Guide, Red Book of Commerce, Colonial Foreign and India Office Lists, Times (weekly edition), Keith's Handbook of Titled, Tainted and Official Classes, Whitaker's Directory, etc.

Readers of WHITAKER will by now be fairly familiar with our name and goods as our announcement appears for the 14th year on this page. It must be known therefore that our operations extend to all parts of the globe. We export to the tropics—our finest cashmeres. To semi tropical countries—our superfine flannels and flannel tweeds. To temperate climates—Worsted Serges, Saxony and the finer Tweeds. To cold climates and winter wear generally—our heavy Tweeds and Cheviots and for overcoats—Linos and Friezes. For sport and travel—Scotch and Irish Homespuns. Of all these we sell some of the best examples of British manufacture. We keep a very extensive stock of Irish and Scotch goods though not yet established in the international situation which at present hinders the prospect of much trade. Visits from Overseas are specially urged to visit the warehouse when in London both traders and private persons the proprietor would heartily welcome any of his old correspondents and be glad to render any assistance in his power. It has always been a personal and unique business and he confines himself to the fostering of his own country's industries unlike the generality of traders who under the present fiscal system of Great Britain resort to the sale of foreign goods. He is therefore in a position to raise the standard of living in other spheres to the detriment of our own enterprise and their employers—W. B.

HOMESPUNS—Irish and Scotch, peasant made from all districts, for country wear, sport, and travelling
SCOTCH CHEVIOTS, for warm, rough suits, and wraps
IRISH FRIEZES, for heavy travelling and motoring ulsters
FLEECES; for warm soft, woolly overcoats, and capes
HOMESPUNS, natural cream, brown, grey, and dyed colours
INDIAN, Homespuns, from Cashmere, Thibet, &c
IRISH TWEEDS, for hard useful wear, winter and summer
TWEEDS, for ordinary town wear, various weights
WORSTEDS; for business and professional wear. Dress suitings
SERGES, navy and black, rough and smooth, all seasons
CASHMERES; for tropical and semi tropical wear
TROUSERINGS, winter and summer weights
FLANNEL TWEEDS, for light summer and semi tropical wear
COSTUME TWEEDS, for ladies country and town wear
OVERCOATINGS; light, medium, and heavy
TRAVELLING RUGS Irish and Scotch. 17/6 upwards
SHETLAND hand knit jumpers, jerseys, jackets, shawls, socks, &c
SOCKS AND STOCKINGS, hand knitted, Irish and Scotch
ORIENTAL SILKS, for thinnest tropical suitings
SHIRTINGS, for country and colonial wear, also shirts

Pattern applications must be definite and descriptive of requirements otherwise delay will result. They can only be sent to the provinces and abroad. TERMS—Cash with order.

A visit to the warehouse is recommended whenever possible in order to view the extent of the stock, handle the goods, judge of their merit and make a judicious selection.

SHIPPERS the TRADE and PUBLIC supply at prices corresponding to extent of purchase. None but bona fide correspondence can be attended to.

PRICE SIX SHILLINGS NET

NOTE.—WHITAKER'S ALMANACK was first published in 1868 (for the year 1869), and since 1887 there have been two editions. For 1924 the Popular Edition (in paper cover with Zodiac design) consists of 600 pages and is sold for 3s net, the Half-Bound Edition (in red and green cloth cover) consists of 920 pages and is sold for 6s net.

PREFACE TO THE LVTH ANNUAL VOLUME

(1924)

WHEN the first sheets of the 1924 'WHITAKER' were sent to press there were no indications of an approaching Appeal to the Country, and by the time the date of the General Election was made known a great part of the book had been printed.

A considerable interval must of necessity elapse between the printing of the last sheet and the date of issue, as the books not only require to be bound but distributed equitably throughout the bookselling trade, in order that simultaneous publication may be effected. If therefore the binding of the volume had been postponed until the results of the Election could be incorporated, the book could not have been in the hands of the public until after Christmas or the New Year.

The difficulty has been overcome by providing a 'General Election Supplement' which will be available for distribution with the book, or as soon as possible afterwards. Purchasers of the 1924 'WHITAKER' are entitled to a copy of this Supplement.

The general contents of the present volume have been subjected to a slight rearrangement and space has been found for many additional statistics dealing with Trade and Finance. The recommendations of the Imperial and Economic Conferences are recorded, and the Prime Minister of New Zealand has contributed a special article on the opportunities afforded to prospective settlers in that Dominion. Imperial Preference, British and American Trade and other current topics will be found under Questions of the Day, and the Produce and Exchange of Wheat and other Cereals are shown in statistical tables, while the articles on India and the British Dominions have received special care in view of the British Empire Exhibition to be held in 1924. The addition made have been so numerous that several pages have been added to the Index.

The Editor wishes to express once again his indebtedness to subscribers in all quarters of the globe for the suggestions they have made. A New Zealander, justly proud of his former home in the Stewartry, wrote from Nauru Island to request that the Scottish Burghs should be placed in alphabetical order. A Professor in Reykjavik asked for further statistics concerning the Death Duties in Great Britain, a Spaniard in the Argentine, with true Castilian courtesy and in idiomatic English suggested the cross referencing of figures showing the trade of one Country with another. These are typical of the many useful suggestions sent in, and it can almost be said that such correspondents edit 'WHITAKER', it can certainly be said that without them the Editor's task would be one of far greater difficulty. The co-operation so obligingly rendered is very highly appreciated, and it will always be the Editor's aim to foster and maintain the friendly interest of his subscribers.

Past, present and future correspondents are earnestly requested to note the first day of October as the latest date for suggestions if they are to receive full consideration, especially when statistics not hitherto given are called for by the correspondent.

CARS — MOTOR CYCLES — CYCLES

Perfect in every detail, whether of construction or performance, the latest Humber Models more than maintain a reputation long since established, and offer an attractiveness rarely found in other cars of approximately the same cost. Alike in open Models and in the saloons, comfort and elegance are combined with exceptional road performance, while the detail finish is everywhere of the very best. There is a model for every motoring requirement.

8 h p	LIGHT CAR (Chummy body)	£250	11 4 h p	3 DOOR SALOON	£595
8 h p	LIGHT CAR (2 seater with dickey seat)	£250	11 4 h p	4 SEATER ALL WEATH'G	£610
11 4 h p	2 SEATER with double dickey seat	£460	15 9 h p	5 SEATER TOURING CAR with Auster rear screen	£695
11 4 h p	4 SEATER with Auster rear screen	£475	15 9 h p	3 DOOR SALOON	£915
11 4 h p	COUPE with double dickey seat	£565	15 9 h p	SALOON	£915
				LANDAULETTE	£915

The Humber 2½ H-P Single Cylinder Motor Cycle is a wonderful model which has achieved phenomenal success in many strenuous tests. It is simple to control even in the hands of the novice, for there are no intricacies—every part is accessible, simple and strong. An absolutely reliable machine at a moderate price.

The Humber range of cycles represent the accumulated experience of over half-a-century in cycle construction. Everyone of the models listed for Ladies, Gentlemen, and Juveniles is so skilfully designed and so perfect in every detail of manufacture that lasting satisfaction is assured.

STANFORD'S LIBRARY CHART OF THE WORLD.

REVISED EDITION.

Showing Land and Sea Communications

On Mercator's projection. A clear, readable map beautifully printed and indispensable to the proper study of the general and commercial geography of the World. The latitude embraced on this chart includes the whole of the known land area on the North and extends to the Magnetic Pole on the South. The British Isles lie near the centre, and both the Eastern and Western Routes to the Antipodes are included. This chart has been prepared for general use and shows all the principal ports and harbours of the World. Four sheets 78 x 54 inches. Prices: Coloured sheets, 21s. Mounted to fold in Case, 45s. Mounted on Rollers and Varnished, 45s. Mounted on Spring Roller 120s.

Equatorial scale of 360 nautical miles to an inch

For Durability we strongly recommend intending purchasers to have the maps mounted in either of the above ways

AN AUSTRALIAN INVESTMENT

YESTERDAY, Canberra, the new Capital City of the Continent of Australia, was a beautiful stretch of Bushland enjoying a most perfect climate, awaiting its destiny

TO-DAY, thousands of workmen are rushing on the building of the new Parliament Buildings, the Governor General's residence, and hostels and homes for the members and officials. The next Parliament is to meet in the beautiful new City only two years hence. Millions are being spent by the Commonwealth in the building of the most beautiful City in the world.

TO-MORROW.—The possibilities are inconceivable to day. Men who have penetrated into the heart of Australia can merely hazard a guess at the wealth which lies dormant awaiting development.

At a recent land sale a block of land with a frontage to Castlereagh Street, Sydney realised **£1,577 per foot frontage**, or nearly **£1,000,000 per acre**

We are offering quarter acre building sites in the Canberra Freeholds Estate at **£1 per foot frontage**

The Canberra Freeholds Estate is the nearest freehold land to the Capital, immediately across the railway line from the Federal Territory and a few minutes by rail or car

You can invest in this Estate with safety. Our head office, established in Sydney for 37 years, will watch your interests

We invite investigation, and will give you every facility

Shrewd City business men have invested thousands in the Canberra Freeholds Estate

£60 will purchase a site

TERMS.—Ten per cent deposit balance over 5 years—
at £1 PER MONTH.

Write for plans and particulars and for a few instances of the fortunes made in Australian Cities

HENRY F HALLORAN & CO,
Australia House,

THE HOUSE FOR THE FINE FURNITURE

- ¶ Our goods make a type to all who are interested in securing the best service for Decorating and Furnishing the Home. Inform us selection—Antique and Modern.
- ¶ 'Distinction with Quality' is our watchword, which is to say that we cater particularly for patrons of exclusive taste who desire their surroundings to reflect their own individuality.
- ¶ Nor need this involve excessive expenditure. Our large stock of selected Antiques and Choice Reproductions is priced in plain figures for all the world to see, and if we be permitted to design specially made goods estimates are always submitted when desired. Overseas customers are allowed cash shipping discount in lieu of carriage paid on Home Orders.
- ¶ A personal inspection of our extensive Showrooms, covering floor space of over one acre, is best, but post enquiries receive careful attention and when accompanied by details of goods required, photographs of suitable articles are forwarded. No Catalogues.
- ¶ SPECIALITY Restoration and Decoration of old Mansions, Furniture, &c

FURNISHERS AND DECORATORS TO H.M. THE KING.

MORNING AND EVENING STARS.

☿ MERCURY continues to be an evening star for the first few days of the month, and being at Inferior Conjunction (see opposite page) on May 8 will be technically a morning star after that date, but will not be visible.

♀ VENUS sets earlier but will be above the horizon until after 23h at the end of the month. Its brightness increases and will be at maximum (Mag = 4.2) on the morning of the 25th. It will then be in Gemini, in the neighbourhood of the Twins and Procyon.

♂ MARS rises within the 2 hours after midnight S.E. by E. It is now quite bright (Magnitude +0.2 to -0.6) and will be seen about 10° above the south-east horizon in the dawn.

♃ JUPITER rises two or three hours before midnight, and, as last month, will be opposite to Venus in the sky, each planet being a few degrees above the horizon. Magnitude = 2.1.

♄ SATURN in Virgo is above the horizon throughout the short night. Magnitude +0.5 to +0.6.

or leaves the Solar disc may be of some value. In the past, Transits of Venus have been considered important as means for determining the Sun's distance, but the method is now somewhat superseded. Transits of Mercury in May are more rare than those in November. The last May transit that happened was on May 10, 1892; the next will be on May 6, 1957, but the planet will make a very close approach to the southern edge of the disc on May 10, 1937. There have been, or will be, transits in November of the years 1894, 1907, 1914, 1927, 1940 and 1953.

MORNING AND EVENING STARS

♂ MERCURY is a morning star but rises less than an hour before the Sun and is not likely to be seen.

♀ VENUS retains its great brilliancy in the first few days of the month and will be seen north of west during the evening but becomes rapidly fainter and sets earlier.

♂ MARS now rises before midnight and will be seen at a low altitude above the south east horizon in the early morning. Magnitude = 0.6 to -1.3.

♂ JUPITER being in Opposition on the 6th is above the horizon from sunset to dawn during this month. It will be seen between the south east and south in the twilight. Magnitude = -2.1.

♂ SATURN is now in the south about sunset. It is moving slowly in the direction of Spica and during the evening will be seen to the left of and at about the same altitude as that star. Magnitude +0.8.

morning of June 22 by the time of Japan which gives that day the preference in that region of the world.

Heliographic Elements—The second column in the small Table at the bottom of page 2 of each month shows the position of the Sun's axis of rotation as seen on the disc, the figures giving the arc of the Sun's circumference between the North point and the end of the projection of the axis. The third and fourth columns give respectively the solar latitude and longitude of the centre of the disc (that is of the Earth), referred to parallels of latitude and meridians on the Sun's surface based on its axis of rotation and an adopted Prime Meridian. The fourth column shows that with respect to the Earth the Sun rotates on an axis in 27 $\frac{1}{4}$ days (see p. 66).

MORNING AND EVENING STARS

☿ MERCURY will be at the horizon after sunset but not long enough to be visible.
 ♀ VENUS is a morning star rising at the times shown. It will be seen in the South East about 6h.
 Magnitude -3.5
 ♂ MARS is an evening star and will be seen in the twilight in the S.E. at an altitude of 20°.
 It moves Eastward and higher among the stars and is now less bright than Jupiter. Magnitude -0.8 to -0.2.

♃ JUPITER will be above the horizon for two hours after sunset at the beginning of the month and for an hour at the end. Magnitude -1.4.

♄ SATURN is a morning star rising nearly three hours before the Sun at the end of November.

The open circle ○ indicates the planet's disc. The black circle ● shows that the Satellite whose number is wanting is either in eclipse or is occulted whilst the sign ♄ shows that it is in transit across the disc. It will be noticed that at the specified time on August 13 only one of the Satellites (IV) is named. II and III are in transit and will appear at 20h 50m and 21h 34m respectively and I appears from eclipse at 21h 50m. In most cases the Satellite whose number is wanting may be readily inferred. On rare occasions all four Satellites have been known to disappear the next being on February 14 1931. Besides these brighter Satellites five have been discovered in recent years all so faint that they can only be seen by the most powerful telescopes.

Tidal Constants,

WITH THE RISE OF LIDF AT SPRINGS AND NEAPS

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed

NOTE.—The time thus found will be Greenwich Time for British, French and Belgian Ports and Fish Ports and Amsterdam Time for Dutch Ports

EXAMPLE 1.—Required the time of high water at Aberdeen on January 8th

Time of high water at London Bridge 2h 46m Morn
 Subtract tide interval 0 50

Time of high water at Aberdeen 1 56 Morn

EXAMPLE 2.—Required the time of high water at Aberdeen on January 9th

Time of high water at London Bridge 2h 31m Morn
 Add tide interval 2 15

Time of high water at Aberdeen 5 46 Morn

It may happen that the tide interval to be subtracted is greater than the quantity from which it has to be

taken in which case 24 hours must be added to the London Bridge time the resulting difference will be the preceding day afternoon tide where the London morning tide was used Sometimes the sum high water at London Bridge + tide interval will exceed 24 hours in this case the excess will be the time of high water after the midnight following

EXAMPLE 3.—Required the time of high water at Aberdeen January 19th aft

Time of high water at London Bridge on January 20th 0h 47m Morn

+ 24 hours = 24 47

Subtract tide interval 0 12

Time of high water at Aberdeen Jan 19th aft 55 After

54 Tables for Finding the Times of Sunrise and Sunset

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N and 60° S.

To use the table. In the horizontal line with the Sun's declination in the first column and under the required latitude in the heading there will be found the local apparent time of sunset. Subtracting, this from 24^{h} will give the local apparent time of sunrise. To obtain from this the local mean time, the quantity in the second column on the second page of each month (which is known as the Equation of Time) appropriate to the day in question must be added to or subtracted from these apparent times of sunrise and sunset as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes but will serve equally well for places south of the Equator if the declination North in the first column be considered South and *vice versa*.

If the times of sunrise or sunset are required for any declination or latitude falling between the arguments in the table, they may be found by simple proportion.

THE TIME OF SUNSET

The times of sunrise and sunset given in this Almanack are the times when the centre of the Sun's disc is on the visible horizon at sea level at Greenwich computed on the assumption that the horizontal refraction is $34'$. It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement though in some tables the instant when the upper limb or edge of the Sun is on the visible horizon is given as

DECLINATION	LATITUDE											
	2	4	6	8	10	12	14	16	18	20	22	24

the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset rather than with a precise definition. It has been held by a legal tribunal as would be expected that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich to find the Greenwich time of sunrise at the place named in the first column on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be interred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign -, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the same moment lie in a straight line across the map the lines for different moments being parallel. The lines change their inclination to the meridian throughout the year. Similarly for the setting.

Tables for Determining the Latitude

20	1 8	0 50	0 49	0 43	0 43	0 49	0 57	1 8	1 17	1 21	1 26	1 23
22	1 9	1 2	0 53	0 43	0 38	0 40	0 46	0 55	1 6	1 16	1 24	1 27
24	1 9	1 6	0 58	0 49	0 40	0 36	0 37	0 44	0 54	1 5	1 16	1 24

The corrections in Tables II and III are always to be added or subtracted from the final result because the quantities in Table III above have been increased by that amount in order that they may all be additive.

Solar and Sidereal Time

TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME AND VICE VERSA

The length of a Sidereal day is 23^h 56^m 4^s 09^{ms} of Mean Time. One hour of Sidereal Time is therefore equivalent to 59^m 50^s 17^{ms} of Mean Time and one hour of mean solar time is equivalent to 1^h 0^m 9^s 86^{ms} of Sidereal Time. This may be expressed otherwise by saying that the Mean Time clock loses or retards 9^s 83^{ms} per hour on the sidereal clock and that the sidereal clock gains or accelerates 9^s 86^{ms} per hour on the Mean Time clock. These quantities—acceleration and retardation—are tabulated below for the convenience (common to both) in the middle columns. If the argument be considered as Mean Time its equivalent in Sidereal Time is obtained by adding the acceleration. On the other hand if it is considered to be Sidereal Time its equivalent in Mean Time is found by subtraction, the retardation.

Acceleration	Argument	Retardation	Acceleration	Argument	Retardation	Acceleration	Argument	Retardation	Argument	Acceleration or Retardation	Argument	Acceleration or Retardation

ECLIPSES IN 1924.

In the year 1924 there will be *five* Eclipses three of the *Sun* and two of the *Moon*. All of the Solar Eclipses are partial and visible only from regions round either the North or South Pole and they are not of interest as subjects for observation. The Lunar Eclipses are total but neither of them will be seen throughout all its phases from Greenwich.

I A Total Eclipse of the Moon in the afternoon of February 20. At Greenwich only the latter part of the Eclipse will be visible for the Moon will not rise there until 17h 23m which is 26 minutes after the end of totality. The complete phenomenon will be visible from the western part of the Pacific Ocean Australia and Asia.

Moon enters Penumbra	Feb 20d 13h 15m
Shadow	14h 18m
Middle of Eclipse	16h 8m
Moon leaves Shadow	17h 58m
Penumbra	19h 1m

II A Partial Eclipse of the Sun in the afternoon of March 5. Invisible at Greenwich. This Eclipse will be seen only from a region round the South Pole and in no case will more than three fifths of the Sun's diameter be obscured. At the Cape of Good Hope a partial eclipse will be partly visible. At greatest phase which will happen at 16h 57m by Greenwich Time one fifth of the diameter will be hidden and the Sun will set as the eclipse ends.

III A Partial Eclipse of the Sun in the evening of July 31. Scarcely a fifth of the Sun's diameter at greatest will be obscured and this can only be seen from a region in the Antarctic Ocean south of New Zealand and South America in which there is no inhabited land.

IV A Total Eclipse of the Moon in the evening of August 14. Visible generally the Eclipse will be visible from the Eastern hemisphere except its western part where the beginning will not be seen. The Moon will rise at Greenwich at 19h 20m almost totally eclipsed.

Moon enters Penumbra	Aug 14d 17h 32m
Shadow	18h 31m
Middle of Eclipse	20h 20m
Moon leaves Shadow	22h 9m
Penumbra	23h 7m

The first contact of the Shadow with the Moon's limb will take place at a point 84° to the East of the North Point and the last contact at 110° to the West.

V A Partial Eclipse of the Sun in the morning of August 30. Invisible at Greenwich. This Eclipse will be visible from Russia in Asia the northern part of China and Japan where it happens near sunset. It is also visible from northern Sweden part of Iceland and Greenland, where the Eclipse will happen at sunrise but the magnitude of Greatest Eclipse is only 0.426, and the event is unimportant.

Eclipse begins Aug 30d 6h 50 4m in longitude 41° 35' W latitude 71° 49' N. Greatest Eclipse Aug 30d 8h 22 5m in longitude 173° 5' E latitude 71° 32' N. Eclipse ends Aug 30d 9h 55 0m in longitude 129° 23' E, latitude 41° 5' N.

VI The Planet Mercury will be in Transit across the Sun's disc during the night (Greenwich) of May 7. The end of the Transit may be seen from Greenwich for it will happen more than an hour after the Sun has risen there on May 8. The following are Greenwich Times of geocentric phases that is to say as they would be seen from the centre of the Earth. 1st and second contacts seen from Greenwich will happen about 80 seconds earlier than the times given; the third and fourth about 30 seconds later than the geocentric times.

Ingress external contact	May 7d 21h 44m 4s
internal	7d 21h 47m 4s
Egress distance of centres 124 8	8d 1h 41m 28s
Egress internal contact	May 8d 5h 35m 41s
external	8d 5h 38m 41s

ECLIPSES OF JUPITER'S SATELLITES.

The following Table gives the times of Disappearance (D) and of Reappearance (R) of the Satellites of Jupiter at Eclipse that will be visible from Greenwich in the year 1924. The local mean time of the phase for any place other than Greenwich may be found by applying the longitude (in time) to the times given in the Table adding if the place is East of Greenwich and subtracting if it is West. If Standard Time be required the zone difference is to be treated in the same way or in other words the phenomena of Jupiter's satellites are seen simultaneously from all places where the planet is above the horizon at the time.

From January to the Opposition of Jupiter (June 5) the eclipses take place on the Western side. In this period I and sometimes II disappear by Eclipse and reappear at the Eastern edge. The times of these reappearances after occultation (Oc. I) are given the satellite referred to being that (and opposite page).

The above is a list of the stars of the 6th magnitude (to mag. 6.5) and brighter that will be seen occulted from Greenwich during the year with the times of disappearance and reappearance. The occultations if seen from other places will be *in general*, earlier if the place is West later if it is East. Disappearances usually happen on the East or left hand side of the Moon reappearances on the West. The exact position is shown by the angle from N Point, or the point of the Moon's disc nearest the Pole of the heavens, counting towards the East from 0 to 360. Occultations of Aldebaran on several occasions are to be noted also those of Venus and Mars. The well known binary star γ Virgins is occulted on two occasions, but on both the star is very near the horizon. BD + 14° 657 and - 7° 3728 are also double stars.

of the preceding line. From June 5 to October 4 satellites I, II and III disappear in some cases by occultation at the Western edge, and reappear after eclipse on the Eastern side. The times of these disappearances by occultation are given (I, Oc.) the reappearance at eclipse being in the following line. There are no eclipses of Satellite IV in the list. In alternate periods of about 3 years this satellite is not eclipsed nor occulted nor is it seen in transit across the disc of the planet. The present period of non eclipses began at the end of the year 1922. The first eclipse of the next period will be on February 19 1925.

The Stellar System

THE objects of the sky Sun Moon Planets stars appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the different classes of objects are at very different distances. The stars are the farthest away and individual stars are at great and very various distances from us and are themselves separated from one another by equally large distances. The nearest star to the Sun is nearly ten thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space and their possible movements. There are about 10,000 stars visible to the naked eye in the whole celestial sphere the number including the cases where two or more faint stars close together combine to form one which is so visible. The number naturally depends on the efficiency of the observing eye and the clearness of the atmosphere and the estimate will be less generous if stars of magnitude 6.0 and no fainter are included which is sometimes taken as the limit of naked eye visibility. The whole number of stars down to this limit of magnitude is 4,300 of which more than 3,000 are visible during the year from latitude 60°. By the aid of the photographic plate objects are detected and recorded which no eye can see even with the best optical aid. One hundred millions is an under estimate of the number of stars already photographed and it may be supposed that this number would be much increased with increased exposure though a 1,000,000,000 has been assigned as a limit to their number. The Yerkes telescope whose object glass has 40 inches diameter will just show stars of the 17th magnitude. A star of magnitude 21 has been photographed.

STRUCTURE OF THE UNIVERSE

It is believed that the mass of the stars we see as separate entities are arranged in space in a form which may be likened to a watch or lens. In other words the stellar universe is considerably flattened on both sides the median plane being marked out in the sky by the band of star cloud of irregular shape which is seen crossing the sky on a clear night known as the Milky Way or Galaxy. This follows from star gauges or counts which show that the stars are more dense in the direction of the central plane called the Galactic plane than elsewhere. On either side of this the stars lie thick but the number becomes progressively less as the distance from that plane increases until at its poles they are relatively few. The Milky Way is seen to consist of clouds of faint stars of star clusters other than globular and gaseous nebulae (see p. 64). It is also the location of an early type of stars known as Wolf Rayet and Novae. This galaxy was formerly pictured as a jumble made up of these bodies surrounding the lens shaped system of stars and at a distance from the Sun of the order of 3,000 or 4,000 light years. The Sun is not supposed to be precisely central, but nearly so. A recent description (Shapley) of the structure of the universe dispenses with the idea of an actual globe and affirms that the members of these classes, and also the globular clusters, which are not seen within the limits of the Milky Way, form an aggregation which is named the Galactic system. A class of objects, known as White or Spiral Nebulae (see p. 64) which are seen in directions other than Galactic, and are very distant, may not form part of this aggrega-

tion, but may be "Island Universes, though this is a matter for discussion. The size of the Galactic system is almost conjectural, but according to Prof. Harlow Shapley its greatest diameter is of the order of 300,000 light years and its dimension at right angles to the galactic plane a twentieth of this so that the aggregation is extremely flattened. An opposite view estimates the dimensions at about a tenth of these. The great majority of the nearest stars to the Sun are members of a local flattened cloud or cluster which has a greatest diameter of the order of 6,000 light years. It is recognised that in the space which comprises the Universe of stars there is dark obscuring matter which it is suggested is the cause of some of the dark patches in the Milky Way. As seen in the sky the Galaxy always passes through the same constellations sharing with them the diurnal motion but its direction bears no special relation to the direction of the Ecliptic Equator or horizon. Such a relation is not to be expected for these three planes pertain only to our Sun and Earth which are minor bodies of the Cosmos of which the Galaxy is a main outstanding feature.

SIZE OF THE STARS

The stars are too remote for even the largest to show an appreciable disc in any telescope as do the planets and obviously it is impossible to estimate the size of a star from its brightness as we see it for this depends on its distance and on its intrinsic brightness which may depend on its temperature or other physical condition. A recent theory of stellar evolution (*q.v.*) involves the idea that the stars are of very different size and luminosity some being known as giants others as 'dwarfs'. It has been found with some probability that the surface brightness of a star has a relation to its spectrum (*v. infra*) and assuming this, the angular diameter of a star is to be found by dividing its total brightness by the surface brightness per unit area which last is shown by its spectrum. A more direct way has however lately been found and by utilizing an optical principle proposed many years ago by Fresnel and elaborated in dependency by Michelson later an apparatus known as an 'interferometer' has been invented and constructed for the purpose. With this the angular diameter of Betelgeuse, the well known red star in Orion has been measured as 0.047 and adopting 0.018 as the parallax the diameter of this star is found to be 240 million miles. The diameter of Antares, measured in the same way, was found to be 0.054 in angular measure which corresponds to 19 million miles linear. Antares was similarly found to have an angular diameter of 0.040 and since 0.030 is an extreme value of its parallax its diameter is at least 120 million miles and may be much larger. It is satisfactory that these angular diameters agree closely with the value derived from consideration of the assumed surface brightness of each star.

ABSOLUTE MAGNITUDE

This phrase is much in use in the astronomy of the present day, and implies the luminosity of a star irrespective of its distance. The precise definition of absolute magnitude is that it is the number that expresses according to the usual system of stellar magnitude (see p. 71) the brightness of the star as it would be seen at the

The last column of each table shows the brightness in respect of distance compared with that of our Sun which is taken as a star of apparent magnitude -26.57 on the stellar scale. A star marked thus * is the brighter component of a binary or multiple system. The first star in the list seems to be physically connected with the α Centauri system. Munich 15040. The proper motion of this star is 3.3 per year is the greatest known. It is probably the smallest star known. The distance of γ Indi is from a recent spectroscopic determination.

distance of 10 parsecs (parallax 0.1). It is clear that if the distance of a star is known its absolute magnitude can be computed from its apparent *m* by reversing the formula if the absolute and the apparent magnitudes are known the distance of the star can be determined.

DISTANCE OF THE STARS

The distance of the stars from us is so immense that its determination is perhaps the most difficult problem of astronomy and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct method of determination of a star's parallax as this quantity is called consists in measuring the minute difference of direction of the star as seen from opposite points of the Earth's orbit which is now usually done by photographing the star and its surroundings at appropriate epochs and finding by measurement the change of position of the stars with relation to its neighbours. A spectroscopic method of finding parallax through the absolute magnitude has been evolved. It has been found that in the spectra of stars the ratio of the intensity of certain pairs of lines is a function of the absolute magnitude. In stars intrinsically brilliant for example in certain Calcium line is very strong whilst a line due to iron is very weak whilst in an intrinsically faint star the case is exactly contrary. This principle has been adopted and by help of the spectra of stars whose distance has been found trigonometrically it is found possible to infer the absolute magnitude of a star from examination of its spectrum and hence its distance. These methods are now being pursued with vigour, and by means of these and some other less direct methods the distances of parallax of more than 3,000 individual stars are now known. If by any means it is possible to find out the mean parallactic movement (see *Stellar Motion*) of a group of stars the mean parallax or distance of this group follows from a simple computation. In other words the space through which our Sun travels which is about

twice the diameter of the Earth's orbit in a year is taken as the base line with which to measure the distance of the stars.

The distances of many of the stars are given in the lists on pages 60 and 61. To express these large distances a large unit is required. One of these is the space that light moves through in one year, which in miles is 6 followed by 12 zeros. Another unit is the *parsec* or the distance at which the mean radius of the Earth's orbit would subtend an angle of 1 (parallax = one second). This is 3.26 times the light year and is represented roughly by 2 followed by 13 zeros. There is also a unit little used called the *Sironian* which is equivalent to a million times the distance of the Earth from the Sun.

STAR SPECTRA

Most of the bright stars and many of the fainter have been examined with a spectroscope and have been divided into classes according to their type of spectrum as indicated by the lines which cross them. The spectral types being named by the letters O B A F G K M N. The stars of the first two classes O and B have spectra characteristic of helium and hydrogen and have some affinity to planetary nebulae. Stars whose spectra range between A and K—and it is to be remarked that there is no rigorous line of division between the classes—are white or blue stars and in their spectra broad absorption lines of hydrogen are conspicuous. In the next groups—K to G, and G to K—lines characteristic of metals appear fine but numerous and the stars of this class are yellow. The spectrum of our Sun falls within the group K to G. The characteristic of the spectra of the remaining classes M (and N) is the existence of a considerable number of flutings and the stars are red. Antares, Betelgeuse, and a Herculis are notable stars in sub-classes of this type. (See Table above.)

STELLAR EVOLUTION

It is realised that the spectrum of a star shows not only the materials of which it is composed but also its physical condition. Stars of the M

type are of low temperature, whereas those of A and B are hot stars. This has led to hypotheses of stellar evolution, but whereas it has been supposed that each star passed through stages from hot to cold as indicated by the order of spectra shown above, a recent theory affirms that a star begins its existence as a large cool body (Giant star type M) and after increasing in temperature and density through the types K, G, F, A, B, passes with diminishing temperature and decreasing volume in reverse order through the types to become a Dwarf Star of the M type. This theory which resembles in some respects one propounded by the late Sir Norman Lockyer is in its present form the result of researches on stellar masses and magnitudes by Prof. H. N. Russell, of Princeton U.S.A.

STELLAR MOTION

Many if not all of the so called Fixed Stars are gradually changing their positions relative

to one another, the movement of each star being called its Proper Motion. Consideration of these proper motions has led to the conclusion that, they are in part due to an actual movement in space of the star itself, but in part to the movement of our own Sun which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way it has been found fairly conclusively that the Sun and with it the Earth and planets is moving, through space with a speed of 19.5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega. The Proper Motions of Stars of spectral type K and C are found to be much larger on the whole than those of other types and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type.

STAR CLUSTERS AND NEBULÆ

Among the other apparently solitary stars we may notice groups of stars gathered close together sometimes easily separable into individual stars others that can only be separated in the most powerful telescopes and some that appear as unresolvable patches of light the latter are called nebula and were aptly described by Sir William Herschel as shining fluid. A short list of the more interesting of these various objects is given herewith.

No in New General Catalogue	Messier or Herschel's Number	R.A. 1900	Declination 1900	Constellation	Appearance
		h m s			
224	M 31	0 38 +40 50		Andromeda	Very brilliant oval nebula visible to naked eye
503	M 33	1 29 +29 38		Andromeda	A large nebula.
669 & 884	M 33 34	2 15 +56 45		Perseus	Fine double cluster visible to naked eye
1952	M 1	5 30 +22 0		Taurus	The well known Crab Nebula of Lord Rosse
1976	M 42	5 31 - 5 27		Orion	Large and splendid nebula, visible to naked eye
2070		5 39 -69 10		Dorado	(Great Looped nebula—visible to naked eye)
2099	M 37	5 47 +32 30		Auriga	A fine cluster of stars
2168	M 35	6 4 +24 20		Gemini	Magnificent cluster of stars
2632	M 44	8 35 +20 15		Cancer	Called The Beehive, or the Beehive—visible to naked eye
3372		10 42 -59 16		Aigis	Great nebula surrounding η Aigis
5194	M 51	13 26 +47 35		Canes Venatici	Brilliant spiral nebula
5272	M 3	13 38 +28 45		Canes Venatici	Splendid cluster of stars
6205	M 13	16 39 +36 35		Hercules	Very fine cluster of stars visible to naked eye
6494	M 23	17 52 - 19 0		Ophiuchus	Fine cluster of stars
6543	H IV 37	17 59 +66 35		Draco	Bright planetary nebula
6720	M 57	18 51 +32 55		Lyra	Pearl-shaped ring of bright incandescence
6853	M 27	19 56 +22 30		Aquila	Large nebula formed like a dumb-bell or Hour Glass
7089	M 2	21 29 - 1 10		Aquarius	Splendid globular cluster of stars.
7078	M 15	21 26 +11 49		Pegasus	Magnificent cluster of stars

Besides the obvious separation into these two classes there is further subdivision. There are loose clusters of stars of which the Pleiades is the best known example and there are globular clusters whose character is described by their name. Among the nebulae there are some that are small regular in outline and show a uniform disc of light known as planetary nebulae and analogous to these are some which are dark in the centre called annular or ring nebulae. Beyond this the spectroscopic divides the nebulae into two great classes. The first spectroscopic observation of a nebula made by Huggins in 1864 showed a spectrum of one bright line only which indicated that these bodies or at least some of them are constituted of glowing gas. Later investigation showed that the spectra of some nebulae are continuous, from which it may be inferred that these are in a later stage of progress assuming the evolution of celestial bodies from a primitive nebula. The nebulae

with continuous spectrum are called 'white' nebulae, in distinction to those with bright line spectra which are green or gaseous. Photography has brought the means of studying the number and form of these objects in great detail and it is found that the white nebulae are as a rule of a spiral form and that there are many thousands of them. The gaseous green nebulae are in a small minority. The great nebula in Andromeda is a notable example of the spiral class. Its spectrum is perfectly continuous unmarked by any lines or bands either bright or dark, and its shape is that of a convoluted mass seen edge-wise. The position of these bodies and the method of their distribution in space have already been mentioned (see p. 62). The larger gaseous nebulae lie mostly in the Milky Way and the smaller the so called planetary and stellar nebulae though they do not do so entirely, do not markedly avoid it as do the spirals which lie in a zone of the sky roughly at right angles to the Galaxy.

VARIABLE STARS

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is the best known. In general this star is of about the second magnitude but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude remains so for about 20 minutes, and then regains its light. The whole eclipse occupies about 9½ hours. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table above. The position of Algol is given by R.A. 3h. 37m., Declination 40° 39' N.

There are variable stars of types other than the Algol. The Cepheid variables have an average period of about 9 days, and the rise from minimum to maximum takes only about one-third of the whole period so that the decrease of light is more gradual than the increase. Stars of the β Lyrae type pass from minimum to minimum in about 6½ days but are not of the same brightness at all minima, the alternate being equal. There are variable stars of long period (about 330 days) of which Mira Ceti is the most famous and others more capricious in their variation whose peculiarities can scarcely be summarized. Mira Ceti (R.A. 2h. 16m., Declination 3° 19' S) will be at maximum at the end of January 1924, and again at the end of December. This star remains at naked-eye visibility for about three months, and there will be opportunity for its observation at the end of the year though precise details are uncertain.

The variation of stars of the Algol type is believed to be caused by the partial eclipse of the bright star by a dark companion which moves in an orbit round it. A secondary minimum that has been noted in the period of variation of Algol can be accounted for by this theory. The variation of the Cepheid variables, on the other hand, is not caused by eclipse though many of them have been found to be binary stars. It has been suggested that it may be due to a pulsation or periodic swelling and contraction of the star. A curious relation has been found between the absolute magnitude and the period of variation of Cepheids those of longer period being the brighter.

NEW OR TEMPORARY STARS

The phenomena known as "Novae" or "New Stars" can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs

only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blazed out into conflagration or as an alternative theory a mass of dark nebulous gas may by some means have become incandescent. The great brilliancy which occurs very suddenly, is short lived for there follows a rapid fall and in a few months the object emits, perhaps 1 per cent of its light whilst in a decade it has fallen to its original condition and luminosity. As these changes go on the spectrum undergoes equally remarkable variations. The few observations that have been made during the increase of brightness show a spectrum of the ordinary type crossed by dark lines which are much displaced from their normal position. Just as the maximum light is reached the spectrum is full of bright bands flanked by dark lines on the side of the shorter wave length towards the violet. The lines of hydrogen are most conspicuous but helium is present, and other bands can be identified with unchanged lines or lines which are produced in the laboratory when metallic vapour is very strongly excited to luminosity by a powerful electric spark. Later on as the light begins to fall the characteristic nebular lines in the green and violet make their appearance and become the most conspicuous feature of the spectrum while the other lines fade away. At a still later stage the spectrum resembles that of the nucleus of a planetary nebula or of one of the Wolf Rayet stars which are found here and there in the Milky Way. Below will be found a list of the Novae (12 in number) that have been visible to the naked eye since 1848. In the year 1923 a New Star or a rapid increase and decrease of brightness of a star in Cygnus was reported also a sudden brightening of β Ceti but these were not observed sufficiently to be placed permanently on record.

The Solar System.

THE Sun is one of the millions of stars that make up the Universe, and so far as human knowledge goes is not unlike many of the stars we see in magnitude and constitution. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major planets and a thousand minor planets or asteroids circulating round him at varying distances in oval shaped orbits. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals since they move in elongated elliptical orbits of which the Sun is at one focus are also members of the Solar system, but shine partly by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (see p. 75) is used as a fundamental plane of reference. The other planets move at varying distances from the Sun in planes inclined but little to the plane of the Ecliptic and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi major axes. Following are given brief notes on each of the bodies which make up the Solar system with details of their sizes, distances from their primary and periodic times in tabular form. The time of rotation about the axis or the length of the day of the planet is added where this is known.

THE SUN

The surface of the Sun seen in a telescope presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered, the shape of these being such that they have been called alternatively rice grains or willow leaves. On this surface black spots appear sporadically, and around these are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. Associated with the faculae there are brilliant clouds of calcium vapour that are revealed by the spectroheliograph, an instrument by means of which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. The nature of the spots is not known with certainty. Formerly they were thought to be saucer shaped depressions at a lower level than the surrounding surface, which is called the photosphere. Modern views describe them as columnar vortices which have a deep seated origin far below the photosphere, and assume that a sun spot is a vast tornado in which electrified particles are rapidly whirled. This view is confirmed by the invariable presence of a magnetic field in the neighbourhood. There is apparently a connection between the solar activity, as shown by the spots, and terrestrial magnetism for the coincidence in time between certain exhibitions of its variations and the appearance of sun spots is too marked to be fortuitous. It is suggested that the connection is made by stream like emanations of corpuscles from the Sun which

envelop the earth. The spots vary in size and number, and their total area reaches a maximum about every eleven years. They seldom appear more than 30° of latitude from the solar equator north or south, and the spotted regions converge towards that equator as minimum approaches. From measures of their position the latitude and longitude of the spot on the Sun's surface (Heliographic) can be computed. Elements necessary for this computation are given on page 2 of each month. The Sun rotates on its axis in about 25 days 9 hours, which is shown by the apparent movement of the spots. They cross the visible disc from the eastern to the western edge in 13 or 14 days, the average period of the Sun's rotation with respect to the Earth being 27 $\frac{1}{4}$ days because of the orbital movement of the Earth in the interval. Like Jupiter, the Sun appears not to rotate as a whole the period of rotation being different in different latitudes. The Equator makes a sidereal rotation in less than 25 days whereas the period for latitude 35° is nearly 27 days. As may be inferred from the table below the cycle is now about at its minimum. There was a small spot in a high solar latitude in June, 1922, which is always a precursor of a new cycle and the appearance of a group in 25° S in September 1923, and of others later may establish the minimum about the middle of the year 1923.

1860 1			

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, certain red prominences are seen projecting from the Sun's edge which consist of masses of glowing hydrogen gas arising from the chromosphere. Some times these are of remarkable shape and extend to enormous heights occasionally being detached from the body of the Sun. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscopy. Another appendage to the Sun outside the chromosphere called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen, the upper is a beautiful mass of silvery white light, in form of feather like plumes, with dark spaces between, which have been traced from the Sun's edge to a distance as great as twice the Sun's diameter. Occasional streamers of the corona have been followed to a greater length than this. The corona does not retain a constant form, but appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun spots. Solar eclipses are only seen total at places where the shadow of the Moon falls, and an eclipse is partial at localities off this line of totality because the change in the observer's position puts the Moon out of the direct line joining her to the Sun. Total eclipses of the Sun are rare in this country. There will be an eclipse on June 29, 1927, which will be momentarily total from a track running across North Wales and North West Yorkshire.

MERCURY

• Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, and is sometimes to the West, sometimes to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are technically known as Elongations, and the times and distances measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 26° or as large as 28° . The period of revolution round the Sun—in other words Mercury's year—comprises 88 solar days and he turns on his axis either in the same time, and therefore always presents the same face to the Sun like the Moon with respect to the Earth or in about 25 hours. Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West (See pp. 20 and 71).

VENUS

Venus, which is nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth. Her apparent movement with respect to the Sun is similar to that of Mercury except that being farther from the Sun, and nearer to the Earth than her smaller neighbour the angles of Elongation exceed those of Mercury and extend to 47° . The disc of Venus is not telescopically interesting, for owing to her dense cloud laden atmosphere very few markings are visible and this renders a determination of her axial rotation uncertain. By some astronomers her day is believed to be very nearly equal to that of the Earth whilst others have concluded that it is equal to the year of Venus or in other words that the planet always presents the same face to the Sun. Venus has epochs of great brilliancy when she appears as a beautiful crescent like the Moon when about 5 days from or before New. There will be occasions of this kind on May 25 and Aug. 7 1924, and Venus will be brilliantly visible as an evening star in the spring months of the year and as a lustrous morning star in the summer and autumnal months (See p. 12).

MARS

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth. There will be an exceptionally bright Opposition in August 1924 (see p. 32). Mars like Mercury and Venus, exhibits phases, but in a much less degree than those planets. His disc departs from exact circular form or is gibbous only to the extent of one eighth of its diameter. The other superior planets are too far away to show any very appreciable phase though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his

rotation period to be well ascertained. There are, besides white spots at the poles of rotation these are supposed to consist of snow, and when it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely which it does rarely. The remainder of the disc is divided into greyish and ruddy areas, which have been called seas and lands. The dark grey patches are now not considered to be oceans, but are usually regarded as marshes or areas covered with some sort of vegetation. These areas are seen to change their colour and intensity with the Martian seasons very much as our vegetation would appear to do if viewed from a celestial neighbour. Certain fine dark, straight markings seen across the ruddy areas have been named 'canals' perhaps a little unfortunately as it has been taken to imply that they are of manual construction but for this there is no sufficient evidence or proof.

MINOR PLANETS

Between the orbits of Mars and Jupiter a large number of small planets have been discovered and every year a considerable number are added to the list. At present the total number known is about a thousand and there may still be thousands awaiting detection. The four largest found in the early years of the 19th century are—Ceres 485 miles, Pallas 304 miles, Juno 128 miles and Vesta 243 miles in diameter. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects and it is probable that some of them are not more than from 10 to 20 miles in diameter and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably and an average may be taken as 1600 days or 4½ years. Some of the orbits are very oval and the inclination of their planes to the Ecliptic has considerably different values. The inclination of Pallas is 35° whilst that of Juno is only 13° . One of these small bodies named Iros at some oppositions approaches nearer to the Earth than Mars does at any time and this affords a good opportunity for determination of the solar parallax. Oppositions happen at intervals of about 2½ years, the circumstances being very different at the different occasions. Eros will be in Opposition on March 31 1924 and nearest the Earth on March 5, when the distance will be about 33 million miles. There will be a very close approach in 1931 when the distance will be about one half of this.

JUPITER

The next planet in order from the Sun Jupiter is the largest in the system and has a diameter eleven times that of the Earth. Its density however is only $\frac{1}{4}$ th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form, an oblate spheroid is believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610. The planes of their orbits are but slightly inclined to that of Jupiter about the Sun, and in consequence these bodies

which shine by the light of the Sun, are eclipsed every Jovian lunation, except Satellite IV, which escapes under some circumstances (see p. 59).

The surface of Jupiter presents features of interest because of their varying, changes though at the same time they possess considerable permanence. Of these the best known is the Great Red Spot and its surroundings. There are records of an observation of a spot by Hook in 1664 which may have been an early appearance of this but the first modern observation was by the Rev W. P. Dawes when he figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857. It came again into prominence in 1878 and the following years. A curious bay or hollow in this belt has been visible since 1831, and if we accept this as identical with the one now intermittently perceptible (which includes the red spot) then the rotation of this object during the 89 years from 1831 to 1920 was $9^h 55^m 36^s$ from about 78 500 rotations.

In the early months of 1919 the great red spot and its immediate surroundings underwent some surprising changes. The bay or hollow in the S side of the southern equatorial belt disappeared, and the red spot seemed almost obliterated. The south tropical disturbance visible since 1901, consisting of an extensive dusky marking reaching halfway round the circumference of Jupiter and situated in the usually bright zone between the southern side of the south equatorial belt and the south temperate belt apparently disappeared. The apparition of 1919-20 was again remarkable. The features mentioned above, the Bay, the Red Spot Hollow, and the S Tropical disturbance had all reappeared, and the Red Spot though without its colour, was well defined.

At the opening of the year 1924 the position of the latter object will be approximately 150° , or a little more than 4 hours preceding the zero meridian (System II) of Jupiter, and if the previous motion is continued the values above given will increase at the rate of about 2° , or 3 minutes per month. There is much to repay a careful study of the position of Jupiter's surface referred to through adequately powerful telescopes. The transit of the zero meridian (II) of the planet on various dates in 1924 will be as under in astronomical time —

1924		1924	
Feb	9	June	6
"	11	"	8
Mar	9	July	3
"	11	"	7
Apr	7	"	11
"	11	"	15
May	8	Sept	1
"	10	Oct	2

The times for other dates may be found by adding periods of $9^h 55^m 40^s$.

Note — Two systems are in use for defining the positions of markings on Jupiter. In System I, which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $9^h 50^m 30^s$. System II applies to the temperate Zones, and in this the time of rotation is $9^h 55^m 40^s$.

It is to be remembered that in March, 1924, the Red Spot will come to the Central Meridian of Jupiter about 4.15m before the times given in the foregoing list, and that this interval of the precedence of the spot will probably increase by about 3 minutes per month.

SATURN

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen, but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 28° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece, either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. His figure shows a bulging at his equator, the ratio of the polar to the equatorial diameter being as $13\frac{1}{2}$ to 15.

Saturn has ten satellites situated outside the rings, some of the former are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon whilst Iapetus is about the same size as our satellite.

Titan was discovered by Huyghens in 1655. Tethys, Dione, Rhea and Iapetus (see table p. 70) by J. D. Cassini towards the end of the 17th century. Sir Wm Herschel discovered Mimas and Enceladus in 1789, and Hyperion was observed for the first time, almost simultaneously by Bond and Lassell in September 1848. The most distant Phoebe, which was first seen in 1898 (photographically by W. H. Pickering), moves in its orbit in retrograde direction like the two exterior satellites of Jupiter VIII and IX. Themis, which is called the tenth satellite, though it appears not to be the farthest from Saturn, has been observed once only since its discovery in 1900, and its reality is doubtful.

URANUS

Discovered by William Herschel at Bath in 1781, this planet is only just visible to the naked eye. In a telescope Uranus may be distinguished from the stars around by his disc, which is obvious though less than $4''$ in diameter, and by the quality of his light, which is less piercing than that of the stars. The two outer and brighter of its four satellites were discovered by Wm. Herschel in 1787, the two inner by Lassell in 1851. All four move in a plane which is almost at right angles to the ecliptic and their motion is considered to be retrograde.

NEPTUNE

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. The motion of its single satellite, which was discovered by Lassell in 1846, is retrograde.

THE MOON

Neither Mercury nor Venus, so far as is known, has a satellite. The one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239 000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the Earth but every region of the Moon is presented to the Sun in turn and as there is no sign of water or vapour on the disc, and con-

sequently no atmosphere, the surface must be exposed to the most violent changes of temperature. In the lunar day of half a month it must be heated to a very high temperature, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,160 miles and her rate of motion through the firmament $13^{\circ} 10' 35''$ per day, which implies that she travels over a space slightly exceeding her own diameter in one hour. The average time she takes to move around the sky is 27d 7h 43m 11s, and the average time from a New Moon to the next is 29d 12h 44m 3s. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief seas, plains, mountain ranges, ring plains, and crater pits.

Attempts have been made to interpret some small variations in certain of the lunar features as seasonal changes due to the change of temperature of the Moon, but observations made during lunar eclipses, when presumably the Moon suffers considerable change of temperature, gives no support to this view.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse which may be either total or partial as in the case of solar eclipses but there is the difference that the phase for lunar eclipse is the same for all observers where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but because the Sun's light is scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a copper coloured disc, the precise shade being different at different eclipses. It will be understood that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

In a note on page 36 it is explained why the Full Moon, near the time of the Autumnal Equinox, rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the in gathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS

Wedge shaped Valley of the Alps—Near the central line of disc towards the north, a cleft 83 miles long and $3\frac{1}{2}$ miles broad.

Apennines—An extensive mountain range some what similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length 450 miles. Highest summit (Huyghens) reaches 18,000 feet.

Arctarchus—A lunar crater in N E quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the sun rounding region is involved in shadow.

Mare Crisium—A dark grey oval plain visible to naked eye near W N W limb of Moon. Extends 280 miles N to S and 354 miles E to W. Well seen five days after new or a few days after full.

Mare Serenitatis—lies S of the Moon's centre, and extends over 428 miles. A nearly circular dark plain. Contains a crater, Lunae, formerly suspected of change. This mare is visible to naked eye.

Clavius—One of the finest craters on the Moon, and about 242 miles in diameter. Situated on S limb.

Tycho—towards S limb. Has been called 'the metropolitan crater of the Moon'. A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it and they are very conspicuous at the time of full moon. In its region (S limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

COMETS

In addition to the planets there are other interesting objects belonging to the Solar system called comets. Some of these revolve in elliptical orbits and return at intervals which, in the case of those that have been observed, range from $3\frac{1}{2}$ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not very numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve in periods from $3\frac{1}{2}$ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases.

Their paths extend outwards to the position where Jupiter performs his revolution, and from this circumstance they are termed Jovian comets.

ELEMENTS OF THE SOLAR SYSTEM

Orb	Mean Distance from Sun		Sidereal Period	Synodic Period	Inclination of Orbit to Ecliptic	Diameter	Mass compared with Earth	Period of Rotation on Axis
	Radius of Earth's Orbit	Millions of Miles	Yrs Days	Days	°	Miles		d h m.

						30,000		10 49
						33,000		?

The comets in the following list (except Schorr) have already been seen at least once since discovery. The approximate time of next perihelion passage, calculated from that of their last appearance is given in the second column —

Name	Last Appearance	Period in Years
Encke	1924 Nov	1921 3 30
Brooks	1925 Mar	1921 7 10
Schorr	" June	1928 6 73
Faye	" Aug	1920 7 41
Wolf	" Oct	1928 6 79
Tempel Swift	" Oct	1908 5 68
Tempel (a)	" Nov	1925 5 17
Borrelly	" Nov	1928 6 91

The dates of perihelion passage of the following comets which are said to be periodic, but (except Tempel's) have not been seen to return, may fall about this time — Tempel (1867) 6 yrs
E Swift (1894) 5 9 yrs Swift (1899), 8 5 yrs
Barnard (1892), 6 3 yrs Swift (1895) 7 2 yrs
Denning (1881), 8 6 yrs Brooks (1886), 5 6 yrs
Tempel's comet was last seen in 1879.

It is noteworthy that only one comet was discovered in the year 1923 (up to November). There are usually five or six.

There are other families of comets, none so large as the Jovian named respectively from the planets Saturn Uranus and Neptune for reasons similar to that given above. Halley's comet belongs to the Neptunian family.

The most probable date for the return of Di Vico's comet of 1846 was November 1922 but the period is uncertain by 2 or 3 years. It is therefore possible that it may reappear in 1924.

In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. From examination of the spectrum of the head, comets appear to consist of carbon in various forms, and cyanogen has also been detected. Secondly there are bright metallic lines due to sodium, magnesium and iron which appear only when the comet is near perihelion, and in some cases have become very strong upon close approach to the Sun. The spectrum of the tail shows certain characteristic bands that are due to carbon monoxide of very low density. Generally a continuous spectrum is shown as a background to the bright lines from which we infer that a part of the comet's light is due to reflected sunlight. Comets tails are generally

directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

METEORS

Another class of objects which belong to the Solar system are the meteoric streams, giving rise to occasional showers of meteors falling

No	Epoch 1923	Radiant Point R. A. Dec	Name of Shower

June 28, which had a distinct connexion with Pons Winnecke's periodical comet, the orbits being nearly the same. This comet returned to perihelion on June 22, 1921, but the attraction of Jupiter had so disturbed the comet's orbit that it passed outside the earth's path by about two million miles, and the expectation of a brilliant meteoric shower was not realized. Meteorites are composed of terrestrial elements, iron, chromium, magnesium and nickel being in large proportion.

THE ZODIACAL LIGHT

This is an appearance which is little understood, and therefore deserves the attention of observers. It shows as a band of faint light which stretches up slantingly from the Sun before sunrise in the autumn months and after sunset in Spring. It may be the manifestation of a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems. It has been asserted that it is a mere atmospheric effect but this is not consistent with some of the chief features of its appearance. That it has a celestial origin seems certain but its true nature is not clearly distinguishable on the evidence before us.

THE AURORA BOREALIS

This phenomenon may be considered more terrestrial than celestial. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches and condensations, a feature being the prominent bright line in the green in its spectrum which is identified with a faint yellow green line to be observed in the background of the sky on nights when no auroral display is visible. Its chief manifestations occur at fairly regular intervals of about eleven years, and seem to be associated with magnetic disturbances and Sun spots which have similar periods. The aurora is sometimes regarded as showing the outer limit of our atmosphere, and its height has been determined. The general result is that the elevation of an aurora is between 50 and 200 miles. The great majority are about 60 miles high, and there are few above 100 miles. There is some suggestion that with magnetic storms, the period of their appearance follows that of the Sun's synodic rotation (27½ days). On March 22, 1920, there was a very extended group of spots at the middle of the Sun's disc, a magnetic storm, and splendid display of aurora during the night. A similar coincidence occurred in 1921 (May 14).

ALPARKI DIMENSIONS OF SATURN'S OUTER RING, 1924

Date	Major Axis	Minor Axis	Date	Major Axis	Minor Axis	Date	Major Axis	Minor Axis	Date	Major Axis	Minor Axis
Jan 13	38° 16'	+10° 85'	April 18	42° 88'	+11° 31'	July 23	38° 26'	+9° 56'	Oct 27	34° 77'	+10° 71'

When the above numbers are less than 0.500 the planet is *homed*, when greater than 0.500 it is *gibbous* until unity is reached when it is full.

Stellar Magnitude—The numerical magnitude of a star shows its order in a scale of brightness the terms of which are in geometrical progression. Stars just visible to the naked eye are of magnitude 6. A 5th mag is about 2½ times as bright as a 6th, a 4th magnitude the same multiple of a 5th, and so on, and from this it follows that a 1st magnitude star is a hundred times as bright as a 6th. The scheme may appear paradoxical because the brightness of the fainter stars is shown by the larger numbers but this is quite reasonable since the word 'first' implies pre-eminence. It follows logically that a star 2½ times as bright as a 1st should be of magnitude 0 and a star 2½ times as bright as zero of negative magnitude, i.e. -1 and so on. The use of fractional magnitudes corresponding to brightnesses interpolated between these integral multiples at once suggests itself. Capella and Vega which are nearly but not quite 2½ times as bright as a star magnitude 1 are mag 0.2 and 0.1 respectively (zero magnitude). The brightness of the planets is shown in these pages according to this system.

Duration of Light and Darkness—The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness or the period of moonlight and sunlight during the twelve hours from 12h to 6h. These small diagrams have four divisions, each representing three hours and a division is left unblackened if the moon or the sun is above the horizon for at least half of the period it represents. The diagrams for the greater part of the year

are  one of each pair being used according as it is light or dark during the periods named. In the summer, when the sun is above the horizon for more than half the first and last intervals, these reduce to 

Wireless Time-Signals Throughout the World

	Wave Length.	G O T of Signals (approximately)			Description of Signals *
		Metres	A m.	A m.	
Paris (Eiffel Tower)	s 2,600		9 28 to 9 30	10 45 to 10 49	FR { "Rhythmic or "Vernier signals are also sent at 10h 0m and 22h 0m. For description see publication mentioned below Rhythmic Signals at 20h A Signals at 9h 0m os, 21m os, 41m os, with intermediate warnings as described below in footnote Rhythmic signals at 8h B (and on wave length 22500 simultaneously) Dashes each of 1 sec duration at 21h 58m os, 22 and 4s, preceded respectively by series of T (—), M (—) and O (—) Similarly at 21h, 59m, 22h 0m Rhythmic signals Similar to Moscow at 19h 31m, 41m, 51m Also Rhythmic signals at 19h 61m os to 19h 13m 49s Dots each sec 13h 58m to 14h 0m, with omissions before 13h 59m and 14h 0m.
Bordeaux	c 23,400		9 0	10 45 to 10 49	
Lyons	c 15,500		9 0	10 45 to 10 49	
Nauen	c 3,100	0 0, 12 0			Dashes each of 1 sec duration at 21h 58m os, 22 and 4s, preceded respectively by series of T (—), M (—) and O (—) Similarly at 21h, 59m, 22h 0m Rhythmic signals Similar to Moscow at 19h 31m, 41m, 51m Also Rhythmic signals at 19h 61m os to 19h 13m 49s Dots each sec 13h 58m to 14h 0m, with omissions before 13h 59m and 14h 0m.
Moscow	s 5,100	22 0			
Petrograd	s 1,700	19 0			
Halifax (Nova Scotia)	s 600	14 0			Dots each second from 2h 55m os (or 16h 55m os) to 2h 59m 49s, omitting 29th and last 5 seconds of each minute Dash at 3h 0m os, and at 17h 0m os (signal) Procedure as at Washington, &c Dash at 10h 0m os and 18h 0m os (signal). B [in, dashes between Dots, 1h 56m os 57m, 58m, 59m, 2h 0m Warn Dashes every 2 secs, 20h 59m 30s to 21h 0m os B [with omissions B [2h 0m os, with omissions Warning Dots at even seconds, 1h 56m os to 2h 55m os, 57m os, 59m os, with series of G (—) O (—) and X (—) preceding each respectively Dashes 12h 01m os, 1m os, 2m os, 3m os, 4m os with warnings between Dots each second, 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Great Lakes	s 1,988	— 17 0			
Annapolis	c 17,443	3 0, 17 0			
Washington (Arlington)	s 2,650	3 0, 17 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Key West	s 1,988	3 0, 17 0			
New Orleans	s 1,832	— 17 0			
Colon (Panama)	s 1,620	10 0, 18 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Balboa (Panama)	c 10,100	10 0, 18 0			
Rio de Janeiro	c 1,800	0 0, 14 0			
Buenos Aires	c 1,000	2 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Cape Town	c 600	27 0			
Lourenco Marques	c 600	8 0, 19 0			
Calcutta	c 2,000	1 30, 13 30			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Hong Kong	c 2,000	22 0, 13 0			
Shanghai	c 600	3 0, 9 0			
Funabashi (Japan)	c 4,000	12 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Choshi	c 600	12 0			
Kavite (Philippine Is.)	s 2,700	3 0, 14 0			
Batavia	c 600	1 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Surabaya	c 600	2 10			
Malabar	c 8,800	1 0			
Perth	s 600	3 0, 15 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Melbourne	c 600	2 30, 14 30			
Adelaide	c 2,600	2 0, 14 0			
Awanui	c 2,000	3 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Wellington	c 600	0 0			
Honolulu (Pearl Harb.)	c 15,500	6 0, 20 0			
San Francisco	s 1,988	20 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Eureka	s 2,650	20 0			
San Diego	s 1,988	20 0			
North Head	s 2,700	1 0			Dots each second from 2h 55m os to 3h 0m os, omitting secs 28, 29 and 54 to 59 of each minute Dots at 1h 01m os, 1m os, 2m os, 3m os, 4m os warning signals similar to Shanghai Dots at 2h 101m os, 12m os, 14m os, with B [warning signals between B B Dashes 10h 01m os, 11m, 21m, 41m and 51m os Dashes, 9h 01m os, 11m, 21m, 41m and 51m os, with As for San Francisco [warnings between
Valparaiso	c 1,000	1 0			
Mexico City	c 1,200	1 0, 19 0			

* For more complete descriptions of these signals reference may be made to the Admiralty List of Wireless Signals 1923. This list is subject to alterations made after date of that publication.

When signals are sent twice in the day as indicated in the third column, or when the description applies to more than one place, the times in this column are to be read, *mutatis mutandis*.

1 Signals A consist of (a) a series of dashes (—) from 20h 44m os to about 20h 44m 55s, with a () at 20h 45m os (first Time signal) (e) and (2) Similar series of (—) and (—) from 20h 45m os, and 20h 46m os, and 20h 47m os respectively with dots for time signals at 20h 47m os and 20h 48m os, the beginning of the dot (about 1 sec) being the time.

Signals B are in accordance with the resolution of the International Time Conference of 1922 and consist of a series of the letter X (Morse —) from 9h 57m os to 9h 57m 50s followed by letter O (—) ending 9h 58m os, (preparatory signals), a series of the letter N (—) the dot being made at every tenth second of the minute 9h, followed by O ending 9h 59m os and a series of letter G (—) ending with O at 9h 59m os. The end of the third dash of the O gives the time. In other cases when the signal is a Dash the beginning gives the time.

s = Spark. c = Continuous wave

Meteorological Summary (British Isles), 1922-1923

73

THE results in the table below are for London (Westminster and Kew)—barometer readings reduced to Mean Sea Level, from October 1922 to September 1923 inclusive

NOTE—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example.—To know on what day of the week Aug. 4 fell in the year 1914, in the table of years look for 1914, and in a parallel line, under Aug., is fig. 6, which directs to col. 6, in which it will be seen that Aug. 4 fell on Tuesday.

† 1752 same as 1772 from Jan 1 to Sept 2. From Sept 14 to Dec 31 same as 1780 (Sept 3-18 were omitted).

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles whilst the sections at right angles to these are circles. The length of the Polar axis according to a recently accepted determination (Hayford) is 7900.0 miles and the diameter of the equatorial circle 7926.7 miles. The suggestion has been made that the Equator is not an exact circle but the supposed deviation from circularity was small and the fact has not been proved. The mean density of the Earth is 5.5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre or to write with more precision the centre of gravity of the Earth and Moon moves in this plane and the Earth revolves round this centre not remaining precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of $23\frac{1}{2}^\circ$ and because of this inclination the Sun is high in the sky in the Summer months and low in the Winter. It is this tilt which causes the seasons for not only does the high altitude in Summer cause the days to be longer but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres the time of Summer in the Northern coinciding with Winter in the Southern and *vice versa*. The dates when the Sun is in the line of intersection of the planes of the Equator and Ecliptic are called the Equinoxes, and on these date day and night are of equal duration all over the globe. The Sun and Earth are surrounded on all sides by the stars and because the Earth moves round the Sun, the latter changes its position with respect to the stars during the year and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is $28\frac{1}{2}$ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time. Because the Earth moves round the Sun in the same direction as it rotates on its axis the length of a solar day is more than the length of a rotation by about four minutes (see p. 77). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity on the North Pole of the Earth moves in a curve roughly spiral about the pole of figure as centre at a distance of a few feet from it.

THE TIDES

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences but these are very greatly modified by the land formations of our globe and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed the analysis will show that the complete tidal movement can be represented by the combination of a series of periodic terms, and when these terms

are each carried forward to some future date their recombination gives the predicted tide. The mean level of the sea remains practically constant but small changes have been detected which may be assigned to various causes. Taking the mean sea level as datum, high water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon but occur later the interval being known as the *age* of the tide—thus at London Bridge the highest or spring tide occurs $2\frac{1}{2}$ days after New or Full Moon and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon and also in the height of the neap tide at the respective quarters but these and other small periodicities are not appreciably noticeable at some ports.

TERRESTRIAL MAGNETISM

A phenomenon of the Earth, the origin of which is obscure, but on which some light has been thrown by recent investigations is known as Earth magnetism. Its best known manifestation is its effect on the needle of a mariner's compass, which except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases the north point shown by astronomical observations in other words the needle does not point to the North Pole of the axis of rotation of the Earth but makes an angle with the terrestrial meridian. This angle is called the *Magnetic Variation* or more generally *Magnetic Declination*, and differs in different parts of the world and even over limited tracts of country. Along a line from the north of Norfolk through Greenwich to Chichester the declination is the same as at Greenwich. Along a parallel line through Dover the West declination is at present about a degree less from Newcastle to Plymouth it is about $1\frac{1}{2}^\circ$ greater whilst at Dublin the declination West is 3° or 4° greater than at Greenwich. Observations of magnetic declination are made and charted to show the amount of this magnetic element over our globe and from such charts it appears that there are two points or regions which may be considered as directive centres and are known as the *Magnetic Poles*. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles nor are they exactly antipodal. The position of the North Magnetic Pole is about latitude 73° longitude 100° W., the South is in latitude 72° longitude 150° E., but these positions apparently undergo secular change. The magnetic declination at any place changes gradually year by year, and its amount observed in or near London at certain epochs is given in the table on p. 76. That the compass needle does not in general point true north and south,

but that it is inclined a certain amount east or west, and that the amount varies with the locality was recognised among western nations by the end of the 15th century, Columbus being credited with the discovery. That there is a secular change in the magnetic declination, or that the amount at any place changes slowly year by year, was discovered by Gellibrand in 1634.

Magnetic Declination at London

Year	
1580	11 15 East
1665	1 30 West
1765	20 0 West
1800	24 0 West

In 1819 the westerly declination at Greenwich was about $24^{\circ} 25'$, which was probably its maximum. The needle has been since moving slowly eastward. The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years and applies to Greenwich only. The figures for 1921, 1922 and 1923 are provisional.

Year	Mean Magnetic Declination at Greenwich West	Horizontal Magnetic Force in (Greenwich)	Mean Inclination or Dip at (Greenwich)
1900	0 29 0	1846	67 8 5
1910	15 41 2	1855	66 52 6
1917	14 37 0	18477	66 52 0
1919	14 28 2	18454	66 53 3
1920	14 8 6	18454	66 53 6
1921	13 57 6	18 49	66 52 0
1922	13 46 6	18 49	66 51 9
1923	13 35 6	18449	66 51 5

The dip is the angle that a delicately poised needle constrained to move in a vertical plane under the action of magnetism only will make with the horizontal plane.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West and returns the range at Greenwich being about $12'$ in summer and $7'$ in winter. The needle occupies its mean position in the morning about 10h and again about 12h throughout the year. It reaches its most westerly position about 12h and its most easterly position during the night or early morning according to season of the year. The inclination or dip also varies in a similar manner to the declination. Since these variations of the magnetic elements are mainly confined to the hours of daylight are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the variation is larger at times of sun spot maximum than at minimum—it may be concluded that they are dependent on solar radiation and on the ionisation of the upper atmosphere by the Sun, which causes it to be highly conducting.

MAGNETIC STORMS

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and is accompanied by spontaneous electric earth currents, which may, if violent, interfere with telegraph working. These storms generally occur when there is a large spot on the Sun, but there was a magnetic disturbance on March 24, 1923, apparently one of a series at intervals of 27 days (approx.), such

as often occur when no solar outburst was visible. It is suggested that this was associated with a rotation of the Sun that had been previously active (Gortle, *Brit Assoc.*, 1923).

GRAVITY

It is deduced as a consequence of Newton's laws that two bodies exert on one another an attraction directly proportional to their masses and in inverse ratio to the square of the distance between them and since this is so the terrestrial mass exerts an attraction upon all the bodies at its surface. The combination of this attraction with the (so called) centrifugal force due to the rotation of the earth produces a resultant force which is known as gravity. The direction of this force is the vertical.

It is found by experiment that the force of gravity (generally indicated by the letter g) is different in different latitudes. At the Pole the force exceeds that at the Equator by rather more than a two hundredth part or in other words a person who weighs 200 lbs. at the Equator by a spring balance would weigh by the same balance 201 lbs at the Pole.

The experiments consist in finding the time of oscillation of the same pendulum in different latitudes the time being smaller as g is larger. A pendulum which makes 1 swing in exactly one second is longer at places where g is large.

The following table gives the relative values of the force of gravity and the length of the seconds pendulum at various places— g is the acceleration due to gravity in centimetre seconds L is given in centimetres.

	g	L
Equator	978 05	99 097
Latitude 45°	980 63	99 359
(Greenwich)	981 21	99 418
Edinburgh	981 60	99 457
Pole	983 23	99 622

EARTHQUAKES

Earthquakes, or earth tremors, are believed to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain when the strain has passed the breaking point. This gives rise to waves which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface sometimes with disastrous effects. The point where the fracture occurs and the earthquake originates is called the seismic centre, or origin, or focus. That part of the Earth which is vertically above this centre is called the epicentre. The waves transmitted through the Earth may come to the surface hundreds, or even thousands of miles from the epicentre, and the times of arrival are recorded. The first indications on the seismograph are made by longitudinal waves (P) which are followed after an interval by direct transverse waves (S) in approximately the same path, but which travel at a different rate. From the length of the interval of time between the arrival of the (P) and the (S) waves the distance of the epicentre from the recording station may be inferred, and from three or more such distances it is possible to make an estimate of the position of the epicentre on the earth's surface. There is no very certain method for determining the depth of the focus, but judging from particular cases for which estimates have been made, this may range from 50 to 450 km. A violent earthquake in Japan on Sept. 1, 1923, was, with others, recorded in England.

Greenwich Mean Time

ALTHOUGH from abstract and philosophical considerations, Time, in actual practice, is measured by the rotation of the Earth and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars. The speed of the Earth's rotation is itself uniform, but the length of the solar day is affected, first by the movement of the Earth in its orbit round the Sun which is not constant because of the ellipticity of the orbit and also by the circumstance that the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant but that of the apparent or the interval from one transit of the Sun across the meridian to the next varies for the reasons above given and it happens that the longest apparent solar day is about December 22 which is 30 seconds longer than the mean. The shortest solar day as thus defined is about September 16, and falls short of the mean by 21 or 22 seconds.

A unit and method of measurement having been established it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun in its apparent annual journey round the Earth is on some chosen meridian. The time is called the Local Mean Time of any place through which the meridian passes. Usually some standard meridian such as that of Greenwich is chosen and the time of that meridian is used throughout a whole country and hence the expression Greenwich Mean Solar Time or more usually Greenwich Mean Time arises (see *Zonal Standard Time* p. 78).

Apparent Solar Time

The time shown by a sundial is called Apparent Solar Time, and is affected by the two causes mentioned, which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, and is to be used according to the precept in the heading.

The Astronomical Day

For purposes of Astronomy the day begins at noon, and the hours following noon are numbered successively from 0 to 23. There is therefore no use of the letters A.M. and P.M. in astronomical tables but January 1st 22h is the equivalent of January 2nd 2h a.m. in ordinary parlance and January 1st 9h in astronomy is recognised as being January 2nd 9h p.m. of ordinary life or at 23h according to the system used in these pages. The abbreviation G.M.T. indicates the time of a day which begins at Mean Noon except when otherwise stated. A change in this system is shortly to be made, and in the *Nautical Almanac* for 1925 the Astronomical Day begins at midnight the hours being numbered from 0 to 23 as has been the practice in this Almanack since 1922. This is generally called Greenwich Civil Time, and is indicated by the letters G.C.T. but the *Nautical Almanac* does not make this distinction.

Sidereal Time

A sidereal day is the duration of a complete

rotation of the Earth round its axis with reference to the stars. This is of uniform length, and is divided, like the mean solar day, into 24 equal hours, which are shorter than a solar hour by about 9.83 seconds of mean time. As the sidereal day is about 4 minutes shorter than the mean solar day (see page 57) it begins earlier day by day by about that amount. The instant of the beginning of the sidereal day in G.M.T. is given on p. 2 of each month. In actual observatory practice time is measured and the standard clock is regulated by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation (see below). The error and rate of the sidereal clock are found by observing, the instant it shows when certain stars, known as Clock Stars, cross the meridian or are due south and comparison of this with the known time of transit (stars R.A.) will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former. The same result might be arrived at directly by observing, the instant by the Mean Time clock when the stars cross the meridian.

Ex-10 find the Mean Time which corresponds to 12h 5m 53s Sidereal time on Aug. 15

-------------------------	--------

Summer Time

In the spring of 1916 the Government adopted as a war measure the principle of a scheme proposed by Mr William Willett about the year 1907 and an Act was passed known as the Summer Time Act (1916) the first clause of which runs: "During the prescribed period in each year in which this Act is in force the time for general purposes in Great Britain shall be one hour in advance of Greenwich Mean Time." Summer Time was therefore used in certain periods (see below) in accordance with Orders in Council issued in each year. In the year 1922 a Bill was passed which ordained that Summer Time shall last from 2 o'clock in the morning of the day next following the third Saturday in April or if that day is Easter Day the day next following the second Saturday in April until 2 o'clock in the morning of the day next following the third Saturday in September which took effect in 1923. Considerable public feeling was shown against the curtailment of the period so early in September and as the Act of 1922 is an annual one it is not impossible that there may be some modification.

1916	May 22d 2h	to Oct. 1d 2h
1917	April 8d 2h	to Sept. 17d 2h
1918	Mar 24d 2h	to Sept. 30d 2h
1919	Mar 30d 2h	to Sept. 29d 2h
1920	Mar 28d 2h	to Oct. 25d 2h
1921	April 3d 2h	to Oct. 3d 2h
1922	Mar 26d 2h	to Oct. 8d 2h
1923	April 2d 2h	to Sept. 16d 2h

The hour being Greenwich Civil in each case. The Act (1922) applies to Great Britain, Northern Ireland, the Channel Islands, and the Isle of Man. (See p. 78, note.)

In the year 1880 it was enacted by statute that the word "time" when it occurred in any legal document relating to Great Britain was to be interpreted unless otherwise specifically stated, as the Mean Time of the Greenwich meridian*. Other nations similarly used the time of their own capital, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now nearly all the countries of the world use as Standard the Time of some meridian which differs from that of Greenwich by a multiple of 15°, and therefore differs from Greenwich Mean Solar Time by an integral number of hours either fast or slow. In a few cases differences including a half hour have been adopted.

The countries in which Standard Time has been adopted according to this scheme are given in the accompanying table. In the United States and Canada five different standard times are used, these large territories being divided into zones approximately 7½° on either side of five central meridians. This arrangement is not strictly adhered to because towns and cities near the dividing lines adopt which of the two times is the more suitable to railway or local requirements. The same plan is followed in Brazil which is divided into three zones and in these the time, 3 hours, 4 hours, or 5 hours slow on Greenwich is adopted as standard respectively.

Fast or slow on
Greenwich Time

12 hrs F	Fiji Islands
11½ " F	New Zealand
11 " F	New Caledonia and dependencies, Caroline Is., east of 154° E, Marshall Is., Nauru
10 " F	Victoria New South Wales Queens land Tasmania New Guinea, Lord Howe Is. Caroline Is., west of 154° E, Marianne Is. (except Guam)
9½ " F	South Australia, Northern Terri- tory of Australia
9 " F	Japan, Corea, Yap (Caroline Is.)
8 " F	Port Arthur, East China, Hong Kong Philippine Is. Formosa and Pescadores Is. North Borneo and Labuan, Macao, Portuguese Timor, West Australia
7 " F	French Indo China, Hainan and Pakhoi Siam Federated Malay States, Straits Settlements
6½ " F	Burma, Andaman & Nicobar Is.

2½ " F	British East Africa, Uganda
2 " F	Turkey, Greece, Bulgaria Rou- mania Russia Egypt Rhodesia and Union of South Africa Por- tuguese East Africa, Cyprus Fin- land Palestine
1 hr F	Sweden, Norway Denmark Cer- many, Luxembourg, Austria, Hungary, Switzerland, Italy, Bosnia, Serbia, Malta, Czechoslo- vakia, Tunis, Nigeria, French Equatorial Africa, Cameroun, Belgian Congo Portuguese West

* Summer Time is the legal time during the period in which its use is ordained. (See p. 77)

Fast or Slow on
Greenwich Time

	Africa, South West Africa, Angola, Libya, Sardinia
Greenwich Time	Great Britain, Ireland, France, Channel Is., Belgium, Spain, Portugal, Faroe Is., Gibraltar, Algeria, Balearic Is., Corsica, St. Thomas and Princes Is., Ivory Coast, Dahomey Morocco Gold Coast (Jan-Aug).
1 hr S	Iceland, Madeira, French Guinea, Senegal, Portuguese Guinea, Li- beria, Sierra Leone, Ascension Is., (Anary Is., Mametania)
2 hrs S	Azores, Cape Verde Is., Fernando and Linnad Is. (Brazil)
3 " S	Eastern Brazil
4 " S	New Brunswick (East), Nova Scotia, Quebec (East), Prince Edward Is., Porto Rico, Trinidad, the Leeward Is., Grenada, Guade- loupe, Tobago, Martinique, St. Lucia, St. Vincent & Pierre Central Brazil, the Argentine Republic, Uruguay, French Guiana, Venezuela
4½ " S	Quebec (Western), Ontario to 82° 30' W., New Brunswick (Western)
5 " S	Eastern Zone of the United States, Jamaica, Bahama Is., Peru, Panama, Western Brazil
6 " S	Central Zones of Canada and United States and Florida, Costa Rica, Salvador, Honduras
7 " S	Mountain Zones of Canada and the United States
8 " S	British Columbia, California, Nevada, Oregon, Washington
9 " S	Yukon, Sitka
10 " S	Low Archipelago, Marquesas Aus- tral and Society Is., Samoa
10½ " S	Hawaiian or Sandwich Is.
11 " S	Tutulla (Samoa)
11½ " S	Apia (Samoa)

In the Tonga or Friendly Islands the time 11½ hours slow on Greenwich is used. The time of Aden 2½ hours fast on Greenwich is standard in Aden and British Somaliland.

The time 2 hours fast on Greenwich is called East European; that 1 hour fast is called Mid European. The time appropriate to Eastern Canada, 4 hours slow on Greenwich, has been called alternatively Maritime, Inter Colonial, and Atlantic Time. The standard times in use in the other four zones of the North American continent are called respectively Eastern, Central, Mountain and Pacific Time.

THE DATE OR CALENDAR LINE

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group on the same side of the line, or for political reasons. The line is indicated by joining up the following eight points—

- (1) Lat 60° S, long 180°
- (2) " 51½° S, long 180°
- (3) " 45° S, long 172° W
- (4) " 15½° S, long 172½° W
- (5) " 5° S, long 180°
- (6) " 48° N, long 180°
- (7) " 51½° N, long 170° E
- (8) " 65° N, long 169° W

Then through the centre of Bering Strait to a point lat 70° N, long 180°

THE AGE OF THE EARTH

VARIOUS estimates have been made of the Age of the Earth, but scientific investigation shows that dates for the "Creation of the World" such as the year 4004 B.C. as adopted by Archbishop Ussher from scriptural chronology, or 3760 B.C. as is said by the Jews, are quite untenable. From the assumption that the sun's heat is sustained solely by contraction of its bulk Lord Kelvin deduced 30,000,000 years as the time during which it has existed but this period is too short to be accepted by geologists as the age of the Earth. The discovery of radioactive substances brought a new factor into consideration, and it has been lately estimated that as the *rhode of life* (Lord Rayleigh, *Brit. Assoc.*, 1911) a moderate multiple of 1,000,000,000 years is the possible and probable duration of the earth's crust.

(GEOLOGICAL PERIODS)

- I **Azoic** ("Without Life") containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.
- II **Eozoic** ("Dawn of Life") characterized by the first appearance of animal life.
- III **Palaozoic** ("Old Life") or PRIMARY containing traces of extinct animal life —
 1. **Cambrian** exemplified in Wales (Cambria), Cumberland, etc. — the earliest group which possesses a connected suite of fossils.
 - ii **Ordovician**, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.
 - iii **Silurian**, named after the ancient British inhabitants (Silures) of S. Wales.
 - iv **Devonian** or **Old Red Sandstone** from the prevalence of the system as a marine formation in Devonshire.
 - v **Carboniferous** including **Coal Measures**, **Millstone Grit** and **Mountain Limestone**.
 - vi **Permian** from the Russian province of **Perm**, where these strata are widespread.
- IV **Mesozoic** ("Middle Life") or SECONDARY with intermediate forms of animal life —
 - i **Triassic**, from the **three** (tri) divisions of the type formation in Germany.
 - ii **Jurassic**, typically displayed in the **Jura Mountains**.
 - iii **Cretaceous** from the **chalky** nature of its representatives where first studied.
- V **Cainozoic** ("New Life") or TERTIARY containing forms of existing life —
 - i **Pocene**, the **dawn** or beginning of **new** forms of life, i.e. existing species.
 - ii **Oligocene**, containing a **few** still existing species.
 - iii **Miocene**, containing a **minority** of existing species — less than 50 per cent.
 - iv **Pliocene**, the fossil remains show a **majority** of still existing species.
- VI **Quaternary** ("Fourth in Order") or POST-TERTIARY
 - i **Pleistocene** or **Glacial**, the **greatest number** of the remains are those of still existing species. Period of last Great Ice Age.
 - ii **Recent** or **Post Glacial**.Definite dates cannot be assigned to most periods but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice sheet (VI 1). Traces of human life are first found in V iv.

THE ANTIQUITY OF MAN

Pithecanthropus erectus (Erect Ape man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubouat at Trimi, Java. These are held to be remains of a creature of Pliocene times (see Geological Period, ante) about midway between the Orang utan and Man in development.

Homo Heidelbergensis (The Heidelberg Man).—A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the earliest Pliocene Period. The difficulty of assigning dates to the Heidelberg or Trimi remains is shown in the conflict of authority as one estimate gives 140,000 years (Rutot) for the whole and another gives 700,000 years (Sturge) for a portion only of the Pliocene Period.

The Pildown Skull.—Discovered in 1912 at Pildown Sussex and ascribed to primitive man (*Eoanthropos*) of early Paleolithic times.

Neanderthal Man.—Remains of a skull and parts of a skeleton found in 1856 in the Neanderthal Ravine near Dusseldorf Rhinish Prussia, and others found at Spy Belgium in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe living about 50,000 years before the Christian Era.

Homo Primigenius.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brux and Brunn, Moravia, and at Gallely Hill, Northfleet Kent (1895) are held to be those of human beings of late Paleolithic times from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION

The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. This may be better understood when it is remembered that while races of Europe, Asia and America had reached the Iron Age of development long before the 18th century A.D. there were races in Oceania still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages. Dates appended to the various stages are necessarily conjectural and they are based on parallel discoveries of remains of extinct or still existing animal life.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence against predatory mammals and for the slaughter of animals for food while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as **Polithic** (or Dawn of the Stone Age) and this period may have extended to 600,000 years B.C. Weapons of a later period known as **Paleolithic** (or Old Stone Age), show gradual developments from the chipped leaf shape forms, known as **Chellean** (from Chelles Seine et Marne France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow heads and spear heads, flat on one side, known as **Mousterian** (from Le Moustier, where many such implements and other remains were found). The Mousterian period is held to have lasted until about 20,000 B.C., when **Neolithic**

(or New Stone Age), weapons polished and less crudely fashioned, were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging the graves being only large enough to contain a body huddled together in a cramped position.

Cultivation of the Soil—(Cultivation is believed to have followed the interment of the dead about 10,000 B.C., and rendered possible the political (*polis* = city) organisation of mankind. There appears to have been a definite centre of Western Civilization at *Nippur* (and elsewhere in Mesopotamia) no later than 6,000 B.C., and in *Egypt*, under the first of the Pharaohs (Menes), about 5,000 B.C. It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere during (or before) that of Mesopotamia and Egypt.

The Bronze Age—Intercommunication of races introduced a knowledge of the malleable properties of copper while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements of cast bronze superseded the more primitive polished stone weapons, while utensils and ornaments of the same alloy replaced those of wood or horn or bone. The designs and decorations of the Bronze Age suggest that this stage of culture was introduced into Europe from Asia and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B.C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

The Iron Age—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, (Chaldea, Assyria and Egypt about 4,000 B.C. in South Eastern Europe about 2,000 B.C. spreading over the rest of Europe from 1,000 B.C. to 100 A.D. by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Palaeolithic Age. With the Iron Age was re-introduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age. The later Iron Age has developed into the *Steel Age* and the transition from iron to steel marks a stage in the progress of civilization at least as great as that from the Bronze to the Iron Age.

EPOCHS AND CALENDARS

Abyssinian—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing, at a again upon the completion of each cycle. Their first year began on 29th August, 284 A.D. (See also "Coptic" post.)

Armenian—The Armenians marked their succession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Assyrian or Babylonian—In the eighth century B.C. the Babylonians commenced a chronology with the era of the founder of their Empire. Their epoch corresponds to 26th February, 747 B.C.

Biblical—The Christians of Western Europe

made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1650) James Ussher, Arch-bishop of Armagh published his *Annals of the Bible*, and Ussher's Notation was afterwards printed in marginal notes to the Authorised Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Christian—The Christian year was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or more rarely A.C. (Ante Christum) and A.D. (Anno Domini), the conventional abbreviation A.D. signifying *Anno Domini*, "in the year of the Lord." The correlative dates of the epoch are the 4th year of the 194th Olympiad the 753rd year from the Foundation of Rome, 3762 A.M. (Jewish Chronology), and the 4714th year of the Julian Period. The date of the Nativity of Christ does not in fact correspond with A.D., but is placed in an earlier year from B.C. 4 to B.C. 9 A.D. (Christian Era) calendar giving the days of the week of any year in the Christian Era, was given on pp. 98-9 of the 1921 issue.

Coptic—In the Coptic Calendar which is used by part of the population of Egypt and Ethiopia the year is made up of 12 months of 30 days each followed in general, by 5 complementary days. Every fourth year is an Intercalary or leap year and in these years there are 6 complementary days. The Intercalary year of the Coptic calendar immediately precedes the leap year of the Julian calendar. The Era is that of Diocletian or the Martyrs the origin of which is fixed at A.D. 284 August 29 (Julian date). A Coptic calendar for the year 1640 and part of 1641 is appended—

Year 1640	A.D. 1923	Year 1640	A.D. 1924
Tut	Sept. 12	Bunah	June 8
Babab	Oct. 12	Ahah	July 8
Hatur	Nov. 11	Masii	August 7
Kihak	Dec. 11	Complement	
	A.D. 1924	11 days	Sept. 6-10
Tubah	Jan. 10		
Amshu	Feb. 9	Tut	Sept. 11
Barmahat	March 10	Babab	Oct. 11
Barmudah	April 9	Hatur	Nov. 10
Bashuns	May 9	Kihak	Dec. 10

Hindu—In addition to the Muhammadan reckoning, there are four eras used in India. The principal astronomical system was the *Kaliyuga Era* which appears to have been adopted in the fourth century A.D. It began on 18 February 3102 B.C. The chronological system of Northern India known as the *Vikram Samvat Era* prevalent in Western India began on 23 February 57 B.C. The year 1923 A.D. is therefore the year 1979 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1923 A.D. is 1844 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhist* reckoned

from the death of Buddha in 543 B C (the actual date being 487 B C) and the epoch of the *Jains* was the death of Vardhamana the founder of their faith in 527 B C

Japanese and Chinese—Japan in 1872 and the Chinese Republic in 1912 adopted the calendar of Western Europe

Jewish—The Jews hold that the world was created at the time of the Autumnal Equinox in the year 3760 B C or year 954 of the Jewish Period, and the epoch of starting point of Jewish Chronology corresponds to October 7 B C 3761. Thus the year 1924 A D is *Annu Mundi* 5684. 5 in the Jewish Calendar. A calendar for 5684-5685 is appended—

(A M 5684 and part of A M 5685)

A M 5684.		A D 1923	
Tishri	1 Rosh Hashanah (New Year)	Sept 11

"	25 Hanuca, Dedication of the Temple	Dec 22	
Tebet	1 New Moon	" 28	

Note—All Jewish Sabbaths and Festivals begin the previous evening at Sunset.

Muhammadian—The Muhammadan Epoch is based on the Hegira or Flight of Muhammad

from Mecca to Medina. The first day of the Era is not the actual day of the flight but is 12th July, 622 A D. This Calendar is purely lunar and the year consists of 12 months each of 29 or of 30 days, making the year either 354 or 355 days in length. It follows that the Muhammadan year begins earlier year by year, compared with the Solar Year by 20 or 22 days. The year 1924 is therefore 1342-3 of the Hegira, a calendar for which year is appended—

Year of Hegira		A D 1923	
1342	Muharram	August 14	
	Saphar	September 13	
	Rabia I	October 12	
	Rabia II	November 11	
	Jomada I	December 10	
	Jomada II	January 9	
	Rajab	February 7	
	Shahab III	March 8	
	Ramadan	April 6	
	Shawwal	May 6	
	Dulkaada	June 4	
	Dulhagga	July 4	
1343	Muharram	August 2	
	Saphar	September 1	
	Rabia I	October 30	
	Rabia II	October 30	
	Jomada I	November 28	
	Jomada II	December 28	

Olympiads—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia in Elis once in four years, the intervening years being the first, second, &c., of the Olympiad which received the name of the victor at the Games. The first recorded Olympiad is that of Coroebus 776 B C

Persian—The chronology of Persia, which is still followed by the Parsees of India dates from the accession of Yazdegerd III to the throne on 10th June 632 A D. The year 1924 is, therefore, 1293 of the Parsees. The New Year begins on 21st March

Roman—Roman historians adopted as an epoch the foundation of Rome which is believed to have happened in the year 753 B C and the ordinal number of the year in Roman reckoning followed by the letters A U C (*Anno Urbis Condite*). The Calendar as we know it is a Roman institution established by Romulus who is said to have used a year of ten months of varying length. This was altered and developed (see pp. 8 and 48) into the famous Julian Calendar which by a slight alteration (see p. 8a) became the Gregorian now in general use. In the Roman (Julian) Calendar the days of the month were not counted onward from the beginning, as with us, but three fixed points were taken and the intervening days were said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends by which name the first of each month was known, (2) the Nones (*nine* days before the Ides the first and last being counted) which fell on the seventh day of the month in March, May, July, and October and on the fifth day in each of the other months and (3) the Ides, which fell either on the 13th or 15th, and thus divided the month nearly equally. The Latin equivalent of Dec. 31, for example, was *Pridie Kalendas Januariæ*, and the day before that *ante diem tertium Kalendas*

CHRONOLOGICAL TERMS

The Day, Week and Month—Measurements of time are based on the times taken by the earth to rotate on its axis by the moon to revolve round the earth and by the earth to revolve round the sun. From these which are not commensurable, certain average or mean intervals have been adopted for ordinary use. Of these the first is the *Day*, which begins at midnight and is divided into 24 hours of 60 minutes each of 60 seconds. The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight except when the *Twenty-four Hours* reckoning is employed. The 24 hour reckoning ignores A.M. and P.M. and the hours are numbered 0 to 23 from midnight to midnight.

For the *Astronomical Day*, see p. 77.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the length of the different months vary.

The *Equinoctial or Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox which is 365.2422 mean days. The *Calendar Year* consists of 365 days but every year the date of which is divisible by 4 without remainder is *Leap Year* and consists of 366 days except the last year of each century that is not divisible by 400 without remainder (e.g. the years 1800 and 1900 had only 365 days).

Old and New Style—In the Julian Calendar the centennial years were all leap years and for this reason towards the close of the 16th century there was a difference of 10 days between the tropical and calendar years (see above). In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th and that only every fourth (instead of every) end century year should be a leap year. This change was adopted by Italy, France, Spain and Portugal in 1582, by Prussia the German Roman Catholic States, Switzerland, Holland and Flanders on Jan. 1, 1583, Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days 1700-1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This *Gregorian Calendar* was adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1917, and by Yugoslavia and Rumania in 1919. The difference between the Old and New Styles since 1900 is 13 days (11 days after 1700, 12 days after 1800 and 13 days after 1900).

New Year's Day—The Civil year in the British Dominions (exclusive of Scotland) commenced with March 25, Lady Day or 'The Feast of the Annunciation' until 1751. But on and from 1752 the civil year has commenced with Jan. 1. The Old Style reckoning is still maintained to some extent by the British Treasury and certain dividends are payable at the Bank of England on the Old Style Quarter Days while the 'Financial Year' is still reckoned as commencing on 'Old Lady Day' April 5. Scotland in 1600 changed New Year's Day from Mar. 25 to Jan. 1. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1522, Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1613, Russia 1719, Tuscany 1752.

Golden Number—In the year 432 B.C. Meton, an Athenian astronomer found that 235 Lunations are very nearly though not exactly, equal in duration to 19 Solar Years. This discovery was held to be of so great importance that it was ordered to be engraved in letters of gold on a marble tablet which was placed in one of the temples at Athens. The cycle of nineteen years is called the *Metonic Lunar Cycle* and the number indicating the position of any year in this cycle is called the *Golden Number of the Year*.

Easter Day is the first Sunday after the full moon which happens upon or next after the 21st day of March, and if the full moon happens upon a Sunday, Easter day is the Sunday after. This definition which is copied from an Act of Parliament (24 Geo. II, cap. 23 p. 751) requires further explanation, and in the action of the preamble to the Act dealing with Easter it speaks of 'tables and rules for finding the times of the Full Moon on which this dependeth that have been prepared.' These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real moon of the heavens but a hypothetical Moon on whose phases the date of Easter depends. The lunations of the 'Calendar Moon' consist of thirty or twenty nine days alternately with some modifications and the artificial Moon is accounted to be 'full on the fourteenth day, i.e., thirteen days after the New Moon, in order to be consistent with an early Jewish practice and the tables are arranged so that there is close agreement between the times of Full Moon of the Calendar and of the real Full Moon, but the difference though small, sometimes is in the year 1923, causes an apparent uncertainty. The Full Moon of the Calendar on which Easter depends is called the *Paschal Full Moon*.

A reform of the calendar that would cause Easter day to fall on a fixed date has frequently been proposed. A committee of the International Astronomical Union comprising members of the Roman Church which met at Rome in 1922 and another under the auspices of the League of Nations at Geneva in August, 1923 to discuss this reform, but the change is still in abeyance.

Epect—The age of the Moon at the commencement of the year thus indicating, the difference between the solar and lunar cycles.

Solar Cycle—A period of twenty eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period—"A period of 7980 Julian years proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology consisting of the product of the number of years in the solar and lunar cycles and the cycle of the Indiction ($28 \times 19 \times 15$). —*New English Dictionary*

Roman Indiction—A period of fifteen years instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the first seven letters of the alphabet, A-G which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A. If the second, B, the third C and so on. Leap year requires two letters the first for Jan. 1-Feb. 29, the second from March 1-Dec. 31.

† At the bottom.

† Reconstructed 1914

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926½ English miles, and at the Poles 7,900 English miles. The *Equatorial Circumference* is 24,901.8 English miles, divided into 360 Degrees of Longitude, each of 69.17 English (or 60 Geographical) miles, these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION

Continent	Area in Square Miles	Estimated Population
Europe	3 750 000	475 000 000
Asia	17 000 000	1,013 000 000
Africa	11 500 000	143 000 000
North America	8 000 000	146 000 000
South America	6 800 000	64 000 000
Oceania	3 450 000	8 500 000
Polar Regions	5 000 000	
	55 500 000	1 849 500 000

The British Dominions extend over the largest area (14,220,000 sq. miles). Russia is the second largest country (8,000,000 sq. miles). France is third, with 4,336,000 sq. miles. China extends over 4,300,000 sq. miles. The United States with its Insular Jurisdiction, etc. covers 3,750,000 sq. miles. and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND†

The Races of Mankind are divisible according to Stock or, less scientifically according to Colour. The Dominant Colour is Yellow. The numerical order being: (1) Yellow (2) White, (3) Black (4) Brown (5) Red. The main Divisions of the Races are as follows—

Division	Area	Estimated Number
Mongolian	Asia	680 000 000
Caucasian	Europe & Orient	725 000 000
Negro	Africa	210 000 000
Semitic	North Africa	100 000 000
Malayan	Oceania, etc.	104 500 000
Red Indian, etc.	America	30 000 000
		1 849 500 000

* The Earth is a *Sphere* with a Northern and Southern Hemisphere. The Ocean surface is the *Hydrosphere*, and the gaseous envelope the *Atmosphere* of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology* with the measurement of its surface *Geodesy*, the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography* of the lakes *Limnology* and of the mountains *Ornography* of the Races of Mankind *Ethnology* of their location *Ethnogeography* of extinct organic life *Paleontology* and of existing life *Biology*.

An airship with a constant speed of 100 miles an hour would take nearly 10 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,901.8 miles in 24 hours). The Earth's velocity in its orbit round the Sun is about 66,000 miles an hour (594,000,000 miles in 365 days 6 hours 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000 a total which will be reached about A.D. 2200 at the present rate of increase.

THE LARGEST CITIES

(500 000 inhabitants)

LONDON (Greater), England (1921)	7,476,168
New York, U.S.A. (1920)	5,620,048
BREITEN, Prussia (1910)	4,000,000
PARIS, France (1921)	3,000,000
Chicago U.S.A. (1920)	2,701,705
YOKO, Japan (1917)	2,173,000
VIENNA, Austria (1914)	2,000,000
Philadelphia, U.S.A. (1920)	1,823,779
Buenos Aires, Argentina (1918)	1,721,000
Osaka, Japan (1917)	1,633,000
PEKING, China (1917)	1,300,000
Calcutta, India (1921)	1,263,222
Tientsin, China	1,250,000
Bombay, India (1921)	1,172,953
RIO DE JANEIRO, Brazil (1910)	1,160,000
Glasgow, Scotland (1921)	1,034,069
Constantinople, Turkey (1912)	1,000,000
Detroit U.S.A. (1920)	993,678
Hamburg, Germany (1910)	931,000
Sydney, New South Wales (1911)	926,400
BUDAPEST, Hungary (1910)	926,000
Birmingham, England (1921)	919,438
WARSAW, Poland (1913)	909,000
Liverpool, England (1921)	803,118
Cairo, Egypt (1917)	800,000
Cleveland, U.S.A. (1920)	776,836
St. Louis, U.S.A. (1920)	772,897
MADRID, Spain (1920)	751,000
MOSCOW, Russia (1913)	750,000
Boston U.S.A. (1920)	748,060
Baltimore, U.S.A. (1920)	733,826
Manchester, England (1921)	730,551
MELBOURNE, Victoria (1917)	708,000
Naples, Italy (1915)	698,000
BRISSLES, Belgium (1920)	685,000
PRAGUE, Czechoslovakia (1922)	680,000
COPENHAGEN, Denmark (1922)	670,000
Milan, Italy (1915)	663,000
ROME, Italy (1915)	650,000
Amsterdam, Netherlands (1918)	644,000
Shanghai (China)	639,000
Kobe, Japan (1922)	637,000
BANCKOK, Siam (1909)	630,000
Montreal (Canada) (1921)	618,506
Munich, Bavaria (1910)	596,000
KIOTO, Japan (1922)	591,000
Leipzig, Saxony (1910)	590,000
Pittsburgh U.S.A. (1920)	588,343
Barcelona, Spain (1910)	587,000
Los Angeles, U.S.A. (1920)	576,673
Marseilles, France (1911)	551,000
DRESDEN, Saxony (1910)	548,000
LYONS, France (1911)	544,000
Madras, India (1921)	523,951
Toronto, Canada (1921)	521,893
Cologne, Prussia (1910)	517,000
Breslau, Prussia (1910)	512,000
Buffalo, U.S.A. (1920)	506,775
San Francisco U.S.A. (1920)	506,676
Rotterdam, Netherlands (1918)	501,221
LISBON, Portugal (1920)	500,000

OCEAN AREAS AND DEPTHS

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas), but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each—

Name	Area of Basin (sq miles)	Greatest Depth (feet)
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200
Malay	3,137,000	Kei Trench, 21,342
Central American	1,770,170	Caribbean, 20,568
Mediterranean	1,145,000	Pola Deep, 12,276
Behring	878,000	Buldir Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	about 10,500
Hudson Bay	472,000	about 1,500
Japan	405,000	about 10,200
Andaman	305,000	about 11,000
North Sea	221,000	Skaggerak, 1,998
Red Sea	178,000	20° N., 7,254
Baltic	158,000	about 12,000

THE HIGHEST MOUNTAINS

The following list contains the principal peaks of such ranges as the Himalayas and the Andes, and the highest mountains in other ranges

Name	Range	Height in feet
Everest	Himalayas	29,002
Godwin Austen (K 2)	"	28,250
Kanchanganga I	"	28,146
" II	"	27,803
Makalu	"	27,790
Illampu (Sorata)	Andes	25,248
Illimani	"	24,633
Aconcagua	"	23,025
*Sahama	"	21,480
Chimborazo	"	20,498
Lullalluco	"	20,244
McKinley	Alaska	20,300
Kilima Njaro	East Africa	19,720
*Cotopaxi	Andes	19,612
Mount Logan	Rockies	19,539
*Mount Elias	"	19,500
Elburg	Caucasus	18,526
Demavend	"	18,464
Tollma	Cordilleras	18,320
Charles Louis	New Guinea	18,000
*Popocatepetl	Mexico	17,540
Citlatpetl	"	17,360
*Sangay	Ecuador	17,124
Koestelau	Caucasus	17,096
Kenia	Kenya	17,040
Ararat	Armenia	16,916
Ruvenzori	Uganda	16,800
Kazbek	Caucasus	16,546
Mont Blanc	Alps	15,781

* Volcanoes. In addition to those marked Vesuvius, Etna and Stromboli in Europe; Erebus and Terror in the Antarctic; Hecia and Shapier Joku in Iceland; Mauna Loa, Kea and Hualalai in Hawaii; Tomboro in Japan; and Le Souffrier and La Pelée in the West Indies.

THE LARGEST ISLANDS

Name of Island	Ocean	Area in Sq. Miles
Greenland (Danish)	Arctic	827,300
New Guinea (Brit. Neth.)	Pacific	330,000
Borneo (Brit. Netherlands)	"	286,000
Baffin Land (British)	Arctic	236,000
Madagascar (French)	Indian	228,000
Sumatra (Netherlands)	"	160,000
Great Britain	Atlantic	88,603
Honshu (Japan)	Pacific	87,500
Celbes (Netherlands)	Indian	72,000
Prince Albert, &c (British)	Arctic	60,000
South Island, N Z (British)	Pacific	58,500
Java (Netherlands)	Indian	48,400
North Island, N Z (British)	Pacific	44,500
Cuba (Independent)	Atlantic	44,000
Iuzon (U S A)	Pacific	41,000
Newfoundland (British)	Atlantic	40,200
Iceland (Danish)	"	40,000
Ellesmere (British)	Arctic	40,000
Mindanao (U S A)	Pacific	37,000
Hokkaido (Japan)	"	36,500
Ireland	Atlantic	34,600
Novaya Zemlya (Russian)	Arctic	30,100
Sakhalin (Russia Japan, &c)	Pacific	29,100
Haiti (Independent)	Atlantic	28,200
Tasmania (British)	Pacific	26,215
Ceylon (British)	Indian	25,400
Banks (British)	Arctic	25,000
North Devon (British)	"	24,000
Vancouver (British)	Pacific	20,000
Melville Land (British)	Arctic	20,000
La Tierra del Fuego (Argentine)	Atlantic	18,500
Southampton (British)	Arctic	17,800
West Spitzbergen (Norway)	"	15,260
Prince of Wales (British)	"	15,000
Formosa (Japanese)	Pacific	13,500
North Somerset (British)	Arctic	12,000
Sicily (Italian)	Medit.	10,000

THE LONGEST RIVERS

River	Outflow	Length in Miles
Amazon	Atlantic	4,000
Nile	Mediterranean	3,600
Yangtse	North Pacific	3,400
Yenisei	Arctic Sea	3,300
Mississippi	Gulf of Mexico	3,160
Missouri	Mississippi River	3,000
Congo	Atlantic	3,000
Leua	Arctic Sea	3,000
Niger	Gulf of Guinea	3,000
Obi	Arctic Sea	2,700
Hoangho	North Pacific	2,600
Amur	"	2,500
Paraná	Atlantic	2,450
Volga	Caspian Sea	2,400
MacKenzie	Beaufort Sea	2,300
La Plata	South Atlantic	2,300
Yukon	Behring Sea	2,000
Arkansas	Mississippi	2,000
Madeira	Amazon	2,000
St. Lawrence	Gulf of St. Lawrence	1,800
Rio del Norte	Gulf of Mexico	1,800
Sao Francisco	Atlantic	1,800
Danube	Black Sea	1,725
Euphrates	Persian Gulf	1,700
Indus	Arabian Sea	1,700
Brahmaputra	Bay of Bengal	1,680
Zambezi	Mozambique	1,600
Ganges	Bay of Bengal	1,500

† The most famous river falls are Niagara between the Province of Ontario and New York State, on the Niagara River; the Victoria Falls on the Zambesi River; Iguazu, between Argentina and Brazil; and the series of falls in the Yosemite Valley in California.

THE LARGEST SHIPS

Ship	Tons	Dimensions (ft.)
Leviathan (a)	59,957	907 X 100 X 58

THE SEVEN WONDERS

The Seven Wonders of the World are generally enumerated as follows —

- * The Pyramids
- * The Hanging Gardens of Babylon
- * The Tomb of Mausolus
- * The Temple of Diana at Ephesus
- * The Colossus of Rhodes
- * The Statue of Jupiter by Phidias
- * The Pharos (lighthouse) of Alexandria

* The Pyramids may be united from (airo) The Ephesus Room at the British Museum Bloomsbury contains the remains of the Temple of Artemis (Diana) at Ephesus (the Temple of Diana of the Phrygians of Asia) (ix 28) the Mausoleum Room at the British Museum contains the remains of the tomb built at Halicarnassus for Mausolus in the 4th century B.C.

LANGUAGES OF THE WORLD

Of the 1,849,500,000 inhabitants of the globe about 600,000,000 speak the principal European tongues of which English has the largest number of adherents through the predominance of that tongue in the United States of America and in the British Dominions

Language	People
English	160,000,000
German	100,000,000
Russian	100,000,000
French	70,000,000
Spanish	50,000,000
Italian	50,000,000
Portuguese	25,000,000

Venezuela	Juan Vicente Gomez <i>President</i>		May 3 1919
Yemen	Yahya Muhammad Hamid ed Din, <i>Imam</i>		
Yugo Slavia	Alexander II, <i>King</i>	Dec 17, 1888	Aug 16, 1921

The League of Nations.

ONE of the results of the Great War was the formation of a League of Nations with a covenant and a Charter of XXVI Articles.

The High Contracting Parties agreed to the Covenant in order to promote International Co-operation and to achieve International Peace and Security, by the acceptance of obligations not to resort to War.

'by the prescription of open just and honourable relations between Nations

by the firm establishment of the understandings of International Law as the actual rule of conduct among Governments

and by the maintenance of justice and a scrupulous regard for all Treaty Obligations in the dealings of Organized Peoples with one another.

The territorial integrity and existing political independence of all members of the League is guaranteed by Article X of the Covenant.

In case of any dispute between members likely to lead to a rupture, they will submit the matter to arbitration or enquiry and agree not to resort to war until three months after the award by the arbitrator or the report by the Council such award to be made within a reasonable time and such report to be made within six months of the submission of the matter in dispute.

Any member resorting to war in disregard of these rules shall be deemed to have committed an act of war against all the remaining members of the League, who undertake to subject the aggressor to the severance of all intercourse and trade or financial relations, while the Council of the League shall recommend to the Governments concerned what effective force shall be contributed by each to protect the covenants of the League.

In the event of a dispute between a member of the League and a State which is not a member (or between States that are not members) invitation shall be made to the State or States that are not members to accept membership with its privileges and obligations. If the invitation be refused and the State that is not a member resort to war against a member of the League, such State shall be deemed to have made war on every member of the League and shall be so dealt with. If the invitation be refused by States that are not members the Council shall take such steps as may be possible to avert hostilities and to settle the dispute.

Article XXIII provides for securing fair and humane conditions of labour for men, women and children in the countries of members, and in those in which members have commercial and industrial relations, and provides for the just treatment of natives, for the suppression of the "White Slave" traffic, for the supervision of the traffic in opium and dangerous drugs, and in arms and ammunition for the freedom of communications and trade between members and for the prevention and control of disease.

The formation of the League was very largely the work of Woodrow Wilson, President of the United States of America 1913-21 but his action in committing the United States to participation in the League was repudiated by the Foreign Relations Committee of the Senate of the U.S. and was not endorsed by the electors in the Presidential Election of 1920.

The Council of the League consists of representatives of the British Dominions, France, Italy and Japan together with representatives of four other members of the League selected by the

Assembly of Representatives of the members of the League. Any member of the League not represented on the Council shall be invited to send a representative to sit as a member of the Council during the consideration of matters specially affecting the interests of that member of the League.

The original members of the League were the Signatories of the Treaty of Peace at Versailles on behalf of the Allies June 28, 1919 such signatories being indicated by an asterisk (*) in the following list but the United States, Ecuador and The Hejaz (whose representatives signed the Treaty) did not send delegates to Geneva.

The following Nations were represented at the First Assembly of the League of Nations at Geneva Dec. 1920

Argentina	*Ghana	*Poland
*Australia	*Haiti	Portugal
*Belgium	*Honduras	*Rumania
Bolivia	*India	Salvador
*Brazil	*Italy	*Siam
*Canada	*Japan	Spain
Chile	*Iberia	Sweden
*China	Netherlands	Switzerland
*Colombia	*New Zealand	*Union of South
*Cuba	*Nicaragua	Africa
*Czechoslovakia	Norway	*United Kingdom
Denmark	Panama	dom
*France	Paraguay	Luxemburg
*Greece	Peru	Venezuela
	*Slovenia	*Yugo Slavia

The following Nations have since been admitted -

Albania	Esthonia	Irish Free State
Austria	Finland	Lithuania
Belgium	Germany	Luxembourg
Costa Rica	Hungary	

Any fully self-governing State, Dominion or Colony not named as an Original Member, may become a member of the League if its admission is agreed to by two thirds of the Assembly.

Any member of the League may, after two years notice of its intention to do so, withdraw from the League, provided that all its international obligations, and all its obligations under the Covenant shall have been fulfilled at the time of its withdrawal.

In May 1923 the League had a membership of 52 States. The budget of the League estimates the expenditure for 1922 at 20,873,945 Gold Francs (at par of exchange £222 730) 100 overable from the Nations in agreed proportions.

Members of the Council: Paul Hymans (Belgium), Gaston de (Cuba, Brazil), Wellington Koo (China), Léon Bourgeois (France), The Earl of Balfour (Great Britain), The Marquis Imperiali (Italy), Viscount K. Ishii (Japan), Quiñones de Leou (Spain).

Secretary General: Hon. Sir Eric Drummond K.C.M.G. C.B. (and entertainment allowance £6,000) £4,000

Under-Secretaries General: Dr. Mazo Nitrobo, Prof. Attilio

Financial Director: Sir Herbert B. Ames, 11 D Dir., International Lab. Office, Clifton Robins London Office, 26, Buckingham Gate S.W. 1

LEAGUE OF NATIONS UNION, 15 Grosvenor Crescent, S.W. 1 - President, Viscount Grey of Fallodon, K.G. Chairman of Executive Committee Prof. Gilbert Murray, General Sec., J. C. Maxwell Garnett

ANNUITIES TO THE ROYAL FAMILY

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List*, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII amounted to £470,000 in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14 1910 reported on July 7 and made recommendations, which were adopted by the House of Commons. These recommendations as modified by subsequent events are as under —

Their Majesties Privy Purse	£110,000	Queen Alexandra	£70,000
Salaries of Household	125,800	Duke of York	25,000
Expenses of Household	193,000	Princess Louise (Duchess of Argyll)	6,000
Works	20,000	Duke of Connaught	25,000
Royal Bounty	13,800	Princess Beatrice	6,000
Unappropriated	8,000	King Edward VII's Daughters	18,000
		His Majesty's Younger Children	13,666
	£470,000		£163,666

The Peerage.

IN a broad sense this heading is commonly taken as identical with that of the House of Lords, although there are close upon 130 holders of titles of long standing nobility who are not members of the Upper House of Parliament their peerages being those of Scotland or Ireland only. But there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the House of Lords these titles being in a majority of instances though very far from all inferior to those by which they are generally known. The full details as to each are given under his leading title and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed a double index will be found in 'WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE'

Contractions—S. or I appended to the date of creation denotes a *Scottish* or *Irish* title, the further addition of a * implies that the Peer in question holds also an Imperial title which is specified (after the name) by its more definite description as *Engl Brit* or *U K*. When both titles are alike as in the case of Argyll, this stat is appended to the conjoined date below and it then denotes that such date is that of the Imperial creation. A † appended to S or I implies that the Peer is an elected Representative to the House of Lords. For the mark ° see heading to Marquesses, b, signifies born s succeeded m, married w widower or widow d divorced M, minor

COMPLETE LIST OF THE PEERS

ROYAL DUKES (3)—*Style* His Royal Highness the Duke of— *Addressed as* His, or more formally, May it please your Royal Highness

* Precedency in Great Britain

<p>The Sovereign The Prince of Wales Younger Sons of the Sovereign Grandsons of the Sovereign. Sovereign's Brothers Sovereign's Sisters Sovereign's Nephews Ambassadors Archbishop of Canterbury Lord High Chancellor Archbishop of York Prime Minister Lord President of the Council Speaker of the House of Commons Lord Privy Seal (if of Baroual rank) Five following State Officers if Dukes (a) Lord Great Chamberlain (on duty) (b) Earl Marshal (c) Lord Steward (d) Lord Chamberlain (e) The Master of the Horse Dukes, according to their Patents of Creation 1. Of England, 4. Of Scotland, 3. Of Great Britain, 4. Of Ireland Those created since the Union Eldest sons of Dukes of Blood Royal Five above State Officers if Marquesses Marquesses in same order as Dukes Dukes eldest Sons. Five above State Officers if Earls. Earls, in same order as Dukes. Younger sons of Dukes of Blood Royal Marquesses eldest Sons. Dukes younger Sons. Five above State Officers if Viscounts Viscounts, in same order as Dukes. Earls eldest Sons. Marquesses younger Sons. Bishops of London Durham and Winchester All other English Bishops, according to their seniority of Consecration Five above State Officers if Barons.</p>	<p>Secretaries of State if of the degree of a Baron Barons in same order as Dukes. Treasurer of H M s Household Comptroller of H M s Household Chamberlains of the House hold. Secretaries of State under the degree of Baron Viscounts eldest Sons. Earls younger Sons Barons eldest Sons Knights of the order if Commoners Privy Councillors if of no higher rank Chancellors of the Exchequer Chancellor of the Duchy of Lancaster Lord Chief Justice of England Master of the Rolls The Lords Justices of Appeal and President of the Probate Court Judges of the High Court Viscounts only younger Sons Barons younger Sons. Sons of Life Peers. Baronets of either Kingdom according to date of Patents Knights Grand Cross of the Bath Knights Commanders of the above Orders Knights Bachelor Judges of County Courts and Judges of the Mayors and City of London Court Sergeants at law Masters in Lunacy Eldest Sons of younger Sons of Peers Baronets eldest Sons Eldest Sons of knights in the same order as their fathers.</p>	<p>Younger Sons of the younger Sons of Peers. Baronets younger Sons. Younger Sons of Knights in the same order as their fathers Naval Military and other Esquires by Office Women take the same rank as their husbands or as their eldest brothers, but the daughter of a Peer marrying a commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers and before their younger brothers wives Daughters of knights of the degree of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron descends to the rank of Baronesse Daughters of only younger Sons married to commoners retain their rank and take precedence of the Baroness Mostly official rank on the husband's part does not give any similar precedence to the wife. Dames Grand Cross of the British Empire rank after wives of Baronets and before wives of knights Grants after the latter coming a male Knight before the wives of Knights Commanders. LOCAL PRECEDENCE — No written code of county or city order of precedence has been promulgated but naturally the Lord Mayor of London Lieutenant stands first and so on till the Sheriff in London and other Corporations the Mayor stands first after him the Aldermen Sheriffs, Churchwardens, High Sheriffs of Oxford and Cambridge High Sheriffs take precedence of the Vice Chancellor.</p>

The Order was divided into *Military* and *Civil* divisions in Dec. 1918

THE KNIGHTS BACHELOR

The Knights Bachelor do not constitute a Royal Order but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor instituted by James I. in the 17th century lapsed and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1557 and obtaining the uniform registration of every created Knight. An annual *Knights* is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are—**Principal** Sir William Bull Bt., **Pr. Principal** Commander Sir Trevor Dawson, Bart. **Hon. Registrar**, Sir Park Goff **Pr. Clerk** Hubert Wheelbourn **Registry and Library** The College of Arms, Queen Victoria Street, E.C. 4.

ORDER OF THE COMPANIONS OF HONOUR (1917)—O.H.

Ribbon Carmine with Gold Edges.

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 1st Class of the Order of the British Empire *Le, Kts* Grand Cross (Mil. and Civ. Div.) The number of awards is limited and is open to both sexes.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon Red, with Blue Edges

Bestowed in recognition of especial services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902 enlarged 1912)—I.S.O.

Ribbon Crimson with Blue Centre

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service and consists of the Sovereign the Prince of Wales and companions (not exclusively male) to a number not exceeding 200 of whom 200 may belong to the Home Services 200 to the Indian (see European and see Indian) and 200 to the services of Dominions Colonies and Protectorates

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Ribbon White Moiré

Instituted in 1862 and enlarged in 1864 1865 and 1880 but no fresh conferments are now made

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1876 *Ribbon*, Light Blue, with White Edges

Knights Grand Cross, Knights Grand Commanders, 739 and Knights Commanders

Welch Sovereigns and Princes

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince in fulfilment of a promise that they should have a Prince who 'could not speak a word of English' and should be native born. This son who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

INDEPENDENT PRINCES A.D. 840 to 1282

Roderick the Great
Anarawd, son of Roderick
Howel Dda, the Good
Jefan and Jago
Howel ap Jefan the Bad
Cadwallon, his brother

OTHER DECORATIONS AND MEDALS

The Distinguished Service Cross.—1914.—D.S.C.—In substitution for the Conspicuous Service Cross, 1901, is designed for bestowal on all officers of the R.N. below the rank of Lieutenant Commander and on Warrant Officers.

The Military Cross.—1903.—M.C.—Awarded to Captains, Lieutenants, and 1st class Warrant Officers in the Army and Indian and Colonial Forces.

The Distinguished Flying Cross.—1917.—D.F.C.—Designed for bestowal upon Officers and Warrant Officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

The Air Force Cross.—1908.—A.F.C.—Instituted as preceding but for acts of courage or devotion to duty when flying although not in active operations against the enemy.

The Military Medal.—1906.—M.M.—Awarded to non-commissioned officers and men for individual or associated acts of bravery in the field. In exceptional circumstances the Medal may be awarded to women of all nations.

The Distinguished Service Medal.—1914.—D.S.M.—Is designed for chief petty officers, petty officers, men and boys of all branches of the R.N. to non-commissioned officers and men of the R.M.A. and to all other persons holding corresponding positions in His Majesty's Service abroad, for distinguished conduct in war.

The Distinguished Flying Medal.—1918.—D.F.M.—and the **Air Force Medal.—A.F.M.**—For warrant and non-commissioned officers and men for equivalent services as the D.F.C. and A.F.C.

The Conspicuous Gallantry Medal.—C.G.M.—Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal.—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

The Volunteer Officers' Decoration.—V.D.—Was an honour for rewarding the meritorious services of officers of the Force in question who must have been in commission and have served twenty years.

The Territorial Decoration.—T.D.—Established in 1902, is restricted to commissioned officers of twenty years' good service in the Territorial Army. Similarly a Territorial Long Service Medal has been substituted for that formerly awarded to Volunteers.

The Royal Red Cross.—R.R.C.—For ladies founded 1883, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

The Order of Mercy.—Both sexes was established in 1899 in connexion with the League of Mercy, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London &c.

The Indian Order of Merit.—Instituted in 1891, as a reward for personal bravery to Indian officers and men.

The Kaiser's Hind Medal.—Was founded in 1902 and is a reward for any person, of either sex who shall have rendered useful service in or for India.

The Albert Medal.—A.M.—Dates from 1866 with extensions in 1867 and 1877 and is a recognition of acts of gallantry performed by any person whatever—'For Gallantry in Saving Life at Sea or on Land'.

The King's Police Medal.—Instituted in 1907 as a reward only for acts of exceptional courage and skill or conspicuous devotion to duty to officers and men of any recognised Police Force or organised Fire Brigade in the United Kingdom, India, and His Majesty's Dominions beyond the Seas. The number of medals awarded in any one year shall not exceed 200.

The Royal Naval Reserve and Royal Naval Volunteer Reserve Decorations.—R.N.R. and R.N.V.R.—Instituted in 1902 to reward good and long service by officers and men of these Services.

THE ELECTORATE.

Owing to the reduction in the Irish membership the electorate is smaller than at the General Election of 1918 by nearly 2,000,000. The following table shows the growth in the electorate through the extensions of the franchise under various Acts of Reform.

1832	(Men only)	1,000,000
1867		2,500,000
1885		5,000,000
1918	(Men and Women)	21,392,000

The latest official return for the United Kingdom (1920) showed the number of voters as under—

England and Wales	17,465,638
Scotland	2,306,996
Ireland	2,002,949

Total 21,775,583

A more recent return for England and Wales puts the number of voters at 17,657,723. The average population per member is—

England (Counties and Boroughs)	71,005
Wales (Counties and Boroughs)	72,099
England and Wales together	71,078
Scotland	66,862
Ireland	43,000

Votes recorded 1922—Over 82 per cent of the Electors and Electresses recorded their votes in the constituencies where the election was contested. The electorate in such constituencies numbered (approximately) 17,200,000 and nearly 14,110,000 votes were recorded.

LABOUR AND PARLIAMENT

Strength of the Labour Party in Parliament from the days when its representatives first made their appearance in the House of Commons—

1892	15	1910 (January)	40
1895	12	1910 (December)	42
1900	11	1918	62
1906	52	1922	127

PARLIAMENTARY MAJORITIES

The Majorities of recent Governments are shown below—

Year	Majorities
1886	Unionist 114
1892	Liberal 40
1895	Unionist 152
1900	Unionist 134
1906	Liberal 356
1910 (Jan)	Liberal 124
1910 (Dec)	Liberal 126
1918	Coalition 263
1922	Conservative 79

After the General Election of Dec. 1918 the state of parties was declared to be as follows—

COALITION	
Unionists	338
Liberals	137
National Democratic Party	485
	10

NON COALITION PARTIES

Labour	59
Unionists	48
Liberals	26
National Party	222
Independents, &c	7
Sinn Féiners	73
Irish Nationalists	7

Total returned 707

COALITION MAJORITY 263

The General Election of Nov. 15, 1922 resulted as under—

GOVERNMENT	
Conservative	347
OPPOSITION	

Labour	142
National Liberal	59
Liberal	59
Independent	5
Nationalist	2
Sinn Féin	1

Total returned 615

CONSERVATIVE MAJORITY 79

THE UNION JACK

FLYING THE UNION JACK—Although there is no definite list of days on which the Union Jack should be hoisted, the rules suggested by the London County Council appear to meet with general approval. In schools administered by the London County Council, where flagstaffs are provided, the Union Jack is flown from 8 a.m. until sunset on the following days—

April 23	—St. George's Day
May 6	—Anniversary of the King's Accession
May 24	—Empire Day
May 26	—The Queen's birthday
June 3	—The King's Birthday
June 4	—Do. Official celebration
June 23	—The Prince of Wales's birthday
October 21	—Anniversary of Trafalgar
December 1	—Birthday of Queen Alexandra.

And on the occasion of the opening and closing of Parliament by the King.

PAYMENT OF MEMBERS

The payments to Members of the Legislatures of various countries are shown in the following table—

Australia	£1,000 per annum *†
Canada	\$4,000 per session *†
France	27,000 francs per annum *†
Germany	12,000 marks per annum *
Great Britain	£400 per annum.
Irish Free State	£350 per annum *
Italy	15,000 lire per annum (Lower House) *
New Zealand	Upper House £350, Lower House £500 per annum *
South Africa	£400 per annum *†
Sweden	3,500 kroner per annum *
United States	\$7,500 per annum *

* With allowances for travelling in addition.
† Compulsory contributions to Widows and Orphans Fund.
‡ Deductions for non attendance.

Premiers, Principal Secretaries,

Premiers and Secretaries of State—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet useless and irksome and allowed the appearance of a Prime Minister for his example has been so consistently followed as to have become a settled custom. In 1702 the office of Prime Minister was officially recognised. The first men

tion of a King's Secretary of State is under Henry III. In 1233, owing to press of work in France two Secretaries were appointed and until 1792 two seems to have been the normal number. From 1688 to 1720 one of the two dealt with matters pertaining to the Northern States of Europe the other with matters pertaining to the Southern States. Home Irish and Colonial business in

May 22, 1919	S. Baldwin	N. Chamberlain	W. C. Bridgeman	Curzon	Derby	Devonshire

and other Officers of State.

163

As the former became Foreign and the latter Home Secretary still retaining Irish and Colonial business The Home Secretary was also responsible for the Secretary at War who though not a Secretary of State, directed the movements payment and civil control of the Army. In 1904 a Secretary of State for War was appointed to manage all military business and in 1905

he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1868 the Secretary of State for India was appointed and in 1908 the Royal Air Force was constituted, with a Secretary of State as President of the Air Council.

[illegible]

Mr. Bonar Law's Ministry.

(as reconstructed Dec 1922-May, 1923)

Tiverton—L	gain from C
Morpeth—Lab	No change
Central Leeds—C	No change
Rutland—C	No change
Yeovil—C	No change
The Government, it will be seen, have lost four seats—two to Labour and two to the Liberals and have gained one from the Liberals. The Ministerial majority in the House of Commons which was 79 over all parties after the General Election, is now 73	

The New House of Commons

THE fourth Parliament of King George V and the first Parliament of Great Britain and Northern Ireland (the successor to the 31st Parliament of the United Kingdom) was elected on November 15, 1922, and met on November 20, 1922. The General Election had returned 347 Conservatives, 142 Labour, 60 Liberals, 58 National Liberals, 2 Nationalists, 1 Sinn Fein, and 5 Independents, distributed as shown in the following table —

	DISTRIBUTION OF MEMBERS				PARTY STRENGTH (NOV 20 1922)		
	Counties.	Boroughs	Universities.	Total Members	Government	Opposition	Majority
England	230	255	7	492	315	177	+ 138
Wales	24	11	1	36	6	30	- 24
Scotland	38	33	3	74	15	59	- 44

SECOND SESSION, 1922

THE NEW PARLIAMENT—In order to give immediate effect to the Constitution for the Irish Free State, the new Parliament—the first of Great Britain and Northern Ireland, though described on official documents as the thirty second of the United Kingdom of Great Britain and Ireland—met shortly after the general election. Members assembled on Nov. 20, when, in the House of Commons on the motion of Mr. T. P. O'Connor, the Father of the Chamber seconded by Mr. Pretymau, Mr. J. H. Whitley was re-elected Speaker. Mr. O'Connor remarked that the House required a Speaker with some humour because it was sometimes subject to gusts of passion. Sometimes it was like a boys school, sometimes like a girls school, but it could always be brought back to self control by a timely appeal to its always present sense of humour. Mr. Whitley accepted the honour and was escorted to the Chair by the Prime Minister, tributes being paid to the Speaker by Mr. Clynes and Mr. Asquith. On the following day the King's Approval of the Commons choice was announced and the swearing in of members commenced.

THE KING'S SPEECH—The opening of the Session by the King took place on Nov. 23, when His Majesty was accompanied by the Queen, the Prince of Wales and the Duke of York. In his speech from the Throne His Majesty said that Parliament had been summoned to deal with the legislation necessary to give effect to the Free State Constitution, and announced that the ameliorative measures prepared by the late Government on the subject of trade and employment were being examined afresh with a view to their continuance and extension. In the House of Lords Lord Erskine moved and Lord Queenborough seconded the Address in reply which was agreed to after a debate concerned mainly with British commitments abroad. In the other Chamber the Address was moved by Capt. W. Brass and seconded by Mr. Margesson in excellent maiden speeches. The new Leader of the Opposition, Mr. Ramsay MacDonald, in a speech that created a good impression, declared the reference to employment in the King's Speech to be "profoundly unsatisfactory," and said that the Labour Party were there to give constitutional force and political expression to the needs and desires of the workers. Mr. Bonar Law said the Government wished the Irish Treaty success in the interests both of Ireland and of Great Britain, while Mr. Asquith expressed the strongest hope and confidence that the genius and national sense of the Irish people would carry them through their present and future troubles. An amendment moved by Mr. Clynes regretting the absence of any indication of a change in the Coalition Government's foreign policy with a view to improving trade and decreasing unemployment was defeated by 303 to 174 on Dec. 1, one moved by Sir John Simon demanding the repeal of the Safeguarding of Industries Act was rejected by 269 to 207 on Dec. 4, and a third on the agricultural position, introduced by Sir R. Wintrey was beaten by 267 to 52 on Dec. 5, when the Address was agreed to.

THE IRISH BILLS—The Prime Minister on Nov. 24 presented the two important Bills of the brief Session—one to provide for the Constitution

of the Irish Free State and the other to make such provisions as were consequential or incidental to the establishment of the Irish Free State, mainly affecting Northern Ireland. Moving the second reading of the former Bill on Nov. 27, Mr. Bonar Law said that the Treaty had already been ratified by the Southern Irish Parliament, and the Imperial Parliament could make no change unless it were subsequently agreed to in the Southern Irish Parliament. The question was whether the Constitution complied with the Treaty or not. The Law Officers of the late Government and the Lord Chief Justice declared that the Constitution was in accordance with the Treaty and the Prime Minister recommended the Bill without any special fear as to the result and without any exaggerated expression of hope. Mr. Ramsay MacDonald shared the hope that the agreement would bring about that spirit of happiness and co-operation between the two countries which all past efforts in governing Ireland had failed to achieve. The rejection of the Bill was moved by Mr. Saklatvala and seconded by Mr. Newbold, but the motion was negatived and the second reading agreed to without a division. The Committee stage was passed on Nov. 28, and on the following day the two Bills received their third reading. The House of Lords quickly passed both measures and on Dec. 5 the Royal Assent was given. When Parliament was prorogued on Dec. 13 the King's Speech contained the passage: "It is my earnest prayer that the passing of these measures will mark the inauguration of a period of prosperity and concord for both Ireland and Great Britain."

THE CATTLE EMBARGO—As a result of the resolution passed by both Houses in the preceding Session, in favour of the removal of the embargo on Canadian cattle Sir Robert Sanders on Dec. 4 presented a Bill to amend the existing law. Moving the second reading on Dec. 7 the Minister of Agriculture said under the agreement with representatives of the Canadian Government Canadian store cattle were to be admitted into this country provided they were shipped direct from a Canadian port to a port in Great Britain, that they were kept under veterinary observation for three days immediately before embarkation, that during the voyage they were thoroughly examined by a veterinary officer of the Dominion and that they were landed at specified landing places in this country and examined by port officers. The Bill, which also applied to Irish cattle carried out these conclusions. An amendment for its rejection was defeated by 379 to 27 and the second reading was secured. The subsequent stages in both Houses were reached with little debate though Lord Carson attempted to remove Northern Ireland from the scope of the measure, and the Royal Assent was given on Dec. 15.

HELP FOR AUSTRIA—Among the objects of the Trade Facilities and Loans Guarantee Bill, which was passed during the Session, was the provision of help for Austria. Moving the second reading on Dec. 6, Mr. Stanley Baldwin said it was hoped that each of the three parts would assist and improve the trade of the country. The first part continued for another year the Trade Facilities Act of 1921, placing at the Government's disposal for that second period a sum of £25,000,000 to be devoted to the aid of

industries by guaranteeing loans made for the purpose of bringing orders into this country. The second clause provided a guarantee by the Government of a market loan to be raised in order to aid in the stabilization of the Austrian currency and the renaissance of Austrian finance, Britain's share being about £6,500,000. The remaining part guaranteed a loan to the Soudan Government for irrigation works.

SESSION, 1923

THE KING'S SPEECH—The normal session was inaugurated with full state on Feb. 23 by the King, who was accompanied by the Queen, the Prince of Wales and the Duke of York. In His Majesty's speech from the Throne reference was made to the situation in the Ruhr, the Lausanne Conference, and the prospective settlement of Great Britain's war debt to the United States, and legislation was promised dealing with housing, unemployment insurance benefit, trade boards, industrial assurance, legal reforms, and the granting of credit facilities to agriculturists. In the Upper Chamber Lord Willoughby de Broke moved and Lord Hastings seconded the Address, and replying to Viscount Grey Marquis Curzon said that the attitude of the British Government in regard to the Ruhr was one of benevolent neutrality. He indicated his readiness to welcome action by the United States. The Address was agreed to. Mr Samuel Roberts moved and Mr Collingwood Hughes seconded the Address in the Commons and in the course of the debate Mr Asquith urged that Great Britain should press both on France and Germany the necessity of allowing the question of reparations to be dealt with by the League of Nations, a suggestion which the Prime Minister did not consider practicable at the time. An amendment moved by Mr Clynes regretting the absence of any indication of a policy to check "the progressive economic ruin of Europe" was defeated by 277 to 280 on Feb. 16 and three days later an amendment framed by the two wings of the Liberal Party urging the appointment by the Council of the League of Nations of a commission of experts to report upon Germany's capacity to pay reparations and the best method of payment was rejected by 205 to 196. The Address was agreed to on Feb. 20 after the defeat by 273 to 167 of an amendment counselling immediate and drastic curtailment of expenditure in Mesopotamia and by 307 to 176 of a Labour amendment regarding war pensions.

THE NEW PREMIER—After a fruitless holiday in search of health, Mr Bonar Law resigned on Whit Sunday, and a few days later Mr Stanley Baldwin agreed to form an Administration, the majority of the old Ministers being reappointed. The new Prime Minister was chosen as Leader of the Conservative Party on May 28 and on the same day, when Parliament resumed after the short Whitsuntide recess, warm tributes were paid to Mr Bonar Law in the House of Commons. Mr MacDonald expressed the profound regret of all parties at Mr Bonar Law's withdrawal, and with regard to his successor declared amid laughter that he would do his best to "frustrate his politics" and to "confound his knavish tricks." Mr Asquith and Mr Lloyd George happily expressed their sympathy and their good wishes. Mr Baldwin returned thanks in a few felicitous phrases, and

Mr Austen Chamberlain followed with generous appreciation of the old Premier and the new.

THE BUDGET—In a speech that went far towards ensuring his succession to the Premiership little more than a month later Mr Stanley Baldwin set out his Budget proposals on April 16 and secured warm approval for a policy which placed debt redemption first coupled with a number of welcome reductions in taxation. The Chancellor announced that the revenue for the past year had been £914,000,000 and the expenditure £812,500,000 the surplus of £101,500,000 (due to reduction of expenditure) having automatically gone to the reduction of debt. He proposed to include in the Finance Bill a clause providing a sinking fund of £40,000,000 this year with five millions more in the following year and a similar addition a year later. With regard to the current year he estimated the total expenditure as £876,616,000 while on the basis of existing taxation, he placed the revenue at £852,650,000, a surplus of about £23,966,000. After remarking that the proposal to put a tax on betting would be considered by a Select Committee, Mr Baldwin came to his reductions in taxation. The rates for heavier letters and for inland parcels and the annual rentals for telephones would be reduced a rebate of £1 per bulk barrel would be given on beer, except on beer of low gravity, the duty of 4d per gallon on cider and perry would be repeated and that on table waters reduced to 2d a gallon, the income tax would be reduced by 6d to 4s 6d in the pound and the corporation tax would be reduced from 1s to 6d in the pound in respect of profits arising after June 30, 1923. These reductions he estimated would cost £34,150,000, leaving a revenue of £818,500,000 and a surplus of £1,384,000, to be kept for contingencies. In conclusion the Chancellor expressed the belief that the country had already passed the peak load of taxation and that they might hope soon to have relief from the calamitous years of trade depression. Mr Ramsay MacDonald congratulated Mr Baldwin upon his debt reduction proposals but suggested that the money off the income tax went into luxuries and urged a reduction in the sugar duty. The resolutions were passed after several sittings, and on April 23 the Finance Bill was read a first time. The second reading was secured on May 14 after the defeat by 271 to 157 of an amendment for the rejection of the Bill, moved by Mr Philip Snowden, on the ground that it made no adequate provision for the reduction of the National Debt and no reduction of the heavy duties on the necessities of life. On Committee, the Government accepted a suggestion that the possibility of passing on the reduction in the mineral water duties to the consumer should be considered, and concessions were made regarding the new assessment of houses. The sections of the Act of 1920 providing for the registration of particulars of land and property values in every transfer of land and property were repealed. During the Report Stage a new clause was agreed to freeing from the Entertainments Tax entertainments promoting the interest of any industry or art and agricultural and trade shows. The Bill was read a third time on July 4 by 249 to 145 after the Prime Minister had reviewed the negotiations for the funding of the American Debt. The terms were fair and honest, Mr Baldwin declared. He believed that they laid the

foundation of the constructive settlement of the world problem. Dealing with the question of Allied debts, he said that those who owed us money owed us money still, we were the creditors and they were the debtors. The Bill passed speedily through the House of Lords and the Royal Assent was given on July 18.

THE IRISH DEPORTATIONS—As a sequel to the deportation to Ireland from Great Britain of over a hundred persons under the Restoration of Order in Ireland Regulations, and the resulting proceedings in the High Court, a Bill was presented by Mr Baldwin on May 17, to prohibit the institution of legal proceedings against the Home Secretary in respect of his action. In moving the second reading on May 28 Mr Baldwin—by that time Prime Minister—announced that while all legal claim to compensation would be barred by the Bill the Government had decided to receive claims in respect of actual expenses or direct loss suffered by any of the deportees in consequence of their arrest and deportation to Ireland. Disputed claims would be referred to some impartial person of judicial experience for adjustment. He added that the Government had decided to set up a small expert committee with a judicial chairman to consider the regulations made under the Restoration of Order in Ireland Act, 1920, and advise as to the amendment or cancellation of any such regulations. A motion for the rejection of the Bill was defeated by 297 to 143 and the second reading was carried. During the Committee stage on May 29 Lord Robert Cecil agreed that the Bill went beyond the indemnity of the Home Secretary, and he subsequently brought forward a clause limiting the scope of the Bill to acts done under Regulation 14B, which was agreed to. On report on June 1 an amendment was added limiting the Bill to occurrences since Dec 6 1922 and the third reading was accorded, the Royal Assent being given on June 7.

THE HOUSING PROBLEM—The main work of the Session centred round the provision of housing accommodation and after a change in policy as a result of the defeat of three Ministers at bye elections, several Bills were passed. The first was designed to overcome the difficulty caused by the House of Lords decision in regard to the "notice to quit" provision in the Act of 1920, which had led to "rent strikes" in various parts of the country. Explaining the proposals on Feb 25 Sir Douglas Hogg said that landlords would be empowered to keep any amounts in excess which had been paid before Dec 1, 1922, and to recover any arrears kept back since that date, but they could not recover arrears which had not been collected on that date. A Labour motion for rejection was defeated by 283 to 196 and after being dealt with by a Standing Committee the Bill received the Royal Assent on May 17. A long fight took place over the Housing Bill, which was outlined on April 24 by Mr Neville Chamberlain the new Minister of Health, in moving the second reading. Describing the Bill not as the solution of the problem but as the beginning of a solution, he said he hoped to encourage private enterprise, and as a particular class of house required could not be provided by private enterprise alone he proposed to give a subsidy of £6. This was to be paid to local authorities and not to individuals, and it might

be used for giving assistance to private enterprise for providing houses by the authority itself. The Bill laid down the limits of the size of the houses to be assisted, and criticism was mainly directed to these clauses which were modified in some respects. The Bill was read a second time on April 26 after the defeat by 240 to 140 of a Labour motion for rejection, and emerged from the Standing Committee with a number of minor alterations receiving the Royal Assent on July 31, just before Parliament adjourned until Nov 13. The closing day of the first part of the Session also saw the Royal Assent given to another important Bill, one to amend and prolong the duration of the Increase of Rent and Mortgage Interest Restrictions Act of 1920. Moving the second reading on June 6 Mr Neville Chamberlain said that to attempt to make a clean cut of decontrol even in 1925 would be found to be impossible when the time came. In the Bill he contemplated a period of seven years during which control in some form or other would be continued. The existing Act was to be maintained for another two years subject to certain modifications and it was then to be followed by a longer period during which the tenant was to be protected against the danger of eviction at the whim or to serve the cupidity of a landlord. Under the modifications it was provided that when the landlord came into possession of his house after the passing of the Bill that House would come out of the Act. The increases of rent permitted under the existing Act were not altered and Reference Committees were established to take some of the work from the County Courts. The rejection was moved by Mr Sidney Webb, but on the following day this was defeated by 287 to 123 and the Bill was read a second time, the third reading being secured on July 13—after consideration by a Standing Committee—by 212 to 111.

RELIEF FOR AGRICULTURE—Before Parliament rose two Bills providing relief for the agricultural industry were passed. The first, as explained by Sir Robert Sanders on May 30 when it was given a second reading, enabled men who had bought their farms between the date of the introduction of the Corn Production Act of 1917, and the date of its repeal in 1922, to obtain mortgages repayable by annual or half-yearly payments in interest and sinking fund up to 75 per cent of the present value of their farms. These mortgages would be granted through approved associations which would be restricted in their profits the Government sanctioning loans repayable in 60 years at a rate of interest and sinking fund charges which would work out at £5 10s 7d per cent. A scheme for the formation of co-operative credit societies, to apply to small holders and agricultural labourers as well as farmers, was embodied in the Bill. The other measure provided that occupiers of agricultural land who now paid half the rates to which the Bill applied should in future pay one quarter of those rates. The estimated deficiency would be paid into the local taxation accounts by the Exchequer. Mr Neville Chamberlain, in moving the second reading on June 4 said that the Bill was only a temporary measure and he hoped shortly to bring forward permanent provisions in regard to the rating of agricultural land.

THE WAR BONUS

In order to counteract the increase in the *Cost of Living* the Government introduced a *Bonus Scheme*, under which salaried Civil Servants and wage-earning Government employees receive temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920, the limit of the addition in any case being £750 per annum. The Government Bonus Scheme has been adopted generally by Public Authorities, certain modifications being made in particular instances. The scheme formulated a basic rate of increase, producing a basic addition to salaries or wages, and this basic rate rises or falls *twenty sixth* in response to every *five points* rise or fall in the Index figure average of prices over a six months period. The standard cost of living in March, 1920, was 130 per cent in excess of that of July, 1914, and the scheme of increase agreed by the *Whitley Council* is as follows —

Where the ordinary rate of remuneration does not exceed 30s per week—130 per cent increase.

Where the ordinary rate of remuneration exceeds 30s a week but does not exceed £200 per annum—130 per cent on the first 30s a week (£91 5s per annum) and 60 per cent on the excess over £91 5s.

Where the ordinary rate of remuneration exceeds £200 per annum—130 per cent on the first £91 5s 60 per cent on the next £208 15s and 45 per cent on the amount in excess of £200 up to £390.

The bonus additions were at their height in March, 1921, when they followed the Index figure average of 165 and the annual cost of the scheme in the Civil Service was £45,000,000. The Bonus payable from Sept 1, 1923, represents the basic rate of 130 per cent in excess of July, 1914, *less* eleven twenty sixths decrease, equivalent to a fall of 55 points from the March, 1920, standard (or 90 points from March, 1921). Each twenty sixth reduction in the Civil Service salaries and wages represents about £1,250,000 annually. In addition to the reduction caused by the automatic decline of the cost of living figure the following decreases have been introduced —

20 per cent on salaries from £500 to £700 25 per cent on salaries from £700 to £800 30 per cent on salaries from £800 to £900 and so on until 60 per cent is reached in the case of salaries of £1,600 a year.

Details of the Bonus addition to Salaries and Wages, under the scale in force at various dates, are shown below —

Annual Salaries				Weekly Wages			
Salary	Annual Bonus			Wages	Weekly Bonus		
	March 1921	Sept 1922	Sept 1923		March 1921	Sept 1922	Sept 1923

MISCELLANEOUS STATUTES

A NOTABLE triumph was secured by a private member, Mr Entwistle, in placing upon the Statute Book a Bill which gave to women the right of divorce on the ground of their husband's misconduct, thus placing the sexes upon an equality in this respect. Given a second reading on March 2 by 231 to 27 the Bill was considered by a Standing Committee, received its third reading by 257 to 26 on June 8 and, passing through the Upper Chamber with an amendment, was given the Royal Assent on July 18. Viscountess Astor was also successful with a temperance measure her Bill to make it illegal knowingly to sell to anyone apparently under 18 any kind of intoxicant for consumption in a public house being read a second time by 336 to 56, and receiving the Royal Assent on July 31. Other measures passed included one giving increased powers for dealing with the illicit traffic in drugs and another enabling special constables to be recruited.

GOVERNMENT STAFFS

FROM Sept. 1, 1922 to Aug. 31, 1923, a reduction of 10,766 was made in Government Staffs. The following are the details for Sept. 1, 1923 —

Ex Service men—	Per manent	Temp porary	Totals
Disabled	27,696	16,094	43,790
Others	75,344	22,744	98,088
Totals	103,040	38,838	141,878
Other men	83,392	3,472	86,864
Total male staff	186,432	42,310	228,742
Women	56,668	18,985	75,653
Grand totals	243,100	61,295	304,395

The principal reductions were Pensions Ministry, 338; Ministry of Agriculture, 151; Inland Revenue, 79; Labour Ministry, 67; Customs and Excise, 46; Disposal and Liquidation Commission, 40.

Government and Public Offices.

ADMIRALTY (See pp 235-6.)

MINISTRY OF AGRICULTURE AND FISHERIES

Whitehall Place, S W 1 43 Parliament Street, S W 1, Gwydyr House, Whitehall S W 1

THE MINISTRY OF AGRICULTURE AND FISHERIES was constituted pursuant to the Ministry of Agriculture and Fisheries Act 1919 (9 and 10 Geo V Ch 91) which amended the Board of Agriculture and Fisheries Acts, 1889 to 1909. The Board of Agriculture for Great Britain was established in 1889. By the Board of Agriculture and Fisheries Act of 1909, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture the designation of which was at the same time altered. The expression agriculture is defined to include horticulture.

The administration of the Ordnance Survey and of New Gardens is under the control of the Ministry.

Estimates 1923-4 £1,941,561

Minister of Agriculture and Fisheries Lt. Col. Rt. Hon. Sir Robert Arthur Sanders Bart. M.P. £2,000
Private Secs. C. T. Houghton R. H. Franklin
Asst. do Hon. T. B. Money Coult. uny

Registrar Arthur W. S. Cochran M.C.O.

CHARITY COMMISSIONERS

Ryder Street St James's W. 1

The Charity Commission was appointed in Act of Parliament in 1853 for the better administration of charitable trusts in England and Wales. In 1874 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission and in 1879 the transfer was made permanent. The powers of the Commission over all endowments held for purely educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act 1890.

Chief Commissioner J. F. Mills £1,500
Second Commissioner G. W. Wallace £2,000 to £2,500
Secretary C. B. Ritchie £1,000
Parliamentary Clerks (Unpaid) 11 Col.
H. H. Spender Clay M.C. M.C. M.C.

Junior Clerks J. H. Blackenbourn I. L. Huddy £550 to £700

COLONIAL OFFICE, Downing Street S.W. 1

The business of the Colonies was until 1801 included in the functions of the Home Secretary, to be transferred in that year to the newly created Secretary for War. In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies to relieve the War Secretary of colonial business. The Colonial Secretary possesses an advisory power of veto on legislation of the self governing Dominions and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self government granted to them. The salaries &c. of the Colonial Office are estimated at £446,993 for 1923-24.

Principal Secretary of State for the Colonies His Grace the Duke of Devonshire K.G. P.C. G.C.V.O. £5,000

Overseas Settlement Department

3 and 4, Clements Inn, W.C. 1 — (to 5 Sat. 10 to 12.30)

H. M. Government have found it necessary to undertake closer responsibility in connection with the movements of British subjects wishing to settle overseas within the Empire or to emigrate to foreign countries, than they have exercised in the past. In order to assist them in carrying out their policy they appointed a Committee at first known as The Government Emigration Committee, now renamed The Oversea Settlement Committee.

President, The Secretary of State for the Colonies.
Chairman, Lt. Col. A. Buckley, D.S.O., M.P.
Deputy Chairman, Hon. W. Ormsby Gore, M.P., H. B. Betterson, M.P.
Vice-Chairman, T. C. Macnaughten, C.M.G., C.M.S.
Secretary, G. F. Plant
Finance Officer, W. Banks, Amery, C.M.S.
Chief Clerk, Malcolm Jones, C.M.S.

Imperial Institute

South Kensington, S.W. 7

The Imperial Institute was created as a memorial of the Jubilee of Queen Victoria (see page 284) and by the Imperial Institute (Management) Act of 1905 is under the management of the Secretary of State for the

Colonies, assisted by an Executive Council composed of twenty five members. The principal work of the Imperial Institute is the promotion of inter-imperial trade in raw materials by investigations with a view to utilisation, by supplying information as to sources quality and uses, and by exhibitions illustrative of the resources of the Empire.

Executive Council Hon. W. G. Ormsby Gore, M.P. (Chairman), L. W. L. Ashley, Sir Arthur Shirley Benn, K.C.B., M.P., Sir Edward Brookman, C.M.G., Sir Robert Carlyle, K.C.B., Sir F. D. Ward, Dawson, Wyndham, R. Dunstan, C.M.G., F.R.S., A. Fiddian, Sir Gilbert Grindle, C.M.G., C.B., Sir A. D. Hall, K.C.B., F.R.S., M. E. Handlan, C.B., Rt. Hon. Lord Kilmuir, C.M.G., D. O. Malcolm, R. W. Matthew, C.M.S., Sir James Stevenson, Bart., C.M.S., Sir Richard Threlfall, K.C.B., F.R.S. The High Commissioners for Canada, Australia, New Zealand, South Africa and Newfoundland.
 The following are the Principal Committees of the Institute —

Committee for Canada

The Hon. P. C. Larkin (Chairman), T. G. Colman, C.M.G., Sir Robert Kindersley, C.M.G., J. H. Plummer, Sir Keith Price

Committee for Australia

THE DUCHY OF CORNWALL,

Buckingham Gate, S W 1

Cornwall was created a Duchy by Edward III for the support of his eldest son (afterwards created Prince of Wales) and the eldest son of the Sovereign has since that time been born Duke of Cornwall.
 The Revenue of the Duchy of Cornwall in the year ended December 31, 1925, was £394,000 and was derived principally from Rents and Profits of Courts £154,220, Annuity in lieu of Tin Colliage Duties £10,227 and Dividends on Stock £6,825. The Payments include £53,045 Outlay for the benefit of the Estate, £47,365 Deductions under various Acts, £45,825 Allowances, Donations and Charities; and £19,126 Expenses of Management. The sum of £33,736 was paid on account of His Royal Highness the Prince of Wales.

Prince of Wales's Council

The Lord Clinton (Lord Warden of the Stannaries and Keeper of the Privy Seal), the Lord Revelstoke, C.V.O. (Recorder General), Earl Fortescue, Viscount Falkstone, Vice-Adm. Sir Lionel Halsey, C.V.O., K.C.M.G., C.B., John Anthony Hawke, K.C., M.P. (Attorney General), Sir Godfrey Thomas, Bt., C.V.O., Walter Poncock, C.V.O. (Sec. and Keeper of Records).

Officers of the Duchy of Cornwall

Auditor Sir Laurence E. Halsey, K.B.E.
 Solicitor R. E. Tucker
 Assistant Secretary C. Liddell
 Clerk Surveyor H. Kirk
 Deputy Receiver A. E. Ollott
 Sheriff Col. Hon. H. W. Hepburn Stuart Forbes
 Treasurers

THE DUCHY OF LANCASTER,

Office, Lancaster Place, Strand, W C 2.

Lancaster was elected into a Palatine Duchy by Edward III for his son John of Gaunt in 1399, but in 1590 it became merged in the Crown through the accession of his son as Henry IV.
 The Revenue of the Duchy of Lancaster was £39,000 in 1847 and amounted to £265,564 in the year ended December 31, 1925. The contributory items are Rents and Profits of Courts £66,599, Royalties and Dues £50,725, Expenditure £13,025, Outlay for the benefit of the Estate, £5,000 deducted under various Acts of Parliament, £6,125 Allowances, Donations, and Charities; £4,000, Salary of the Chancellor of the Duchy, and £24,477 Expenses of Management. The sum of £20,000 was paid for His Majesty's use to the Keeper of His Majesty's Privy Purse.
 Chancellor J. C. Davidson, C.B., C.V.O., M.P.
 Private Sec. Norman R. C. Warwick, O.B.E.

Vice-Chancellor, R. B. Lawrence, K.C.
 Attorney-Gen., Joseph Herbert Cunliffe, K.C.
 Receiver-Gen., Lt. Col. Rt. Hon. Sir F. Ponsonby, C.V.O., K.C.B.
 Auditor, F. W. Pixley
 Clerk of Council & Registrar, Herbert E. Mitchell, M.P.
 Solicitor Elliot A. C. Druce
 Surveyor Gen. and Deputy Receiver Gen. T. Vaughan Rickard.
 (Other A. M. Forbes
 Chief Clerk, Louis F. Ferguson
 Registrar, Preston and Manchester Dioceses, J. B. Blackburne and A. E. Steinthal, Joint Registrars.
 Do. Liverpool Dist. Roger W. Lowden
 Constable of Lancaster Castle Lord Ashton

THE COUNTY PALATINE OF DURHAM

It is uncertain when Palatine privileges were first exercised in the County of Durham as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne out of which the bishopric and palatinate of Durham arose the Bishops received large grants of lands with extensive immunities and Guthred king of Northumbria and Alfred the Great appear to have conferred the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of palatine privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror and they were exercised by the Bishops until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown Chancellor, Edward Lindal Atkinson, K.C.
 Attorney General, Herbert F. Stanley, K.C.
 Solicitor General, Sir Henry Arthur Cocks, K.B.E., K.C.
 Registrar of Chancery Court A. C. Smith
 Steward & Clerk of Halmotes, Stanford E. Downing
 Deputy do. G. Aynsley Smith
 Mining Surveyor, Sir A. N. Lindsay Wood Bart
 Receivers Smiths Gore & Co.

ECCLIASTICAL AND CHURCH ESTATES COMMISSIONERS,

1, Millbank, Westminster, S W 1

(Hours 10 to 5.)

The Ecclesiastical Commission for the Management of Church Property as now existing, was incorporated in 1836 its constitution being amended in 1840-2 and 1868. The main function of the Commission (whose members are given below) is the management of the Estates of the Church in order to endow or augment benefices &c.

SUMMARY OF RECEIPTS AND EXPENDITURE, 1926, 1925, and 1924

	1926	1925	1924

BOARD OF EDUCATION,

Whitehall, London, S.W. 1

The Government Department of Education was until the establishment of a separate office a Committee of the Privy Council appointed in 1833 to supervise the distribution of certain grants which had been made by Parliament since 1834. The Act of 1899 established the Board of Education, with a President and Parliamentary Secretary and a central Consultative Committee. The cost of administration was estimated at £434,501 in 1923-24 with £256,934 for Inspection and Examination.

EXCHEQUER AND AUDIT DEPARTMENT,

Victoria Embankment E C 4

This is the Department of the Comptroller and Auditor General (an office created by the Act 29 & 30 Vict. c. 39 (1866) to replace, with extended powers the separate offices of Comptroller General of the Receipt and Issue of the Exchequer and of the Commissioners for auditing the Public Accounts. This department is appointed by letters patent under the Great Seal and is irremovable except upon an address from the Two Houses of Parliament. In his capacity of Comptroller General of the Receipt and Issue of the Exchequer he authorises all issues from the Exchequer after satisfying himself that Parliament has given authority for them. He examines the Exchequer accounts and makes an annual report on them to Parliament. In his capacity of Auditor General of Public Accounts he is charged with the duty of examining on behalf of the House of Commons the accounts of expenditure out of monies provided by Parliament, the accounts of the receipt of revenue and generally all other public accounts including the accounts of Government stores and of trading services conducted by Government Departments. The results of his examination of those accounts are reported to the House of Commons.

The net expenses of the Department were estimated to amount to £153,700 in 1923-24

FOREIGN OFFICE Downing Street, S W 1

The Secretaryship of State for Foreign Affairs was created in 1702 superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary the other Permanent) three Assistant Under-Secretaries, Legal Advisers, a Finance Officer seven Counsellors, a Librarian and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £503,700 in 1923-24

FORESTRY COMMISSION

22 Grosvenor Gardens, S. W. 1

The Forestry Commissioners were appointed under the Forestry Act (1909) and were created a Body Corporate in April 1910. The Commissioners are charged with the general duty of promoting the interests of forestry, the development of afforestation and the production and supply of timber in Great Britain. The act transferred to the Commissioners the powers and duties of the Board of Agriculture and Fisheries and the Board of Agriculture for Scotland in relation to forestry and also the powers of those Departments under the Destructive Insects and Pests Acts 1877 and 1907 so far as those powers relate to insects or pests destructive only to forest trees and timber. The Forestry Act 1909 provides for the transfer of the Crown Woods and Forests to the Commissioners. It also cancels the condition of repayment to which grants in respect of afforestation were subject under the Act of 1909.

The net estimated expenditure on forestry operations for the year 1924 was £400,000.

Chairman Maj.-Gen. Lord Lovat, *c.m.g.* £1,000 *c.m.g.*

Secretary A. G. Hurlbert, *c.m.g.* (Scotland) 25 Drumshugh Gardens Edinburgh

17 North Audley Street, W. 1

A Barrister was appointed in 1902 to certify the Rules of Savings Banks and in 1903 to certify those of Friendly Societies. In 1905 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act 1905, the Central Office of the Registry of Friendly Societies was created consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Act, the Building Societies Act, the Trade Unions Act, the Workmen's Compensation Act, the Scientific Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, and a great number of local and personal Acts under the Industrial Assurance Act 1903. The Chief Registrar is charged with various powers and duties in relation to Industrial Assurance Companies and Collecting Societies and in that capacity is styled the Industrial Assurance Commissioner. Net expenses 1924-25, £24,445.

GENERAL REGISTER OFFICE (ENGLAND AND WALES) Somerset House, W C s

The Registration of Births, Marriages and Deaths is
believed to have been inaugurated by Thomas Crom

well in 1532, but the Statutes concerning registration
are of a comparatively modern date, and were consoli
dated by 37 & 38 Vict. c. 82. The first Registrar General
was appointed in 1838, his work being enormously in
creased by the Act of 1874, which made registration
compulsory in England and Wales. The Registrar
General is responsible for the taking of the Census and
the preparation of the Census Returns. The expenses of
the Office, including the Census Office, for 1923-24 were
estimated at £179,229. The estimate of receipts from
fees for the same period is £50,500

HOME OFFICE Whitehall S W s

The Secretaryship of State for Home Affairs was
created in 1782, the duties having previously been
assigned to the Southern Secretaryship which em
braced the affairs of Great Britain Ireland and the
Colonies and also Southern Europe. By the appoint
ment of the Home and Foreign Secretaries the
duties were divided in accordance with the names of the
Office, the former retaining Irish and Colonial business,
and until 1794 War business also. In 1801 the Colonial
business was also removed. The Home Secretary is the
medium by which the Sovereign acquaints his people of
his pleasure and a channel of communication with the
Sovereign and his main functions are the maintenance
of the King's peace the enforcement of rules made for
the internal well being of the community and the exer
cise of the prerogative of mercy

METROPOLITAN WATER BOARD

173 Rosebery Avenue, E.C.1

The Board serves an area of 562 sq. miles. The charges are levied on rateable value at such rate not exceeding 8½ per cent. as the Board may fix. The approximate net water rental is £4,809,498. The capital debt on April 1, 1922, amounted to £6,500,000, the interest paid being £1,700,844. The estimated population supplied was 6,907,370, the number of services being 1,248,906. The annual supply was 88,882,000,000 gallons, a daily average of 343 ½ million gallons. One of the sources of supply is the New River Company's undertaking inaugurated in the reign of James I (1606) by Sir Hugh Middleton, bringing water from Amwell and Chadwell Heats to London.

Chairman of the Board (1922-5) C. G. Musgrave J.F.

Vice-Chairman, Frederick L. Dove M.C. *(unp.)*
Clerk, G. F. Stringer *£1,200*

Director of Water Examination, Sir Alexander Houston K.C. C.O. M.D. B.Sc. *£1,750*
Solicitor, C. A. Hunt A.C.A. *£900*
Superintendent, F. W. Drake *£900*
Surveyor, Harold Oxley J.F. *£700*

IMPERIAL MINERAL RESOURCES

BUREAU

Queen Anne's Gate Buildings, Westminster, S.W.1

The Bureau was incorporated by Royal Charter on the 13th June 1919 and its purposes are: (a) To collect, ordinate and disseminate information as to the resources, production, treatment, consumption and requirements of every mineral and metal. (b) To ascertain the scope of existing agencies with a view ultimately to avoid any unnecessary overlapping that may prevail. (c) To devise means whereby existing agencies can, if necessary, be assisted and improved in the accomplishment of their respective tasks. (d) To supplement these agencies if necessary in order to obtain any information not now collected which may be required for the purposes of the Bureau. (e) To advise on the development of the mineral resources of the Empire or of particular parts thereof in order that such resources may be available for the purposes of Imperial Defence or Industry or Commerce.

Board of Governors

The Board of Governors consists of representatives appointed by the Home and Overseas Governments, the President of the Board being the Marquess of Salisbury, K.G. G.C.V.O. C.B.

Chairman of the Bureau (and Representative of the United Kingdom), Sir Richard Robinson K.C. M.C. M.B.E. M.N.E. M.P. *(Dominion of Canada), Willet G. Miller, M.L.A., F.R.S.C. (Commonwealth of Australia), William Stanley Robinson (Dominion of New Zealand) (vacant) (Union of South Africa) (vacant) (Dominion of Newfoundland), Rt. Hon. Lord Morris, K.C.M.G., M.C. (Vice-Chairman) (Government of India), Richard Dixon Oldham, F.R.S., F.G.S. (Nominated by the Secretary of State for the Colonies), John William Evans, C.B.E., M.S., F.R.S. (Appointed by the Lord President of the Council), Westgarth Forster Brown, M.C.E., M.N.E. Frederick H. Hatch, M.I.C.E., M.I.M.M., Wallace Thornycroft, F.R.S.E., M.I.C.E., M.I.M.M., Thomas*

Turner, M.Sc., F.I.C., A.R.S.M. Hugh F. Marriott A.R.S.M., M.I.M.M. Sir Herbert Jackson, K.B.E., F.I.C., F.R.S.

Secretary to the Bureau, Maj. W. M. Henderson, C.O.S.T., A.R.S.M., F.O.S.

The Bureau is advised by fifteen Technical Committees

THE ROYAL MINT Tower Hill, E.C.1

The Royal Mint as now constituted may be said to date from 1817 and the buildings from 1810, the latter being completed in that year at the cost of over £200,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I and the last Warden was Lord Maryborough (1814-23) the last Master being Professor Thomas (Graham) who died in 1869. The estimated administrative expenses amount to £6,019,202 for 1922-1923. Appropriations in aid, £6,019,200 leaving a net cost of £10.

Master and Warden, The Chancellor of the Exchequer, Deputy Master and Comptroller, and Engraver of H.M. Seals, Col. Robert Arthur Johnson J.F. *£1,500*
Chief Clerk, D. J. Scourfield J.F. *£500 to £700*
Staff Officer, W. Terry M.N.E. *£400 to £500*
Superintendent, Operative Department, W. J. Hocking *£800 to £1,000*
Assistant and W. J. Drown D.G. Spittle R.W.L. *£350 to £500*
Pyranist, R.V. *£350 to £500*
Chemist and Assayer, Sir F. K. Rose B.Sc. *£800 to £1,000*
Assistant Assayer, S. W. Smith B.Sc. *£350 to £600*
J. I. Johns M.A. *£350 to £550* *W. A. C. Newman B.Sc.* *£300 to £550*

Branches of the Royal Mint

Sydney, New South Wales
Deputy Master, J. H. Campbell *£1,200*
Superintendent, A. J. C. Christie *£700 to £900*
Melbourne, Victoria
Deputy Master, A. M. Le Souef *£1,200*
Superintendent, W. M. Robins B.A. *£800 to £900*
Perth, Western Australia
Deputy Master, J. F. Campbell *£1,200*
Superintendent, F. F. Allin *£700 to £800*
Ottawa, Canada
Deputy Master, A. H. W. Cloude *£1,000 to £1,200*
Superintendent, A. J. Baker (acting) *£750 to £1,000*
Victoria, South Africa
Deputy Master, R. G. J. Pearson *£1,200*
Superintendent, J. T. Bocklake *£820 to £940*

THE BRITISH MUSEUM,

Bloomsbury, W.C.1

The British Museum may be said to date from 1753 when Parliament granted the sum of £20,000 to purchase the collection of books &c. of Sir Hans Sloane. The building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1914 and the original collection has increased to its present dimensions by gifts and purchases and by the operation of the Copyright Acts. Rules &c. affecting the public dates and times of opening &c. will be found among

Places of Interest. The administrative expenses of the British Museum were estimated at £242,226 (including National History Museum) in 1922-23, and were met by a vote under Education, Science and Art, Class IV of the Civil Service Estimates.

THE VICTORIA AND ALBERT MUSEUM, South Kensington, S W 7

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1851 Exhibition on account of the excellence of their art and workmanship at a cost of £5,300 together with other specimens purchased for the use of the various schools of design since 1857 and dispersed among them.

Additions have since been made by purchase gift and bequest. The older parts of the building were erected between 1860 and 1884, the new buildings were completed in 1909. The administrative expenses were estimated at £127,752 in 1923-24 and were met by a vote under Education Science and Art. The branch museum at Bethnal Green (administrative expenses 1923-24, £6,925) was opened in 1923. The buildings were removed from South Kensington and re-erected on land purchased for the purpose locally.

Director and Secretary Sir Cecil H. Smith, K.C., B.A. £1,200 to £1,500

Keepers (Archaeology) Dr. R. E. Mortimer Wheeler, M.A., F.R.S. (Jury) Isaac J. Williams, M.A. (Botany) H. A. Hyde, M.A. (Zoology) Dr. F. J. North, F.R.S. (Zoology) Dr. J. Simpson, M.A.
Secretary A. H. I. C. M.C.

NATIONAL DEBT OFFICE,

19 Old Jewry, E.C. 2

The National Debt Commissioners were appointed under the Act of 1870, by which a permanent Sinking Fund was to be established and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as the Sinking Fund. In 1889 this was superseded by the issue of the new plan, one of the years of the Sinking Fund and this is commonly known as the Old Sinking Fund. In 1895 The New Sinking Fund was set up by Sir Stafford Northcote (38 39 Vic. c. 45) and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Master of the Rolls, the Lord Chief Justice, the Paymaster General and the Governor and Deputy Governor of the Bank of England. The annual sinking expenses of the Loan were estimated at £4,925 in 1923-24.

Comptroller (General) Sir Thomas L. Hearn, K.C.B., K.C. £2,500
Private Secretary A. Mackenzie £100
Assistant Comptroller C. J. Ansell, C.I. £800 to £1,000
Secretary H. Weatherill, O.B.E., F.R.S. £250
Chief Clerk W. B. Dwyer £100
Principal Clerk W. E. Dwyer £550 to £600
Assistant do J. R. C. B. Hobbins (Buckham) £400 to £500
H. R. Lowell, F.R.S. W. K. Wilson, H.R.S. (City) £1,000
J. & Messrs Mullins Marshall Scott & Co. £1,500

NATIONAL GALLERY

Trafalgar Square, W.C. 2

The National Gallery is the result of a Parliamentary grant of £50,000 in 1824 for the purchase and exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1868, 1870, 1887 and 1912. The cost of administration in 1922-23 was estimated at £33,000.

Director Sir Charles John Holmes £1,200 to £1,500
Keeper and Secretary C. H. Collins Baker £900
Assistant H. I. Kay W. G. Constable £250 to £500

NATIONAL GALLERY OF BRITISH ART

(The Tate Gallery) Millbank S.W. 1

The National Gallery of British Art better known as The Tate Gallery was opened in 1897 on the site of Millbank Gaol the cost of erection (£200,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The Turner Wing, built at the expense of the late Sir Joseph Duveen, was opened to the public in 1910.

Director Charles Atken £1,000
Asst. Keeper James B. Manson £250 to £500
Assistant H. S. Ede £250 to £500

NATIONAL INSURANCE AUDIT DEPT.

Heat Office 17 North Audley Street, W. 1

Under the National Insurance Act 1911 it is provided that the accounts of Approved Societies, Branches, and Insurance Committees shall be submitted to audit by auditors appointed by the Treasury. This Department was created by the Treasury Minute of August 6, 1911.

Chief Auditor D. H. Boggie, F.R.C.S. £1,000

(Joint Department of the Foreign Office and the Board of Trade).

35 Old Queen Street S.W. 1

City Branch Office 73 Basinghall Street, E.C. 2

This Department was formed during the autumn of 1917 as a joint Department under the Foreign Office and Board of Trade and is represented in Parliament by a Parliamentary Secretary who occupies the position both of Additional Parliamentary Under Secretary of State for Foreign Affairs and of Additional Parliamentary Secretary for the Board of Trade. The Department is concerned mainly with the promotion and development of overseas trade and comprises the former Department of Commercial Intelligence of the Board of Trade and a part of the Foreign Trade Department of the Foreign Office. It has in addition taken over certain functions formerly performed by the Foreign Office in connexion with commercial intelligence and with the Commercial Diplomatic and Consular Services. The cost of administration was estimated at £299,950 in 1922-23.

PRIVY COUNCIL OFFICE Whitehall, S W 1

The Privy Council is of very ancient origin. A Council the number of which was about twelve was instituted by Alfred 869, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy it was reconstituted in 1579. At present it consists of certain eminent persons whose names are given on p. 222. Members of the Cabinet must be Privy Counsellors and they principally form the acting Privy Council. The Council is summoned as such to act with others upon the demise of the Crown and many matters are referred by the Sovereign to Committees of the Council some of which are standing committees and others constituted to deal with particular cases. The Judicial Committee the Board of Trade &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord 1 resident of the Council Most Hon. M. Hughes of Salisbury, c.m.s. d.s.o. c.m. £2,000

Staff Officer and Cashier R. Watson £350 to £550

PUBLIC WORKS LOAN BOARD,

Old Jewry, E C 2.

The Public Works Loan Board was created in 1817 for the purpose of advancing money to Municipal Authorities for Public Works. During the financial year 1922-23 the Commissioners approved loans amounting to £2,718,728 viz. £8,627,845 out of the Local Loans Fund and £1,081,483 out of the Land Settlement (Public Works Loan) account. Of the total granted out of the Local Loans Fund the sum of £7,000,000 was for purposes of the Housing Acts (as compared with £2,222,787 in 1921-22).

The average annual amount of loans granted by the Board during the period from 1875-6 (when the Commission was constituted in its present form) to 1922-23 was £2,900,000 per annum (the lowest amount previously granted being £400,000 in the financial year 1875-76, and the highest £2,900,000 in 1922-23). The comparison with the total amount advanced by the Board during the

203 years from its origin (in 1877) to 1923-24 is striking for the total amount advanced during this period was only £149,436 0s 0d as compared with £25,643,728 granted during the single financial year 1922-23 and when it is remembered that the 203 years referred to witnessed almost the entire development of local government in England the comparison appears even more remarkable.

The average rate of interest was—

£ s d.	%	per cent. in	1922-23
5 7 2	6	10	1921-22
6 3 10	6	10	1920-21
6 8 9	6	10	1919-20
5 15 7	6	10	1918-19
4 9 7	6	10	1917-18

Loans granted during 1922-23 to Local Authorities for the purposes of State assisted Housing Schemes amounted to £11,831,733 for providing dwellings for the Working Classes during the year made up as follows—

(A) LOANS SECURED ON LOCAL RATES		England	Scotland
(a) For State aided schemes	10,228,453	1,211,128	
(b) For non State aided schemes			
	10,228,453	1,211,128	
(B) LOANS SECURED ON INDEMNITY		England	Scotland
(a) For State aided schemes	382,519	8,889	
(b) For non State aided schemes			
Public utility societies			
Individuals and Companies	750		
	383,269	8,889	
Grand Total		£11,831,733	

No applications for loans for land settlement purposes were refused the advances made out of the Land Settlement Account during the year totalled £1,235,874

Chairman, The Lord Hunsdon 1923
Deputy Chairman, Laurence Currie 1923
Secretary, H G H. Barnes £1,500
Asst. Secretary (Legal), D F Buckley £600 to £800
Asst. Secy and Chief Clerk, H A Clark £100 to £600 to £800

QUEEN ANNE'S BOUNTY,

3 Dean's Yard S W 1

Incorporated in 1704 when Queen Anne with the consent of Parliament transferred to the Governors the annual income of the first fruits and tenths derived from the sees, dignities and benefices with a view to the augmentation of insufficiently endowed livings.

These charges were originally levied on all clerical incomes and paid to the Exchequer but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges having either been exempted from them by statute or formed since the charges were imposed.

First fruits represent one year's income of a benefice in the time of Henry VIII the tenths an annual sum of a tenth part of that income. The income from this source amounts to about £5,000 per year which with the surplus income from capital held by the Governors is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £250 in net annual value the total amount so available for the year ending Dec 31 1923 was £57,342. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings in certain cases for rebuilding churches and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.

Chief Clerk, F G Hughes.

DEPARTMENT OF SCIENTIFIC AND

INDUSTRIAL RESEARCH,

26 & 28 Old Queen Street, Westminster, S W 1

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1917, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organisation and development of Scientific and Industrial Research. The Order in Council also appointed an Advisory Council to whom all proposals for researches stand referred. By Charter dated November 23, 1926 the official members of the Committee of the Privy Council were created a Body Corporate under the name of The Imperial Trust for the Encouragement of Scientific and Industrial Research to hold and dispose of money and other property for the purposes of the Committee. On December 15, 1926, a separate Department having its own Parliamentary Vote was created for the service of the Committee. The aggregate net estimate for the Department in 1923-4 amounts to £278,824, a decrease of £20,574 on the same estimate for 1922-3. The gross estimate amounts to £398,593. Salaries and allowances, £28,790. Grants for Research, £50,800. Research Boards' Expenses, £53,415. Fuel Research Board, £34,500. Geological Survey of Great Britain, £53,455. Museum of Geology, £1,761. National Physical Laboratory, £154,000.

President of the Committee of the Privy Council, The Lord President of the Council.

Vice-Chairman of the Committee of Council, The President of the Board of Education.

Advisory Council: Sir William S. M. Cormick, 110 D (Chairman); Sir George T. Bolby, LL.D., F.R.S.; Sir John Cadman, K.C.M.G., D.Sc.; Prof. J. B. Farmer, D.Sc., F.R.S.; Sir Maurice Fitzmaurice, O.M., F.R.S.; Eng. Vice-Adm. Sir G. Goodwin, K.C.B.; W. B. Hardy, F.R.S.; Principal J. C. Irvine, C.B.E., F.R.S.; Sir Henry A. Miles, D.Sc., F.R.S.; Sir John F. O'Snell, M.A., F.R.S.; Sir J. J. Thomson, O.M., F.R.S.; Sir Richard Threlfall, K.C.B., F.R.S.; Professor S. Young, D.Sc., F.R.S.; Secretary to the Council, Sir H. Frank Heath, K.C.B.

Geological Survey of Great Britain and

Museum of Practical Geology

Jermyn Street, S.W. 2

The Geological Survey and Museum was commenced in 1831 it was under the Science and Art Department from 1833 till 1900 when that Department became merged in the Board of Education. On Nov. 1, 1909, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world.

The National Physical Laboratory.

Teddington, Middlesex

The National Physical Laboratory was founded in the year 1902 as a public institution for standardising and verifying instruments for testing materials and for the determination of physical constants. Prior to the year 1902 the property of the Laboratory was vested in the President and the Council of the Royal Society, and the Laboratory was controlled by a General Board and an Executive Committee appointed by the President and Council of the Royal Society and comprising representatives of the Society and of the great technical institutions. As from April 1, 1908, responsibility for the maintenance of the National Physical Laboratory was undertaken by the Department of Scientific and Industrial Research.

The Laboratory comprises eight main sections—
(1) The Physics Department includes divisions for Heat and Thermometry, Optics, Sound and Radiology.
(2) The main divisions of the Electricity Department deal respectively with Electrical Standards, General Electrical and Magnetic Measurements, Alternating Current Tests and Research, Direct Current Measurements and Photometry.
(3) The Metrology Department is responsible for the Laboratory Standards of length, area, volume and mass and among the various branches of work dealt with are the verification of standards of length standards, large surveying tapes, etc., the testing of engineers' gauges including screw gauges, measurements of area, volume and mass and the testing of barometers, hydrometers, taximeters, watches and chronometers and the highest class of scientific glassware for volumetric measurements. The glassware testing has recently been reorganised on an increased scale owing to the growth in the manufacture of such ware in this country during the war. When the Ministry of Munitions was formed the Laboratory was called upon to undertake the testing of the gauges for the Ministry, the work assumed very large dimensions, and a special building for its accommodation was provided. The Engineering Department carries out research on general engineering problems especially in relation to the strength and properties of materials under stress. It comprises a laboratory and experimental tests for tests of road materials.
(4) The Aerodynamic Department conducts researches on aircraft models and parts as required by the Aeronautical Research Committee of the Air Ministry. Investigations on light alloys and other materials, engines and accessories, airplanes, boats, fabrics, etc., are carried out in other departments, especially the Engineering, Metallurgy, and Electro-technics Departments and the William Froude National Tank.
(5) The Department of Metallurgy and Metalurgical Chemistry in addition to researches on steels and on aluminium and other alloys is engaged on researches relating to Optical Glass. The equipment includes a rolling mill for the experimental working of alloys. The Metallurgical building was provided by Sir Julius Wernher in 1902.
(6) The William Froude National Tank the gift of Sir A. F. Yarrow for the service of the nation carries out tests and researches on ship and propeller models for the information of designers and naval architects.

ROYAL COMMISSION FOR THE EXHIBITION OF 1881

Offices 1, Jowther Gardens, Exhibition Rd. S. W. 7
 [Incorporated by Supplemental Charter as a permanent Commission after winding up the affairs of the Great Exhibition in 1881. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate purchased with the surplus left over from the Great Exhibition.]
President of the Royal Commission H. R. H. the Prince of Wales, k.c.
Chairman of Board of Management, Viscount Escher, c.m.g., c.v.o.
Chairman, Science Scholarships Committee, Sir Richard Glazebrook, k.c.b., f.r.s.
Secretary to Commissioners, Evelyn Shaw, m.v.o.

THE NATIONAL SAVINGS COMMITTEE, Princes House, Kingsway, W. C. 2

SAVINGS CERTIFICATES—The total number of Savings Certificates sold from their first issue in Feb. 1886 to Aug. 31, 1893, was 668,130,284, their cash value being £294,118,245. The amount withdrawn on that date was approximately 20 per cent. of that total. On April 1, 1893, the price of the Savings Certificate was raised from 25s. 6d. to 10s. its maturity value being unaffected. On Oct. 1, 1893, the maturity value was reduced to 8s.

President, Sir Robert M. Kindersley, c.m.e.

THAMES CONSERVANCY,

1 Norfolk Street, Strand W C 2

The Conservancy of the River Thames was granted to the Lord Mayor of London in 1287 and delegated to 22 conservators in 1287 the powers being reconstituted in 1294. The Port of London Act 1908 took over as from March 31 1909 all rights powers and duties of the conservators in respect of the river below Teddington.
Chairman Rt Hon Lord Desborough n.c. o.c.
First Chairman, Sir Robert Buckell
Secretary, F W Geary

BOARD OF TRADE.

Great George Street, S W 1

(See also Dept of Overseas Trade and Patent Office)

A Board of Trade and Plantations was established by Charles II in 1660, and in place of this body a Committee of the Council on Trade was established in 1705. The duties of this Committee (which unlike the other Council Committees has a president of its own) are to collect Trade Statistics, control the issue of Patents keep the Standards of Weights and Measures the non legal machinery of Bankruptcy the Registration of Joint Stock Companies, Gas Companies, Lighthouses and Merchant Shipping acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. In 1821 the powers and duties of the Ministries of Food and of Shipping were transferred to the Board of Trade.

The Lord High Treasurer of England is the Third (rent Officer of State the office having been in commission (with certain intervals) since 1622. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord who if a Commoner is usually Leader of the House of Commons the Chancellor of the Exchequer, and some Junior Lords with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political as also are those of the Parliamentary Secretary and the Junior Lords the duties of the Chancellor of the Exchequer are mainly financial in that he performs the ancient duties of the Under Treasurer and after agreement with the heads of the great spending departments arranges for the great collecting departments to provide sufficient money to meet the needs of the year. The papers are laid before Parliament in the form of a Budget which the Chancellor opens and expounds to the House these plans being accepted modified or rejected by the House. The amount estimated to pay the salaries and other expenses was £227,173 in 1922-23.

TRINITY HOUSE Lower Hill E C 3

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII granted the Institution its first charter in 1534, *inter alia* for the relief increase and augmentation of the Shipping of this Realm of England. Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day the principal duty of the Corporation of Trinity House as a Public Department is the administration of the Lighthouse &c. Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland Ireland and the Channel Islands, whilst the Corporation are also the chief Pilotage Authority in the United Kingdom and in their capacity as a private corporation or guild they administer certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund this fund being provided by means of special dues called Light Dues levied on shipping using the ports of the United Kingdom. The accounts in connection with the Lighthouse Service are rendered to the Board of Trade, who have statutory control over the expenditure and are submitted annually to Parliament. The accounts in connection with the Charitable Trusts are rendered to the Charity Commissioners. In addition to the public and trust funds which they administer the Corporation have at their disposal certain private funds which are applied to the maintenance of their house on Tower Hill and to other corporate purposes. The Master of the Corporation at the present time is His Royal Highness the Duke of Connaught and Strathearn K C B. There are ten Acting Elder Brethren one of whom is a retired officer of the Royal Navy and the other nine are retired Commanders of the Mercantile Marine and besides two Elder Brethren who have retired from the Active List

there are a number of Honorary Elder Brethren, including His Majesty The King and other members of the Royal Family. The ten Acting Elder Brethren, one of whom always is Deputy Master form the Board which carries out the public and corporate duties of the Trinity House.

Secretary, A R McBain C B E, War Office, S W 2.

VOLUNTARY HOSPITALS COMMISSION, Ministry of Health, Whitehall, S.W. 1

The aggregate deficits amounted for 1921 to £295,770 for London £248,727 for the rest of England and Wales and £46,537 for Scotland. The total was thus £590,454, as compared with the estimate of £1,000,000 made by Lord Caves Committee on which the Government grant of £500,000 was based. The following grants were made in 1923 on the basis of pound for pound of new money raised or in sight except in a limited number of cases where emergency grants were made to prevent the losing of beds. London £245,000 rest of England and Wales £242,242 Scotland £7,212 giving a total of £534,454. The London hospitals received their full share of the grant but a balance of £73,347 remained for distribution in the rest of England, Wales and Scotland. This balance was apportioned on the basis of Lord Caves estimate as follows: England and Wales £45,728 Scotland £29,520 and will be distributed in accordance with a scheme formulated by the local Voluntary Hospital Committees in England and Wales and the Consultative Committee in Scotland subject to the Treasury conditions regarding the liquidation of the deficits which accumulated prior to 1921.

(a) Chancery Division

(Actions in each year)

Year	1913	1914	1915	1916	1917	1918	1919	1920	1921	1922	1923
1913	368	301	246	250	253	253	253	253	253	253	253
1914	328	246	250	253	253	253	253	253	253	253	253
1915	348	250	253	253	253	253	253	253	253	253	253

The explanation of the higher figures in the later years is that since 1912 this division has dealt with (1) a new (winding up matter), and (2) with Bankruptcy matters also, the latter having formerly been heard in the King's Bench Division

(3) King's Bench Division

In dealing with the King's Bench account has to be taken of the transfer just mentioned of bankruptcy matters to the Chancery side in 1922

Year	Div Court	Actions	Bankrupt	Total
1913	316	510	15	841
1914	295	467	14	776
1915	213	373	12	598
1916	242	449	8	599
1917	237	312	9	558
1918	183	536	2	719
1919	192	852	5	1,049
1920	152	965	8	1,125
1921	289	1,603	—	1,892
1922	154	1,082	—	1,236
1923	184	731	—	915

(4) Probate, Divorces and Admiralty

The increases are attributable mainly to the gradually extended facilities given to Poor Persons to bring proceedings. Probate cases form but a small proportion of the aggregates

Year	Prob & Div	Admiralty	Total
1913	528	22	550
1914	389	22	411
1915	515	38	553
1916	495	68	563
1917	708	110	818
1918	935	157	1,092
1919	2,025	79	2,104
1920	2,628	113	2,741
1921	1,014	82	1,096
1922	888	43	931
1923	815	27	842

Law and Justice.

227

COST OF ADMINISTRATION

The aggregate cost of the Administration of Law and Justice for the year ending March 31 1921 is £26,578,533, as compared with £24,707,486 for the year ended March 31, 1920 an increase of £1,871,047.

THE NAVY ESTIMATES, 1923-24

£58,000,000 net Decrease on 1922-23, £6,883,700.

The Navy Estimates for the financial year 1923-24 provide for a net expenditure of £58,000,000 as compared with £64,883,700 net in the year 1922-23. Provision is made for 99,500 officers and other ranks, in addition to 1423 coastguard and Marine forces.

There is no shipbuilding programme. Although other countries including the United States, France and Japan, are building large light cruisers, destroyers, and submarines in large numbers, the Board of Admiralty asked

Parliament to assent merely to 'preparatory work on a submarine, for permission to complete the ships begun during the War, and to advance the two new battleships (H. M. S. *Nelson* and *Rodney*). The other work in hand during the year is the completion of 1 light cruiser, 2 flotilla leaders, 3 destroyers, 4 submarines, and 2 aircraft carriers, the advancement of 2 battleships, 3 light cruisers, 2 submarines and 1 mine layer, and the beginning of 1 submarine.

RELATIVE RANK IN THE ROYAL NAVY, ARMY AND ROYAL AIR FORCE.

ROYAL NAVY	ARMY	ROYAL AIR FORCE.
1. Admiral of the Fleet	1. Field Marshal.	1. Marshal of the Air
2. Admiral	2. General	2. Air Chief Marshal.
3. Vice Admiral	3. Lieutenant-General.	3. Air Marshal.
4. Rear Admiral	4. Major General	4. Air Vice-Marshal.
5. Commodore	5. Brigadier General & Col Comdt	5. Air Commodore.

India	6 squadrons
Iraq	8 squadrons
Egypt	3 squadrons
Palestine and Trans Jordania	1½ squadron
Aden	½ squadron
Malta	1 squadron
	1 flight (for Aircraft Carrier).

ORDER OF WAR MEDALS

THE Army Council has given instructions that stars and medals approved for service during the Great War will be worn in the following order—1914 Star or 1914-15 Star British War Medal, Mercantile Marine War Medal Victory Medal Territorial Force War Medal India General Service Medal (for operations against Afghanistan 1919).

THE KING'S PRIZE

THE King's Prize at Bisley, 1923, was won by Capt E H Robinson, late 1st A F, with a score of 232. In 1922 the winner was Lt Col A F Marchmont, DSO MC, 1st London Regt.

NAVIES OF THE POWERS

On March 1, 1923, the following ships were in full commission in the Navies of the United States, Japan and Great Britain —

	U S A	Japan	Gr Brit
Battleships	18	4	13 (a)
Battle cruisers	—	3	—
Cruisers	5	3 (b)	—
Light cruisers	5	11	37
Destroyers	112	22	65 (c)
Submarines	73	11	39

(a) Does not include *Ajax* and *Cinturon* which have reduced complements although serving with an active service squadron (b) Training squadron (c) Includes eight flotilla leaders

Balance of Naval Power

Position of the three leading Powers in capital ships in 1921 and as it will exist in 1924 —

	1921	1924.
Great Britain	32 ships	32 ships
Displacement	808,200 tons	808,200 tons
Battle guns	284	284
Foot-tons energy	19,080,000	19,080,000
United States	17 ships	33 ships
Displacement	467,250 tons	117,850 tons
Battle guns	188	340
Foot tons energy	11,989,176	28,597,176
Japan	11 ships	17 ships
Displacement	319,140 tons	543,140 tons
Battle guns	108	164
Foot tons energy	7,480,000	13,415,400

Battleship Ranges

The maximum service elevation and range of the main armament guns of United States range from 15 deg elevation and 21,000 yards range to 30 deg elevation and 34,500 yards and the same guns of British ships from 20 deg elevation and 21,800 yards to 30 deg elevation and 30,300 yards

United States Battleships

16 in guns 45 cal 30 deg	34,500 yds
14 in guns 45 cal 15 deg	1,000 yds
12 in guns 50 cal 15 deg	21,500 yds
12 in guns 45 cal 15 deg	22,000 yds

British Battleships

15 in guns 30 deg elevation	37,300 yds
15 in guns 20 deg elevation	1,300 yds
13.5 in guns 20 deg elevation	23,800 yds

BRITISH EMPIRE CRUISE

ON Nov 5, 1923 and for the duration of the world cruise, the Admiralty state that the 1st Light Cruiser Squadron and the 1st Light Cruiser Squadron will be constituted a detached squadron, with the title "Special Service Squadron". The combined squadron, under the command of Rear Admiral (acting Vice-Admiral) Sir Frederick L. Field, K.C.B. C.M.G., will touch at the principal ports of the British Dominions and will afterwards visit America, where they will divide before returning to their home stations

NAVAL CASUALTIES IN THE WAR

Casualties to all ranks of Royal Navy and Royal Naval Reserve, including Mercantile Marine Reserve while serving in H.M. ships and merchant ships, but excluding casualties of the Royal Naval Division and British Mercantile Marine losses —

	Officers	Men
Killed in action or died of wounds	2,074	20,735
Died	400	11,433
Wounded in action	549	3,691
Injured	256	392
Missing	—	2
Prisoners of War	211	824
Interned	51	170

Total 3,541 37,527

WARSHIP LOSSES IN THE WAR

The total Allied losses to the date of the Armistice (Nov 11, 1918) are stated at 803,000 displacement tons those of the enemy at 415,000 displacement tons. The Scapa Flow losses are not included in the enemy total

	U S A	France	Italy	Japan	Germany	Austria H
Battleships	13	—	4	3	1	3
Battle Cruisers	3	—	—	—	1	—
Cruisers	25	1	5	2	4	24
Monitors	6	—	—	—	—	3

Small Craft	27	—	9	—	—	—

* Exclusive of the High Seas Fleet scuttled in Scapa Flow June 21 1919.

THE WORLD'S SUBMARINES

(May, 1922)

	Built	Building
Great Britain	92	8
U S A	107	41
Brazil	3	nil
Chile	6	nil
Denmark	12	2
France	49	5
Germany	nil	nil
Italy	51	nil
Japan	24	15
Netherlands	13	2
Norway	4	2
Peru	2	2
Portugal	4	nil
Russia	36	23
Spain	4	6
Sweden	10	8

The British vessels exclude those earmarked for disposal, and include six Commonwealth vessels and two Dominion of Canada vessels. Four of the forty nine French submarines have been condemned. Italy, the return for which excludes vessels earmarked for disposal, projects building four, and in the case of Russia the twenty three in the course of construction include "one assembling, two in cases at Nikolaev, twenty Petrograd—uncertain"

The Army.

241

THE WAR OFFICE.

Whitehall, S W 1

The business of the War Office proper appears to have been originally entrusted about 1550 to a Committee of the Privy Council the Clerk in attendance on that Committee being the Secretary at War. The Secretary at War had immense power in military matters, as holding the purse, but neither the Commander in Chief nor the Board of Ordnance was subject to him. In 1794 a Secretary of State was first appointed. The Office of Secretary at War was not terminated at this date but from 1855 it was amalgamated with that of Secretary of State for War until, in 1863, it was formally abolished by Act of Parliament.

In 1801 the Secretary of State for War was also given the business of the Colonies of which he was relieved in 1864 by the appointment of a Secretary of State for the Colonies.

In 1866, the Commissariat Office, which was only a semi-military branch of the Army with headquarters at the Treasury, was transferred to the War Department. The Board of Ordnance was abolished after an existence

of more than three centuries, and the Board of General Officers and the Army Medical Department were also successively absorbed into the War Department. The year 1870 witnessed the final welding into one War Office of the civil administrative functions of the Secretary of State and the military administrative functions hitherto exercised at the Horse Guards. In that year the War Office Act vested the direct and immediate control of every branch of Army administration in the Secretary of State. Before the appointment of a Secretary of State, the military control of the Army was to a very great extent in the hands of the commander in Chief, who was subordinated to the Secretary of State from 1863 until the abolition of the Office in 1904. In 1904 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the commander in Chief. Statutory powers were transferred by the Army (Annual) Act of 1909 (9 Edw VII c 3).

The Corps of Military Police
Mitchett Hutments, Ash Vale Aldershot

THE AUXILIARY FORCES

THE MILITIA

In 1907 the Old Constitutional Force known as the Militia was transformed into the "Special Reserve, but the following Militia units were retained—The Royal Malta Artillery the Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1912 the terms Special Reserve (and Extra Reserve) Battalions were abolished and "Militia" restored but no appointments are at present made to the force, which comprises the following units—

Cavalry—1 Regiment (King Edward's Horse)

Artillery—R F A and R G A

Royal Engineers—All branches

Infantry—The 3rd Battalion of Infantry

Regiments of the Line (and in some cases the battalion next in numerical order) is specially retained as Militia.

THE TERRITORIAL ARMY

In 1907 the "Yeomanry and the "Volunteers were transferred into the Territorial Force, which included English, Welsh, and Scottish Cavalry, Royal Horse, Royal Field, and Royal Garrison Artillery Royal Engineers Infantry Royal Army Service Corps and Royal Army Medical Corps. In 1912 the title was changed to "Territorial Army

Territorials in the War—The strength of the Territorial Force in July, 1914, was about 265,000. During the Great War 321 new units were formed and there passed through the ranks of

the force about 50,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers, and nearly 600,000 other ranks, of which some 6,600 officers and 106,000 other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses

STRENGTH OF THE ARMY

Army Estimates of the effective and non effective services for 1923-24 show the number of men on the Establishment of the British Army at 170,800, including 10,500 Indian troops in Iraq, which are borne on the Army vote for technical reasons. The establishment in 1922-23 was 215,000, this figure including 20 Cavalry Regiments, 162 Batteries of Artillery, 10 Guards Infantry Battalions, 162 Infantry Battalions, and ancillary and auxiliary services.

Including permanent staff, the *Territorial Army* consists of 14 Divisions, the Artillery comprising batteries of 4 guns, and the Infantry Battalions having an establishment of 21 Officers and 627 other ranks. Included with this force is an *Air Defence Force* of 220 Officers and 2,708 other ranks. On Feb 1, 1923 the total strength of the Territorial Army was 134,452 all ranks.

Cadet Corps—Owing to the present financial stringency it has been found impossible to continue the annual grants hitherto given to cadet units recognised by the War Office but it is not proposed to withdraw in 1923-24 the privilege of camp equipment for summer camps. On Oct 1 1922, the number of cadets serving in the Officers Training Corps was

Senior Division	2,822
Junior Division	32,233

as compared with a total of 34,330 on the corresponding date of 1921 and a total of 27,023 in October, 1913.

COST OF THE ARMY

The Army Estimates for 1923-24 provide for an expenditure of £52,000,000, a reduction of £10,300,000 compared with the year 1922-23. The total of the financial estimate is made up of Current Effective Charges £40,804,000 Non Effective Charges £7,518,000 and Terminal Charges of the Great War £3,588,000.

The principal heads of cost in the present and in the last Estimates are as follows—

	1922-24. Net Estimate	1922-23. Net Estimate
Standing Army	£28,132,000	£35,351,300
Territorial Army and Reserve Forces	7,200,000	8,083,000
Educational, &c, Establishments, and Hospitals, Depots, &c	7,416,000	9,211,000
War Office, Staff of Commands, &c	2,691,000	3,355,500
Terminal and Miscellaneous Charges and Receipts	1,982,000	6,819,200
Half Pay, Retired Pay, Pensions and Civil Superannuation	7,518,000	8,617,200

The Estimates include a repayment by the Colonial Office of £4,930,000 for expenditure in the Middle East, which, with one or two minor adjustments, brings down the actual savings to the sum of £20,300,000 mentioned above.

THE ARMY AND THE GREAT WAR

The total number of men recruited in the three Kingdoms from Aug. 4, 1914, to Nov. 11, 1918, was 4,970,902. The contributions of the various countries, and the percentage of enlistments to population, were as under—

	Numbers Recruited	Percentage of Total Population	Percentage of Male Population
England	4,006,198	11.57	24.02
Wales	272,924	10.96	21.52
Scotland	557,618	11.50	23.71
Ireland	134,202	3.07	6.14

The number of men granted exemption was 2,741,988, of whom 2,169,707 were classed as in reserved occupations.

At Oct. 1, 1918, the aggregate strength of the Army including the Territorial Force, but exclusive of Dominion and Indian troops, was 3,838,265, of whom 147,738 were officers. The maximum strength was attained at the beginning of 1918, when the total stood at 3,887,649—154,777 officers and 3,732,872 other ranks.

The distribution of the Army on Oct. 1, 1918, was as follows—

	All ranks	All ranks
Home	1,427,069	Egypt 199,842
Colonies	16,995	Mesopotamia 111,283

Italy	73,735	
Salonica	149,189	Total strength 3,838,265

Casualties in all theatres of operations from Aug. 14, 1914, to Sept. 30, 1919, totalled 2,471,122

	Officers	Other ranks
Killed	33,337	540,170
Wounded	74,082	1,569,387
Missing	9,362	244,814

Totals 126,781 2,354,371

Of the last category 5125 officers and 149,093 men, reported as prisoners of war, were released.

The Official Termination of the War when all Treaties of Peace had been ratified by the respective Governments, was Aug. 31, 1921.

COST OF THE GREAT WAR

In the House of Commons the Chancellor of the Exchequer (Mr. S. Baldwin) gave the following figures showing the cost of the Great War to the United Kingdom and the War Loans to the Allies and Dominions—

EXPENDITURE DURING THE WAR

The figures are only available for complete financial years. The Exchequer issues between April 1, 1914, and March 31, 1919, were £9,590,000,000, and the money was raised approximately as follows—

From direct taxation	£1,820,000,000
From indirect taxation and other sources of revenue	920,000,000
By borrowing at home	5,500,000,000
By borrowing abroad	1,350,000,000

WAR LOANS

(Excluding relief and other Post War Loans)

	Capital only	Interest to March 31, 1922
To France	£453,000,000	£584,000,000
To Italy	382,000,000	503,000,000
To other Allies	659,000,000	841,000,000
To Dominions	150,000,000	150,000,000
Total	£1,644,000,000	£2,078,000,000

OTHER COSTS

Mr. Baldwin also stated that Great War Pension expenditure in the United Kingdom from Aug. 1, 1914, to March 31, 1923, amounts to £470,000,000, with an estimated capital liability from April 1, 1923, of £822,000,000. Votes for Mandated Territories from April 1, 1919, to March 31, 1923, amount to £153,000,000. Other expenditure to March 31, 1923, resulting from British participation in the Great War includes—

Unemployment	£400,000,000
Housing	225,000,000
Liquidation of War Commitments—	
Railway and Canal agreements	203,000,000
Ministries of Munitions and Shipping	36,500,000
Compensation for damage by enemy action	5,000,000
Coal mines deficiencies	48,000,000
Bread subsidy	101,500,000
Relief &c, loans	33,000,000
Occupation of Constantinople	20,000,000

GREAT WAR CASUALTIES, 1914-1919

British Empire

	Deaths	Wounded
Gt. Britain and Ireland	743,702	1,693,262
Canada	56,625	149,732
Australia	59,330	152,171
New Zealand	16,136	40,729
South Africa, Newfoundland and Colonies	8,832	15,153
Total, Dominions	140,923	357,785
India	61,398	70,859
Total, British Empire	946,023	2,121,906

Allied and Associated Countries

	Deaths	Wounded
France	1,393,388	1,490,000
Belgium	36,172	44,686
Italy	460,000	947,000
Portugal	7,222	13,751
Rumania	335,706	No record
Serbia	197,535	133,148
U.S.A.	115,660	205,690

Enemy Countries

Germany	2,050,466	4,202,028
Austria and Hungary	1,200,000	3,620,000
Bulgaria	101,224	152,400
Turkey	300,000	570,000

FRENCH ARMY LOSSES

Latest estimates completed and explained at the Statistical Society of Paris—

Number of men mobilised (of whom 475,000 were African and other natives)	8,420,000
Killed	1,228,300
Missing	265,088
Disabled, about	650,000
Wounded, over	800,000

Proportion of killed and missing France, 1 in 30, England, 1 in 66 Italy, 1 in 79, United States, 1 in 2,000 Germany, 1 in 35, Austria, 1 in 50 Russia, 1 in 107

GREAT WAR MEDALS

Medals Issued

The following Medals have been issued by the ADMIRALTY up to Oct 13, 1923 —

Silver

British War Medals	407 990
(Conspicuous Gallantry Medals	108

Admiralty	1 014,458
War Office	13,149,604
Air Ministry	199 517

11 14,363,579

AIR ESTIMATES

Air estimates take provision for 1923-24 for a net expenditure of £12,011,000 representing an increase on the figures for 1922-23 of £1,116,000. Provision is allowed for a Force of 33,000 of all ranks, as against 31,176 in 1922-23.

Details of the Net Estimate

Pay, &c., of the Royal Air Force	£3 508 000
Quartering stores (except technical), supplies and transport	1 351,000
Technical and warlike stores	3,780 000
Works buildings and lands	1 799,000
Air Ministry	648,000
Meteorological and miscellaneous effective services	179 000
Auxiliary and reserve forces	238 000
Civil Aviation	287 000
Half pay, pensions and other non effective services	131,000

Total £12,011,000

CIVIL AVIATION

RETURNS supplied voluntarily by civil aerial transport firms in the United Kingdom for the year 1922 show that for Great Britain and on the Continental route 17,634 flights were made the mileage totalling approximately 944,000 of which 717,000 was over regular air routes. The number of passengers carried was 36,326, and the weight of goods carried amounted to 214.6 tons. During this period 55 pilots were licensed for the first time and 216 licences were renewed, the number of licences current at the end of the year being 113. 151 aircraft were licensed for the first time and 90 licences were renewed the number of licences for aircraft in force at the end of the year being 170.

The following figures show the proportion of accidents to aircraft flying for hire or reward —

Accidents reported	2
Approximate machine miles per accident	420,000
Approximate machine flights per accident	8,800

In these two accidents one pilot was killed and one of the crew one passenger and one of the crew were injured. There were no casualties to third parties. In all British civil flying, whether for hire or reward or not three pilots were killed and two injured two crew were killed and one injured, two passengers were killed and five injured.

MEN UNDER ARMS

In the House of Commons the Under Secretary of State for War (Lt Col Guinness) gave the following comparative figures of men under arms in 1923 and 1922 —

	1923.	1922
Great Britain	106,000	80,000
France	666,000	430,000
Germany	836 000	100,000
United States	86,000	137 000
Russia	1 300,000	900,000 to 1,300,000

The French figures are for 1921 those for the US include Air Force and Pensions those for France and Japan include Air Force

The Royal Air Force.

THE KING,

Chief of the Royal Air Force

The Air Ministry, Admiralty House, Kingsway, W C 2

The Air Ministry was established in 1918 to take over the control of the Royal Air Force which was formed by the amalgamation of the Royal Naval Air Service and the Royal Flying Corps. The Air Force (Constitution) Act 1917 provides for the administration of matters relating to the Air Force and to the defence of the Realm by air to be vested in the Air Council.

In addition the Air Navigation Act enacts that the purposes of the Air Council shall include all matters connected with air navigation.

THE METEOROLOGICAL OFFICE

The Meteorological Office was established as a Department of the Board of Trade in 1864 (changes have been made from time to time in the management and in 1923 the Office was attached to the Air Ministry). The control is vested in a Director and Committee appointed by the Air Council. The Gaseous Committee of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes:—The collection and discussion of meteorological observations from oceans and land areas all over the world; the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the British Rainfall Organisation was transferred to the Meteorological Office in July 1923.

Chairman of Meteorological Committee, The Duke of Sutherland (Under Secretary of State for Air)
Director of Meteorological Office, G. C. Simpson, M.A., D.S.O., D.S.C.

Assistant Directors, C. Chree, D.S.C., F.R.S., R. G. K. Lempfert, M.A., Lt. Col. F. Gold, D.S.O., F.R.S.

Superintendents, Commr. I. A. Brooke Smith, M.A., R.N.R. (Marine), Capt. D. Brunt, M.A. (Army), R. Corless, O.B.E., M.A. (Climatology), J. S. Dines, M.A. (Aeronautics), Capt. F. F. Watling, M.A. (Astronomy), Commr. L. G. Garbutt, M.A. (Naval), Maj. A. H. R. Goldie, M.A. (Local centres), A. Crichton Mitchell, D.S.C., F.R.S. (Scotland), J. S. Owens, M.A., M.Sc. (Advisory Committee on Atmospheric Pollution), F. J. W. Whipple, M.A. (British Rainfall Organisation).

Superintendents of Observatories (Central, Kew), C. Chree, D.S.C., F.R.S.

Magnetic (Eskdalemuir), A. Crichton Mitchell, D.S.C., F.R.S.

Western (Valencia co. Kerry), L. H. G. Dines, M.A., M.Sc.

Aerological (Benson, Oxon), W. H. Dines, F.R.S.

OCTOBER STORMS—The unusually stormy character of the weather experienced in October on the South Coast of England is reflected in the official statistics issued at the Brighton meteorological station. The total registration of sunshine for the month was 95.6 hours, as against the average of 129.8. This is the lowest registration since 1918. The best day's record was 8.5 hours, and six days were sunless. The highest temperature did not exceed 64.4°, and the average maximum for the month was 58.1° as compared with an average for 46 years of 62.3°. In 1923 the average for October was 64.4°. Rain fell on twenty occasions during October, the total measurement being 6.78 in., as compared with the average of 3.45 in. These are the highest figures since 1909, when the total was 8.12 in.

The Church of England.

THE NATIONAL ASSEMBLY

12, Dean's Yard, Westminster, S.W. 1
(Hours 10 to 5)

UNDER the *Church of England Assembly (Powers) Act 1919* there is a National Assembly to deliberate on all matters concerning the Church of England—not to deal with spiritual doctrines or the duties of the Ministry, but with the framework and rules within which the Church works. The Act gave power to set up an Assembly consisting of three Houses, composed of the Bishops the Clergy and the Laity respectively. The first two Houses consist of the Convocations of Canterbury and York of which the respective Upper Houses form the *House of Bishops*, and the respective Lower Houses the *House of Clergy* the *House of Laity* comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the lay members of the Diocesan Conference, which consists of representatives elected by members of the Church of England on a roll prepared in each parish.

The *Church Assembly* is free to discuss any proposal concerning the Church of England and to make provision in respect of such matters but where this includes Parliamentary sanction for any alteration contemplated this authority is to be sought in the statutory manner. It is specially provided that any innovation touching doctrinal formulae or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rights thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church or otherwise of religious or public interest, but the Assembly may not issue any statement purporting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right of their episcopal office.

Parochial affairs are managed under the Act by Parochial Church Meetings of parishioners who are full members of the Church of England and by Church Councils elected by such meetings.

Central Board of Finance.—Receipts in 1922 amount to £66,079, of which sum diocesan contributions accounted for £47,417. Payments reached a total of £121,797, leaving a debit balance of £55,718. Below are the principal details of expenditure:

Training	Ex Service and civilian	£82,122
Religious education		20,452
Maintenance		126
Organisation, &c., committees		2,059
Representative bodies		5,980
Central Board expenses		7,803
Other payments		2,125

Total expenditure

£121,797

Total receipts

66,079

Deficiency

£55,718

General Statistics.—The number of baptisms in 1921 was 544,901, the Easter communicants in

the various English Dioceses numbered 2,212,600. The total gross income of 12,597 incumbents was £6,176,497, including £186,177 contributed as Easter offerings. The stipends of the assistant clergy were £1,065,142. The amount of voluntary parochial contributions in the 38 dioceses of England was £6,466,096, and the total from all sources £9,300,737.

Meetings in 1924.—The Assembly will meet in 1924 as follows:—Feb. 11 to 15 June 30 to July 4, Nov. 17 to 21.

OFFICERS OF THE ASSEMBLY

Chairman, The Archbishop of Canterbury
Vice Chairman, The Archbishop of York
Treasurer, Col. Sir R. Williams, Bart.

PLACES OF WORSHIP

On Dec. 31, 1921 there were in England and Wales the following Churches and Chapels of the Established Church and Registered Buildings in which Marriages could be legally solemnized:—

Established Church	16,126
Wesleyan Methodists	4,273
Congregationalists	3,056
Baptists	2,809
Primitive Methodists	1,997
Roman Catholics	1,485
United Methodist Church	1,262
Calvanistic Methodist	1,010
Presbyterians	451
Unitarians	199
Salvation Army	186
New Church	60
Catholic Apostolic	48
Countess of Huntingdon's	42
Others	1,227
Total	34,267

DIOCESES OF THE CHURCH OF ENGLAND

The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to retain in lieu of fixed annual money payments estates estimated at that time to produce the same annual income.

ST PATRICK'S NATIONAL CATHEDRAL DUBLIN

Dean and Ordinary Very Rev Charles Thomas (Ovenden), D.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (117, 208 clerical and 416 lay)

Honorary Secretaries Ven L A Pooler D.D. J A Macconchy, Major F H C Wellesley and Rev C K Irwin D.D.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A F Maude, 52 St Stephen's Green F Dublin Asst Sec Canon R A Kerran D.D.

By the Act of Union 1800 the Church of Ireland was united with the Church of England and the Sovereign, as one of its members supreme governor on earth. By the Act of 1869 this union was reversed and on Jan 1 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church but also took away her endowments nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum) the right to claim churches in use for divine service the right to buy the See and Glebe Houses (with garden and outlying) and £500 000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons viz.—The Bishop 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY composed of the Archbishops and Bishops 13 clergyman and 26 laymen, chosen by the Diocesan Synods, with 13 co-opted members (clerical or lay). This body holds the property of the Church and administers its funds, subject to the General Synod.

The first property it held was the capital sum £758,075 representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500 000 compensation for private endowments. The commutation capital on Dec 31, 1922, was only £78 612, charged with annuities to 24 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,992,856 made up of Commutation £78 612, Private Endowments £342,470 Parochial Sustentation £6,737,416 Episcopal Sustentation £561,731 General Synod Funds £650,926, and Miscellaneous purposes £1,993,161.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £9,200,019. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £338,220. The total amount of disbursement for stipend paid by parishes 1922, was £113,793, and the total amount paid for stipends under Diocesan Schemes was £344,607.

The number of members of the Church of Ireland, by the census of 1911 was 524,375, or 12.0 per cent of the entire population.

The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the Universities and lay representatives from the Royal Burghs. It is presided over by a Moderator (chosen annually by the Assembly) to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown) who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are about 1,888 ministers and licentiate engaged in ministerial and other work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland. The number of communicants at the close of 1922 was 751,870. The sum of £767,424 was raised in 1922 for church and missionary purposes. Within the last 50 years 503 chapels, at a cost for stipend of over £2,400,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,462. There are in addition 241 churches and mission stations, in all of which worship is regularly conducted.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature and should be altered when they began to foster superstition. Presbytery was settled in 1590.

The restoration of the rights of the Bishop, civil and ecclesiastical, was however, sanctioned by the General Assembly of 1650, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI alarmed the people and the attempt of Charles I to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant* and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. 11) the Church of Scotland was secured in its Presbyterian form and the very first official act of a sovereign of the British Empire on his accession is to take an oath to maintain inviolably this settlement. In 1922 Parliament passed the *Church of Scotland Act 1922*, to declare the lawfulness of certain articles declaratory of the constitution of the Church of Scotland. The articles have been framed with a view to facilitating union among Presbyterian Churches in Scotland. A committee, appointed by the Secretary for Scotland (under the Presidency of Viscount Haldane) enquired into the question of endowments, with a view to legislation in regard thereto, and legislation on the lines of that Committee a report is likely to follow.

LORD HIGH COMMISSIONER Lord Philipstone

MODERATOR (1923), Rev George Milligan D.D.

Principal Clerk, Rev David Paul, D.D. Edinburgh

Deputy Clerk, Rev J. A. McClymont C.B.E., D.D.

Procurator, William Chree K.C.

Agent, A. L. Menzies W.S., 54 Castle St., Edinburgh

Parliamentary Solicitor, A. H. Spens, London.

OTHER PRESBYTERIAN CHURCHES

(1) *The United Free Church of Scotland* was formed by the Union on October 31st 1900 of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries, and 2 Continental Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1921, there were 1,282 congregations and 42 preaching stations. The total membership was 531,849, and there were 2,038 Sunday Schools, with 127,817 scholars and 22,935 teachers. In 17 Foreign Mission Fields there are 399 European Mission Agents and 5,122 native pastors evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,455,655 at home, and £201,602 abroad.—*Moderator (1923-4)* Rev Principal Cairns, D.D.—*Offices*, 121 George Street, Edinburgh, and 238 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland*—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 439,876. The largest of these, under the superintendence of the General Assembly, consists of 35 presbyteries, 609 ministers, 559 congregations, with 108,104 communicants 91,659 families, 7,496

Sabbath school teachers and 102,206 scholars. During the year 1922 23 this branch contributed by congregational effort £372,676 for religious charitable and missionary purposes. The total income for the year for all purposes was £466,170. It possesses two Colleges with power to confer Theological Degrees, comprising a staff of 12 professors and 2 lecturers and has 32 ministerial with 3 medical and industrial missionaries in foreign parts.—*Moderator*, Rt. Rev George Thompson, D.D. *General Secretary*, Rev W. J. Lowe, D.D. Church House, Belfast.

(3) *The Presbyterian Church of England* has 12 presbyteries, 350 congregations, 9 preaching stations and 84,462 members. It has a Theological College (Westminster College, Cambridge), and supports 89 missionaries abroad, including 41 women. In 1922 the amount raised for all purposes was £404,065.—*Church Offices*, 15 Russell Square, W.C.1. *Moderator (1923-4)*, Rev Prof Anderson Scott, D.D. *Gen. Sec.*, Rev W. Lewis Robertson, M.A. *Fin. Sec.*, Percy Graham. *Pubs. Office*, 21 Warwick Lane, Paternoster Row, E.C.4.

(4) The less numerous divisions are *The Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church, the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence directly or indirectly, to the efforts of the Revds John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS

1 *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference consisting of six clergymen and four laymen was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics are: Ministers 56,494, local preachers, 97,531, members and probationers, 10,386,972. Sunday schools, 94,857, officers and teachers, 922,361, scholars, 9,122,637, churches and other preaching places, 100,130. The conference is now composed in its Representative Session of 300 ministers and 300 laymen with a ministerial president and secretary at its head elected year by year. The Wesleyans are governed primarily by the Conference secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district over which a chairman is appointed by the Conference and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference which has the supreme legislative and judicial power in Methodism.—*Pres* Rev J Ferrier Hulme M.A. *Sec*, Rev Thomas Kirkup.

THE PRIMITIVE METHODISTS

2 *The Primitive Methodists* who sprang up in Staffordshire in 1810 under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called camp meetings, the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision and were in consequence expelled. They and their sympathisers banded together in a new body with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President* Rev G Armstrong.

THE UNITED METHODIST CHURCH

3 *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists which hitherto had been separate from and independent of each other. These were—

The Methodist New Connexion which owed its origin in 1797 to the Rev Alexander Kilham one of the early itinerating Wesleyan preachers. He demanded that the members of the societies and not the Conference should be constituted the source of all power in Methodism and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by

the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches which was itself an amalgamation of three different secessions—the Protestant Methodists formed in 1828 the Wesleyan Methodist Association which sprang out of a controversy in 1834 concerning the need for a trained ministry and the Wesleyan Reform Association founded in 1849 during a great agitation. A strong opposition to the leading Wesleyan officials was organised which found expression in Conference debates but more strongly in anonymous and bitter pamphlets which were widely circulated. On suspicion of being the authors and distributors of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907 when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed declaring the terms of union defining the constitution and doctrinal tenets and containing provisions for government and discipline.—*President* Rev Charles Pye *Secretary*, Mr I Growth.

INDEPENDENT METHODISTS

4 *Independent Methodists*—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.—*President* T Jones.

WESLEYAN REFORM UNION

5 This Union is Methodist in doctrine, Congregational in government, with if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties. *President*, Rev G E Stone.

FINANCES

Finances The *Wesleyans* raised in 1921-22 £301,381 to sustain their very extensive missionary operations. At the same time their Home missionary income was £53,447. The *Primitive Methodists* raised £2,113 for new chapels and the *United Methodist Church* £10,050 for their missions.

The number of Members is for the United Kingdom of Chapel and Scholars (Great Britain only)

The Calvinistic Methodist (Presbyterian) Church of Wales.

THE CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh speaking population. Its form of government being Presbyterian it is in federation with the Presbyterian Church of England the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany.

In 1922 the body numbered—churches 1,486 chapels and other buildings for Sunday school branches, 1,779, ministers and preachers 1,161 elders, 7,101, communicants 187,250 on probation, 1,801 Sunday school teachers and officers, 24,890, teachers and scholars, 189,202, adherents (including communicants), 319,484.

Contributions in aid of the Ministry in 1922 £206,487. For various religious purposes (including the ministry), £495,440.

One of the features of the Welsh churches is the Sunday school, which is attended by adults as well as children. The vernacular is the language used generally in these schools.

The English branch of the Church has 382 chapels and preaching stations, with 33,232 communicants and 85,131 adherents (including communicants). All the rest are Welsh.

The churches in Assam number 1,026 communicants, 60,088 adherents (including communicants), 67,117. The adherents in Brittany are few.

Moderator (South Wales) Synod, Rev. R. R. Roberts B.A. Cardiff (North Wales) Rev. E. O. Davies B.Sc., Llandudno.

Moderator of General Assembly, Rev. W. Jones Aberdulais.

Statistical Secretaries, Rev. D. E. Thomas Llanstephan and Rev. Richard Thomas B.A., Bontnewydd.

The Independents and the Baptists

THE INDEPENDENTS, OR CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales incorporated in 1902 and in 1920 nine districts were formed each under a Moderator. There are 51 county and other Associations in England and Wales with 4,701 churches and preaching stations containing 1,727,442 sittings, the number of ministers in the British Isles is 3,062. *Chairman of the Congregational Union of England and Wales, 1923-24*, Rev. Dr. A. R. Henderson. *1924-25* Rev. Arthur Pringle.

Secretary, Rev. Sidney M. Berry M.A. *Chief Clerk*, C. Stanciliff. *Office and Publication Department*, 22 Memorial Hall Farringdon Street E.C.4.

The *Courtesy of Huntingdon's Connexion* with 40 chapels and mission stations is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby.

Shelton Office, 41, Holborn Hall, Grays Inn Road, W.C.1.

The BAPTISTS are in all respects but one similar to the Congregationalist; they have the same form of Church government and differ but in one point of practice—viz. the Baptism by immersion of believers only. Like the Congregationalists they are for the most part grouped in associations of churches and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were in 1922 4,173 chapels and 2,039 pastors. The members numbered 404,797. Sunday school teachers 58,114 and Sunday scholars 523,805. In the United States the members alone number 7,966,837. *President of the Baptist Union 1922-23*, Rev. W. E. Blomfield, D.D. *Secretary*, Rev. I. H. Shakespeare D.D. *Office*, Baptist Church House, Southampton Row, London W.C.1.

Minor Religious Denominations

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. S. H. Mellone, D.Sc., Essex Hall, Essex Street, W.C.2. The Brethren (divided into two bodies, "Open" and "Exclusive") number about 80,000, of whom five eighths belong to the "Open" body. The Society of Friends (Quakers), consists of 19,027 members and has 384 places of worship in Great Britain with 26 places of worship in Ireland and 1,281 members. *Central Office (Great Britain)*, 126 Bishopsgate E.C.2 (Ireland), 6 Eustace Street, Dublin. The Churches of Christ have 14,277 members and 186 churches in the British Isles with 159 Sunday Schools, 1,759 teachers and 16,811 scholars. The Marvanian Church (Office), 28 Ketter Lane, E.C.1, has in the U.K. 43 congregations and preaching stations, with 2,680 communicants. The Catholic Apostolic Church has above 80 churches, including a fine Gothic building in Gordon Square, W.C.1, the New Church (Swedenborgian), 75 societies with about 6,000 registered members. The Latter Day Saints (Mormons) have 82 churches. The Reformed Episcopal Church originated in the U.S.A. (1873) and uses a revised Prayer Book, it is now working on Evangelical lines in U.S.A., Canada, Great Britain and India. *Presiding Bishop* in

England Rt. Rev. F. Vaughan, D.D. Ch. Ch. Rector, Halesden N.W.10. *Assist. Bishop*, Rt. Rev. J. Louis Penn I.L.D., St. Jude's Church, Balham S.W. *Gen. Sec.*, Rev. F. I. Grosvenor B.A., Emmanuel Church, Warrington. The Old Roman Catholic Church. *Archbishop in Great Britain*, Most Rev. Bernard Mary Williams, The Edge, Stroud Glos. The Greeks (Bishop of Central and Western Europe and the United Kingdom), Archbishop Germanos. *Great Archimandrite*, Very Rev. C. Pagonis St. Sophia's Vicarage, Moscow Road W.2. have churches in London, Manchester, Liverpool and Cardiff. The Armenians have a church in London (St. Sarkis, Inverna Gardens) and in Manchester, the French, Dutch, Swedes and Swiss in London, Norwich and Canterbury, and there is a mosque for Moslems in London.

The Jews.—Among the inhabitants of the United Kingdom are about 300,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz, Chief Rabbi's Office, 4, St. James's Place, Aldgate, E.C.3. The Jews support their own poor. Their number throughout the world is computed at 14,000,000.

The Roman Catholic Church.

263

In *England and Wales* there are 4 Archiepiscopal and 13 Episcopal Sees. In *Scotland* 1 Archiepiscopal and 4 Episcopal Sees, in *Ireland* 4 Archiepiscopal and 12 Episcopal Sees. In the *British Empire* there are 38 Archiepiscopal and 127 Episcopal Sees, with 55 Vicariates and 13 Prefectures. The *Catholic Directory* of 1924 estimates the Catholic population of *England and Wales* (1921) at 1,965,787, *Scotland* 601,304, *Ireland* (Census figures 1911) 3,248,670. The figures for *India* (1921) are 2,256,454, *Ceylon* (1921) 367,350, *Canada* (1921) 3,383,663, *Australian Commonwealth* (1921) 1,275,661, *New Zealand* (1921) 93,023, and *Union of South Africa* (coloured pop. 1911, whites 1918) 90,764, the total for the *British Empire* being 14,825,210, and the Catholic population of the world is estimated at 324,328,408.

 H. C. H. Carpenter, (Economics), Prof. Graham
 Wallis

Organisation of Teaching

On January 1, 1907, University College was
 transferred to the University, of which it now
 forms an integral part in the Faculties of
 Arts, Laws, Medicine, Science, Engineering,
 and Economics. On January 1, 1902, King's
 College was, in respect of all its Departments
 except that of Theology, transferred to the
 University, of which it now forms an integral
 part, in the Faculties of Arts, Laws, Medicine,
 Science, Engineering, and Economics. The
 Theological Department of the College remains
 a "School of the University" in the Faculty
 of Theology. Other Institutions maintained
 by the University are the Brown Animal
 Sanatory Institution in Wandsworth Road,
 Goldsmiths College at New Cross, the Francis
 Galton Laboratory for National Eugenics at
 University College, and the Institute of His-
 torical Research in Malet Street.

TEACHING STAFF

The numbers of the "Appointed" and "Recognised Teachers in the several faculties are as follows—

Theology 0 and 20 *Arts*, 78 and 128 *Laws* 4 and 8 *Music*, 1 and 19 *Medicine* 28 and 350 *Science*, 77 and 214 *Engineering*, 10 and 78 *Economics*, 26 and 15.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton N.—*Principal*, Shadrach Hicks

TRADE SCHOOL FOR GIRLS AND WOMEN Barrett Street, Oxford Street W 1.—*Headmistress*, Miss E E Cox, B A

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W C 1.—*Headmistress*, Miss A Crawley, B Sc

WESTMINSTER TECHNICAL INSTITUTE Vincent Square, S W, with which is incorporated the **WESTMINSTER SCHOOL OF ART**—*Principal* J Stuart Kerr, B Sc *Head* (School of Art) Walter Bayes, A R W S

Polytechnics aided by the L C C

BATTERSEA POLYTECHNIC, Battersea Park Road, S W 1.—*Principal* Robt H Pickard, D Sc F R S

BOROUGH POLYTECHNIC, Borough Road S E 1.—*Principal*, J W Bispham, O B E, B Sc

CHRISSEA POLYTECHNIC, Manresa Road, Chelsea, S W 3.—*Principal*, S Skinner, M A

CITY OF LONDON COLLEGE, White Street, Moorfilds.—*Principal* Sidney Humphries, B A 11 B

NORTHAMPTON POLYTECHNIC, 280 St John Street, E C 1.—*Principal*, R M Walsley, D Sc

NORTHERN POLYTECHNIC INSTITUTE, Holloway Road N 7.—*Principal*, R S Clay, D Sc

REGENT STREET POLYTECHNIC, 309 Regent Street, W 1.—*Director of Education*, I Worwick, O B E, M Sc

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C A Keane, D Sc

WOOLWICH POLYTECHNIC, William Street, Woolwich, S E 18.—*Principal*, A F Hogg, M A

Technical Institutes, &c aided by the L C C

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS Creek Road Deptford, S E 8.—*Head Mistress*, Miss M E Stuart

BERMONDSEY SETTLEMENT, Farncombe Street Jamaica Road, S E.—*Warden*, Rev J Scott Lidgett, D D

COLLEGE FOR WORKING WOMEN 7 Fitzroy Street W 1.—*Hon Secretary*, Mrs H F Plant

CORDWAINERS TECHNICAL COLLEGE St Johns Lane Finsbury, F C 1.—*Principal*, F Y Goding

FINSBURY TECHNICAL COLLEGE Leonard Street, City Road, E C.—*Dean* A J Hale, B Sc

GOLDSMITHS COLLEGE New Cross, S E 14.—*Warden* T Raymond, M A

HEROLD'S INSTITUTE Drummond Road, Bermondsey (Branch of the Borough Polytechnic)—*Principal*, J W Bispham, O B E, M A

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.—*Principal*, Dr J Gordon Parker, F I C

LONDON SCHOOL OF PRINTING AND KINDRED TRADES, 61 Stamford Street, S.E. 1.—*Principal*, J R Riddell

MORLEY COLLEGE, 61 Westminster Bridge Road, S.E.—*Vice Principal*, Miss C L Brennan

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVANTS, Newcomen Street, Borough, S E 1.—*Lady Principal*, Miss E A Roberts

ROYAL SCHOOL OF NEEDLEWORK, Exhibition Road, S W.—*President* H R H the Duchess of York *Principal* Miss E Bradshaw

SAILORS HOME Dock Street E (School of Nautical Cookery)—*Secretary*, Payr Comm A F Loder, R D, R N R

SCHOOL OF WOOD CARVING 39 Thurloe Place, S W 7.—*Secretary*, J Bailey

TOYNBIL HALL, 28 Commercial Road, E 1.—*Warden*, I J Mallon, M A

WANDSWORTH TECHNICAL INSTITUTE High Street Wandsworth, S W 18.—*Principal*, D N Griffiths, B Sc, A M I M E

WORKING MEN'S COLLEGE, Crowndale Road, N W 1.—*Principal* Maj Gen Sir F B Maurice, K C M G C B *Supt*, C Chapman

Schools of Art aided by the L C C

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, Lee Road, Blackheath, S E 3.—*Principal*, J Howard Hale, B A

ST MARTIN'S, 107 Charing Cross Road W C.—*Principal*, E Allen, A R C A

In addition to the above schools there are Art Schools or Classes attached to all the polytechnics except the Northern Polytechnic, and to Goldsmiths College. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School 122-124 Kennington Park Road (see below)

II—OTHER LONDON INSTITUTIONS

Imperial College of Science and Technology,

South Kensington S W 7

Visitor H M THE KING

Chairman of Governing Body, The Rt Hon Lord Buckmaster

Chairman of Executive Committee, Herbert Wright

Chairman of Delegacy Walter T Prideaux

An Institution for the most advanced training and research in Science, especially in its application to industry. The Departments and Professors are—

Royal College of Science

Aeronautics L Bristow, O B E F R S (*Aeratum*) Sir Napier Shaw, F R S (*Meteorology*)

Mathematics A N Whitehead, F R S, H Levy (*Applied*) Physics H L Callender, C B K, F R S, A O Rankine, O B E, A Fowler, F R S (*Astro Physics*)

Technical Optics, F I Cheshire, O B E, A E Comady, *Optical design* A F C Pollard, *Mechanical design*

Chemistry H B Baker, O B E F R S, J F Ithorpe, O B E F R S (*Organic*), J C Philip, O B E, F R S (*Physical*)

Chemical Technology—Fuel and Refractory Materials W A Bone, F R S, *Biology* J B Farmer, F R S (*Botany*), E W McBride, F R S (*Zoology*),

V H Blackman, F R S (*Plant Physiology*), P Groom (*Woods and Fibres Technology*)

H M Lefroy (*Entomology*), S B Schryver (*Biochemistry*) *Geology* W W Watts, F R S, C G Cullis (*Economic Mineralogy*)

Royal School of Mines

Mining S J Truscott, *Mines Surveying*, L H Cooke, *Mining Geology*, W W Watts, F R S, *Metalurgy* H C H Carpenter, F R S, *Oil Technology* W W Watts, F R S.

SCHOLASTIC ASSOCIATIONS

THE HEAD MASTERS' CONFERENCE (*Secy*, W A
 Bulkeley Evans CBE MA, 5 Paper Buildings
 Temple, E.C. 4).—The object of the Conference is
 the discussion of educational questions which
 affect such schools as are in close connexion
 with the Universities of Oxford and Cambridge.
 In considering what Schools shall be included in
 the List or removed from it, the Committee will
 have regard to the Scheme or other Instrument
 under which the School is administered, the
 numbers in the School and in the case of Schools
 in Great Britain and Ireland, the number of resi-
 dent Undergraduates of Oxford and Cambridge
 educated at the School. The Committee may
 also take into account the proportion of boys in
 the School who having passed the School Cer-
 tificate or other equivalent Examination, are
 continuing their studies beyond that stage.
 The annual meetings are as a rule, held in De-
 cember, alternately (a) at some school repre-
 sented on the Conference, (b) at London or some
 University town.

THE INCORPORATED ASSOCIATION OF HEAD
 MASTERS, 29 Gordon Square, W.C. 1 (*President*
 (1923) R F Cholmeley CBE MA *Joint Hon*
Secs, W Jenkyn Thomas, M A, F R Hurlstone
 Jones, M A).—The qualification for membership
 is the holding of the head mastership of a
 Public Secondary school for boys in England or
 Wales administered under a definite form of
 public or corporate control by a governing body
 which has powers both to control the school
 finances and to appoint and dismiss the head
 master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND
 (*Secy*, J. Thompson, M A, The High School,
 Dublin), is similar to the I A H M.

ASSOC OF ASSISTANT MASTERS IN SECONDARY
 SCHOOLS, 29 Gordon Sq, W C 1 *Sec*, G D
 Dunkerley, B Sc

THE BOYS BRIGADE (Incorporated)

The senior boys organisation founded in
 1883 by the late Sir William A Smith. The object
 of the Brigade is attained by a combination of
 military and religious training. Every Company
 is connected with a Church or other Christian
 body. The total strength is 70,000 officers and
 boys *Sec*, R S Peacock, 34 Paternoster Row,
 E.C. 4

CHURCH LADS' BRIGADE

An organization especially valuable for helping
 a parish to keep the elder lads to their religious
 duties was founded in 1891 and combines a
 military method with moral and religious
 instruction. It is estimated that 1,000,000
 lads have had the advantage of the Brigade's
 training and to day there are 1,262 Companies
 throughout the Empire, with upwards of 60,000
 lads.—*Headquarters*, Aldwych House, Catherine
 Street W.C. 2. *Chaplain General and Secretary*,
 Rev Edgar Rogers, OBE, M A

BOY SCOUTS (Incorporated).

A Movement initiated and organised by Lieut.
 General Sir Robert Baden Powell, G C V O,
 K C B, Chief Scout, to develop good citizenship
 among boys by forming their character—training
 them in habits of observation, obedience and self
 reliance inculcating loyalty and thoughtfulness
 for others teaching them services useful to the
 public and handicrafts useful to themselves,
 and promoting their physical development and
 hygiene.

The Movement has taken root in all parts of
 the British Empire, and nearly every other
 country has adopted it.—*Imperial Headquarters*,
 25 Buckingham Palace Road, S W 1.

Girls' Secondary Schools.

295

All the Universities in the British Isles (see pp 265-273) admit women to membership and degrees

ASSOCIATION OF HEAD MISTRESSES — Head
 mistresses of Public Secondary Schools with
 at least 50 pupils are eligible for membership.
 Members are marked § in the lists on pp 315-
 320. A Conference is held annually in June.
President (1923-25) Miss F R Gray M.A., J.P.,
 41 Pauls Girls School Brook Green W 2.
Secretary Miss R Young 29 Gordon Square
 W C 2.

THE GIRL GUIDES

A movement incorporated by Charter in 1915,
 founded by Sir Robert Baden Powell in 1910
 and incorporated by Royal Charter, 1923.
President (since 1920), H.R.H. the Princess
 Mary (Viscountess Lascelles) *Chief Guide*
 Lady Baden Powell. The aim of the movement
 is to develop a better practical knowledge of
 housekeeping, mothercraft and citizenship in
 the girl of to-day. The method of training is
 to give the girls pursuits which appeal to
 them such as games, recreative exercise and
 badge tests which lead them on to learn
 for themselves many useful crafts training
 them in habits of observance, obedience and
 self reliance promoting their physical develop-
 ment and inculcating loyalty and thoughtfulness
 for others. The movement is non military
 non political non class and interdenominational.
 Its desire is to co-operate with educational and
 other bodies working to the same end, and
 holding the same principles. The number of
 Girl Guides is approximately 325,000 in the
 British Empire and the movement has spread
 to nearly every civilized country throughout the
 world its total membership being approximately
 500,000. *Imperial headquarters*, 25 Buckingham
 Palace Road London S.W. 1.

CIVIL LIST PENSIONS, 1922-23

A list of Pensions granted during the year
 ended March 31 1923 under the provisions of

THE BROTHERHOOD MOVEMENT, “to lead men
 and women into the Kingdom of God, to unite
 in Brotherhood of mutual help, to win the
 masses of the people for Jesus Christ, and to
 encourage the study of social service may be
 said to have been founded in 1873 as the outcome
 of the ‘Pleasant Sunday Afternoon’ movement
 initiated by John Blackham of West Bromwich.

The movement is non political and unsectarian,
 and connected with it are other societies—
 Sisterhoods, P.S.A., Bible Classes, etc. *President*,
 Ald E H Brown, J.P., Sunderland, *General*
Secretary, Rev Tom Sykes, *Organising Secretary*,
 Rev J W Taffey *Headquarters*, 37 Norfolk
 Street, Strand, W.C. 2.

Officer in Charge, London Ambulance Service
 A. R. Dyer, A.M.I.C.E., Chief Officer L.F.B.

Headquarters, 94 Southwark Bridge Rd., S E 1
 The Service is not, in ordinary circumstances intended for the removal of persons suffering from illness in private houses. Urgent parturition cases are removed from private houses, places of business, etc. to hospitals on the application of a duly qualified medical practitioner or a certified midwife provided that either a certified midwife or doctor accompanies the case

In addition to the above service and to that of the St. John's Ambulance and Brigade, an Electric Ambulance is maintained by the City of London

WEST END HOSPITAL FOR NERVOUS DISEASES, 73 Welbeck St., W. 1. *Sec.*, J. P. Wetenhall, B.A.

CONSUMPTION AND CHEST DISEASES

The number of deaths from tuberculosis in the United Kingdom and the rate per 100,000 of the population for each year since 1915 were as follows—

Year	Deaths	Rate per 100,000
1915	54,295	151.5
1916	53,858	152.9
1917	55,934	162.4
1918	58,073	169.4
1919	46,312	125.8
1920	42,545	112.8

The fall in the rate of 56.6 per 100,000 between 1918 and 1920 is attributable partly to the cessation of the War and consequent better living conditions and partly to the valuable work done by Local Government Authorities. The increase of facilities for the treatment since 1912 is as follows—

Year	No. of beds in public institutions	Dispensaries
1912	1,500	8
1918	6,749	375
1921	9,879	470

At the same time the beds in voluntary institutions increased from 2,800 in 1912 to 7,568 in 1921, a total increase of bed from 4,300 in 1912 to 17,447 in 1921.

BROMPTON HOSPITAL FOR CONSUMPTION. Visiting days, Tuesday and Friday, 2 to 3 Sunday, 2 to 4. *Sec.*, Frederick Wood. *Res. Medical Officer*, C. E. Redman, M.R.C.S.

THE BANKERS' CLEARING HOUSE

THE BANKERS' CLEARING HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collecting from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31, 1922, was £37,161,451,000, an increase of £2,230,908,000 as compared with the year 1921. The Town Clearing in 1922 amounted to £32,780,635,000, an increase as compared with 1921 of £2,512,421,000, the Metropolitan Clearing to £1,574,661,000, a decrease of £25,505,000, and the Country Clearing to £2,806,165,000, a decrease of £196,014,000. The establishment is managed by a Committee of Bankers—Chairman, J. W. Beaumont Pease, Deputy Chairman, W. F. Courthope Hon. Sec., R. Holland Martin, C.B., Acting Managers, A. E. Salt (Chief Inspector), Herbert J. Woodcock (Deputy Inspector).

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices and of eight Colonial companies (marked C), all of which transact business in this country

CLASS OF BUSINESS—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy holders (M) or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked O in this column and those having an Industrial branch are indicated by letters I. In such cases the Life funds are kept separately and are not liable for the claims of other departments. The Share (capital is usually liable for the claims of all branches)

FIGURES—These are taken from the latest annual accounts available at date of going to press and in the majority of cases refer to annual reports for the financial year ended 31 December 1922

LIFE FUNDS—The amounts of these funds, though interesting are not in themselves a sufficient indication of the financial stability of a company which cannot be judged unless liabilities are actuarially compared with assets

PREMIUM INCOME—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks

EXPENSES—The expenses of a Life office include in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½% of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading,

because, if the proportion of new business is large the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus

INTEREST—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is less Income Tax except where marked (G)—gross

VALUATIONS—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table and that interest will be earned at a certain rate. Various mortality tables are employed those most usual being known as the H^m and O^m and the corresponding Tables H^m(5) and O^m(5) which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and O^m(5) tables in conjunction are more stringent than the O^m table alone the H^m is more stringent than the American and with every table the lower the rate of interest assumed the more stringent is the valuation

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, *ss 6d*

Household goods therein, usually *ss*
Policies are issued by a number of companies embracing all risks incidental to private houses, in one amount.

Shops and Warehouses, similarly built and circumstanced in which no hazardous goods are deposited nor hazardous trades carried on, from *ss*

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from *ss*

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from *ss 6d*.

MOST fire insurance companies transact accident and miscellaneous business and if a strong company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require in place of dividing them amongst several companies. A number of fire offices are prepared to issue policies of an inclusive character for household purposes combining in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants employers liability, damage from storm or tempest, third party risks and other hazards. This can usually be arranged for an annual premium of *gs* per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

* Westcylan General † With profit business Without profit business

INCOME TAX ALLOWANCES ON PREMIUMS PAID

Where an allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities the allowance is deducted from the amount of tax on the 'taxable income' (i.e., that part of the income on which the tax is actually charged—the first £225 of the taxable income being charged at half the standard rate of tax, the remainder at the standard rate of tax). The allowance is made on the premiums paid, and is calculated at the following rates—one half the standard rate in

the £ on the amount of the premium paid on policies taken out since June 22, 1916 irrespective of the claimant's total income, and on policies taken out before June 22, 1916, a deduction of tax at one half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000 and at the standard rate in the £ where his income exceeds £2,000. The *Repayments of Income Tax* on account of Life Insurance Premiums are shown for a series of years on p. 363.

BONUSES.

The following table shows the average annual rate of Bonus declared on Whole Life and Endowment Assurances for £100. In each case the rate given is in respect of a policy effected at age 30 next birthday, and the Endowment Bonus is based on a Policy maturing at age 60. It will be noticed, in the case of the Offices whose Valuations are made quinquennially that the last Valuation included part of the War period when conditions were abnormal. Owing to the depreciation in securities, and the strain of War claims etc. some Offices were only able to grant a low rate of Bonus, whilst others declared no Bonus at all. At the next Valuation however these Offices should resume their pre War rate at least but intending Assurers would be well advised to ascertain the possibilities of this before effecting a Policy.

Office	Last Valuation	Annual rate of Bonus declared on Whole Life Assurances	on Endowment Assurances	Interim Bonus
Abstainers and General	1920	10s from Jan 1913 to Dec 1917, and £1 from Jan 1918 to Dec 1920		21s per annum

National Provident—Five years ending November 20 1922
North British and Mercantile—Two years ending December 31 1922
Norwich Union—Four and a half years ending December 31 1922
Royal London—Four years ending December 31 1920
Scottish Equitable—Five years ending March 31 1923

REPAYMENTS OF INCOME TAX ON PREMIUMS

(See also p 361)

The amounts repaid by the Income Tax Commissioners on account of Life Insurance Premiums during the years 1911-12 to 1921-22 are shown below. These amounts repaid are additional to the allowances made on assessment (see p 361)

Year	Number	Amount	Year	Number	Amount
1911-12	25,585	129,501	1917-18	37,929	537,761
1912-13	24,489	122,423	1918-19	37,920	551,073
1913-14	24,691	128,767	1919-20	38,787	585,637
1914-15	24,942	144,185	1920-21	—	679,337
1915-16	25,005	179,678	1921-22	83,981	784,433
1916-17	22,902	343,189			

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium or surrendered for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the 'Discounted Bonus' or 'Cost Price'

system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder. If, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are 'next birthday' unless otherwise stated.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death with profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually

high to commence with but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

†† Scottish Provident—Non medical examination up to £1,000 in suitable cases

†† Sun Life—Reductions granted to total abstainers—Non medical business is also transacted

†† University Life—Total Bonuses guaranteed to amount to at least 30/- per cent per annum for first 20 years and 35/- per cent per annum thereafter

††† Wesleyan and General—rates quoted are for nearest birthday

ENDOWMENT ASSURANCES

Endowment Assurances are very popular and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no

medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus paying life office. The selection of such an office is all important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death.

The following table shows the annual premiums for various ages at entry, charged by the offices named, to secure £100 with profits at the age of 55 or 60 or at death, if previous.

NAME OF OFFICE	SUM ASSURED PAYABLE AT AGE 55 OR AT PREVIOUS DEATH										SUM ASSURED PAYABLE AT AGE 60 OR AT PREVIOUS DEATH

	No of Policies.	Net Sums Assured.	No of Policies.	Net Sums Assured.
Assurances in Force as shown by the Dec. 31, 1925.	3,233,771	869,738,964	38,004,956	433,900,645
Returns published by the Board of Trade				

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to day of death. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half yearly. In some cases the quarterly rate is the same, in others it is a little less. Some offices grant special terms in case of impaired lives.

ADVICE REGARDING THE ASSURANCE

Apart from the immediate protection thereby given a life or endowment assurance policy if effected in a first class bonus paying company provides exceptional opportunity for the accumulative investment of savings. Policyholders can claim relief from Income Tax in respect of life assurance premiums not exceeding, in amount one sixth of their income where the death risk is involved.

The selection of the office best suited to require ments and likely to produce the best results should be carefully made but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. There are many good offices and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed

with in the case of new proposals but policies in these instances are usually subject to certain restrictive conditions of a temporary character.

INQUIRIES.—On receipt of an inquiry containing particulars of requirements (accompanied by 5s.) addressed to 'The Insurance Editor' 12 Warwick lane E C 4 advice will be given as to the system and policies best adapted to the special requirements. Inquiries should state the age at and date of next birthday. The following are suggested as the policies most likely to be required—

- (a) *Whole Life*—With and without profits
- (b) " "—With limited number of pay ments
- (c) " "—Reduced premium for first 5 years
- (d) *Endowment*—With and without profits
- (e) " "—Reduced premium for first 5 years
- (f) *Children's Insurances*—Educational, &c.
- (g) " *Non Medical* Insurances

INLAND POSTAL SERVICES

Within the British Isles including Channel Is., but not necessarily the Irish Free State area

Letters

Not exceeding 8 oz. 1½d.
For every additional 2 oz., or less ½d.

GENERAL REGULATIONS

UNPAID PACKETS (*letters newspapers post cards*) are charged double postage on delivery
UNPAID PACKETS double the deficiency

RE-DIRECTION.—(1) By agent of addressee
Letters post-cards, printed papers and news papers may be re-posted free not later than the day after delivery (Sundays and public holidays not being counted) and must not have been opened or tampered with. *Parcels* may be re-directed free of charge within the same time limits if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being regarded for this purpose as one Town Delivery Area) otherwise they are charged on delivery at the ordinary prepaid rate. *Registered packets*, which must be taken to a Post Office are re-registered free only up to day after delivery. (2) By the Post Office (not undertaken during temporary absence unless house be left empty or from clubs, hotels, &c.) Notice for re-direction of *letters, &c.*, must be given on printed forms to be obtained from the local postmaster or from postmen and signed by the person to whom the letters are to be addressed. The notice holds good for twelve months and may be extended by payment of 1s. for second 1s. third, and 6s. each subsequent year. Separate forms must be filled in for *parcels*, and for the (postal) forwarding of telegrams.

REGISTRATION.—All kinds of postal packets intended for registration must be marked 'Registered' in bottom left hand corner, and must be handed to an officer of the Post Office, and a receipt taken. *Parcels* (or the string with which they are tied) and *letters*, must be fastened with wax or other adhesive. The registration fee is 3d. exclusive of postage. With a further 3d. the sender may obtain advice of delivery. The latest time for registering is usually half an hour before the latest time for posting ordinary packets at Head Offices this may be done later for an additional 6d. late fee. *Unregistered packets* found to contain coin or jewellery, or any marked 'registered' and found in a letter box, undergo compulsory registration (3d.), carrying no compensation.

COMPENSATION for loss or damage is granted, though not as a legal right even if fee is paid and packing adequate.—The fees for compensation inclusive of registration are—Fee 3d., compensation up to £5, 4d., £80, and 1d. for each additional £20 up to the maximum 1s. 11d. for £400. Compensation up to £2 is given on (a) *unregistered parcels* (for loss only if certificate of posting is obtained at the time of posting) (b) *unregistered packets* conveyed by Express Delivery Service No. (1). Compensation in respect of money of any kind (*coin notes, orders, cheques stamps &c.*) is only given if particulars (for identification) are kept and the money is sent by Registered Letter Post in one of the special envelopes sold officially (see next page) the maximum compensation for coin is £5. Compensation for *jewellery watches &c.*, is only given on *registered packets* for *glass crockery greases, colour powders fish meat, fruit and vegetables* only when sent as *parcels*. Compensation is not given for damage to (1) eggs soft fruit liquids and semi liquids or exceptionally fragile articles in any case. (2) *registered packets* other than *parcels* unless "fragile, with care" is written above the address.

CERTIFICATE OF POSTING *unregistered parcels* free other *unregistered postal packets*, ½d.

EXPRESS DELIVERY SERVICE.—There are five services of which (4) and (5) alone are available on Sundays.—(1) By special messenger all the way from most offices which deliver telegrams inclusive charge *which must be prepaid* in cash or by stamps 6d. per mile or part of a mile with 1d. on each separate packet after the first, up to ten, the maximum also a special charge of 3d. on each packet over 1 lb. in weight. Live animals liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis*. (2) By special messenger after transmission by post. (a) from the ordinary delivery office if it is a telegraph office (maximum charge in London 6d., or if so marked, (b) "Express Delivery from Head Office in large provincial towns, and (c) in London "from Head District Office or "from G.P.O. Charges as before (without weight fee) in addition to postage. (3) In advance of the ordinary deliveries upon previous application by addressee (6d. per mile for one packet, and 1d. for every ten or less additional packets). (4) *see p. 381*. (5) By special messenger, of a message telephoned to an express delivery office (30 words for each express fee, besides telephone charges), (*see p. 381*). For (1), packets must be handed over the counter with "Express" clearly marked in left hand top corner, for (2) may be handed in or posted, and must be marked "Express" with a broad vertical line back and front. Waiting fees 10 minutes free, each additional 15 minutes or part thereof, 2d. For Sundays and Holidays, *see p. 381*.

RAILWAY LETTERS.—On payment of 4d. extra at a Parcel or Booking Office of most railways, during such hours as the station is open, whether on week days or Sundays, a letter not exceeding 2 oz. will be forwarded, and passed on from one company to another at a junction, by the next available train or steamship. The letter may be called for at the station of address, or posted there in the nearest letter box, or (except on Sundays) delivered as an Express Letter under Service 2a (or from the first Express

Delivery office it reaches), or (by telegraphing for a messenger to meet it) under Service 1.

DISPOSAL OF UNDELIVERED POSTAL PACKETS—Inland packets chargeable with a postage of 1d or more undelivered are returned unopened if bearing sender's name and address. Others are opened by the Returned Letter Office and returned to senders without charge. Packets containing neither sender's address nor any inclosure of importance are destroyed except parcels which if not applied for are generally disposed of after 3 months or if perishable are dealt with as waste. Packets chargeable with postage not exceeding 1d are redelivered to sender on payment of a second postage if his name and address with a request or return in case of non-delivery appear on the outside. Those without such request are disposed of. Foreign letters &c. undelivered in Britain are returned unopened after a short detention, to the countries whence received. Parcels are disposed of after a reasonable time for inquiry. If containing sender's address he is advised and parcel will be returned on payment of fresh postage. British packets undelivered abroad are returned to sender here on payment of charges due but for parcels see p. 372.

POSTE RESTANTE (solely for the accommodation of strangers and travellers and for three months only)—correspondence of any kind may be addressed as "to all Post Offices except Town St. Offices." It should have the words *Poste Restante* or to be called for in the address. If addressed to initials or fictitious names or Christian name only it is not taken in. It is at once treated as undelivered. All persons applying for *Poste Restante* letters must furnish sufficient particulars to ensure delivery to the proper person. *Poste Restante* letters, parcels &c. from abroad or letters at a seaport for an expected ship are kept two months others only one fortnight. After these intervals they are treated as undelivered (see above) unless bearing a request for return at end of the interval or some specified shorter period.

Letters Post

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, rabbits, meat, fruit and vegetables) (see p. 373).

Post Cards

Postage, 1d. The left hand half of the address side may be used for correspondence [the same holds for abroad]. Plain cards (maximum size $5\frac{1}{2} \times 3\frac{1}{2}$ minimum $4 \times 2\frac{1}{2}$ in.), like but not thinner than official cards may also be used both inland and abroad. Reply postage ad.

Printed Papers Post (see p. 372)

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books, printed commercial forms &c. Invoices, receipts, estimates, share transfer notices, applications for employment, deeds and agreements, circulars, Christmas &c. cards and picture post-cards. MS. proofs and examination papers with corrections, drawings or photographic prints (which may be on brittle or metal substance) together with the legitimate binding or mounting and anything necessary for safe transmission. The cover if any must be capable of easy removal and replacement for purposes of examination. It is without breaking, tearing, ungumming or cutting, and the packet must contain no communication in the nature of a letter, any writing must refer solely to subject matter of the document or consist of formulas of courtesy or of a conventional character not exceeding five words or initials.

Circulars in imitation typewriting are only admissible by this post under special conditions.

Newspaper Post (see p. 372)

For newspapers registered at the G.P.O.

The cover if any must be open at both ends and easily removable and copies should be folded so that title is readily inspected. No writing or printing is permitted other than the words with compliments name and address of sender request for return if undelivered and a reference to a page. Newspapers not registered at G.P.O. Christmas or special issues of registered newspapers or sup. journals apart from their ordinary publications, may be charged at printed paper letter or parcel rate.

Parcel Post

For bulky and heavy matter (see p. 372). The parcel should be marked "Parcel Post" and handed across the counter or given to a rural postman and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel. More than 11 lb. must not be accepted from one person by a rural postman on foot or bicycle without notice on the previous day and he may refuse parcels if already loaded. A postman with a cart must accept what he can conveniently carry.

Parcels to Northern Ireland, Irish Free State, Channel Islands or Isle of Man are liable to customs duty. The sender must except in last case declare contents when posting. 6d. customs clearance fee is charged on parcels from I.F.S. or Channel Islands delivered in Britain or N. Ireland.

Literature for the Blind

Papers, periodicals and books printed in special type and subject to certain conditions of postmark and postage. Blind literature with name and address of sender 1 lb. 4d. 5 lb. 1d. 6 lb. (maximum) 2d. Maximum size $2 \times 1 \times 1\frac{1}{2}$ ft. or if a roll 50×4 in.

STAMPS, ENVELOPES & POST CARDS &c.

POSTAGE STAMPS (used also for receipts, telegrams and certain Inland Revenue duties up to 2s. 6d.—for list of latter see p. 387) are sold of the respective values of $\frac{1}{4}$ d. 1d. $1\frac{1}{2}$ d. 2d. $2\frac{1}{2}$ d. 3d. 4d. 5d. 6d. 8d., 10d. 1s. 2s. 6d. 5s. and 10s. Books of 15 1½d. stamps, with 6 each of 1d. and ½d. 3s. Rolls of ½d., 1d. and 1½d. stamps (480 joined sideways, 500 and 1,000 lengthwise) are also sold at 2d. and 4d. extra. Stamps may be purchased at most offices between 9 a.m. and 7 p.m., and at any office open for telegraph business. Rural postmen carry ½d., 1d., and 1½d. stamps and registered letter envelopes.

REGISTERED LETTER ENVELOPES for foreign and inland letters with a ½d. embossed stamp (for registration and postage), are of four sizes: F $5\frac{1}{2}$ in \times $3\frac{1}{2}$ in 6d. each. G 6 in \times $3\frac{1}{2}$ in 5½d. each. H 8 in \times 5 in 6d. each. K, 11½ in \times 6 in 6½d. each.

LETTER CARDS with 1½d. stamp one 2d., 2, 3½d. 5, 9d.

POST CARDS impressed with a 1d. stamp single (usable for abroad). Thin—one, 1½d. 2, 3½d. 5, 5½d. 11 1s. Stout—one, 1½d. 5 6d. 10 1s. Reply (inland pattern 3½d. stamps)—1, 2½d. 4, 5½d., 11 2s. (foreign pattern, 5 1½d. stamps)—one, 3½d. 5, 1, 4d. 10, 2s. 6d.

EMBOSSED ENVELOPES (a) with 1½d. stamp "A" ($4\frac{1}{2} \times 3\frac{1}{2}$ in)—1, 1½d. 3 5d. 5, 8½d., 11 1s. 6d. Commercial ($5\frac{1}{2}$ in \times 3½ in)—1 1½d. 2, 3½d. 5 8d., (b) with ½d. stamp, ungummed. Commercial ("N") 1, 1, 1½d., 3 1½d. 5 3d.

NEWSPAPER WRAPPERS with ½d. stamp 1, 1½d. 2 1½d. 3, 1½d. 7 4d. with 1d. stamp 1, 1½d. 2, 3½d. 4, 5, 5½d. 8 5½d., 11, 1s.

Cut out and Spoiled Stamps

Embossed or impressed postage stamps (except of Queen Victoria's reign) cut out of envelopes, post cards, letter-cards, newspaper wrappers or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated or defaced in

(d) PATTERNS (*bond fide*), SAMPLES, AND SCIENTIFIC SPECIMENS, keys, fresh cut flowers, &c, $\frac{1}{4}$ d per 2 oz., minimum charge of 1d.

To the British Empire, Egypt and countries not in the Postal Union: the limits are Size, (a), (b) and (c) $3 \times 1\frac{1}{2} \times 1\frac{1}{2}$ ft., (d) $3 \times 1 \times 1$ ft. weight, generally 5 lb. To countries in the Union: Size (a) and (c) $1\frac{1}{2} \times 1\frac{1}{2} \times 1\frac{1}{2}$ ft., (d) $1\frac{1}{2} \times 6 \times 4$ in weight, (a) and (c) 4 lb., (d) 1 lb. If in the form of a roll the limits of size in all cases are (a) and (c) 30×4 in., (d) $1\frac{1}{2} \times 6$ in. Postage must be prepaid. Wholly unpaid packets are stopped. Double the deficit (minimum, 30 centimes gold equivalent) is charged on under paid packets. Regulations as to packing writing, &c. are much similar to those for inland packets.

Parcels from abroad

These are subject to British Customs examination and duties (if any), with a fee of 6d, must be paid before delivery to addressee.

Parcels sent abroad

Enquiries should always be made at a P.O., or the P.O. Guide consulted before packing. Parcels can be (and if containing coin, jewellery, &c, *must be*) insured for many countries but not registered. They are subject to Customs, and contents and value must be declared on special forms undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs Duty is allowed on British goods by the chief Colonies.) The Customs charges of Dominions and certain countries (not U.S.A.) can be prepaid by sender on depositing generally one fifth to one half of declared value, otherwise they are collected from addressee. *Packing must be substantial* and sometimes special kinds of packing are insisted upon. Certain articles are *prohibited*, among them letters nearly everywhere.

Delivery in many countries is only to a post office station, or custom house whence addressee who is notified of its arrival must arrange conveyance. In Belgium, France and Spain parcels are delivered by the railway companies. From most British possessions and many foreign countries (e.g. all India) under Cash on Delivery Service p. 376 except Falklands (Iceland, Switzerland, Tobago) including also U.S.A. and Dependencies but not Italy, Spain or Portugal an *undeliverable* parcel is returned at once at sender's expense unless when posting he instructed either its abandonment or its delivery at an alternative address. Warehousing fees and (rarely) the foreign customs duty are sometimes payable the return postage always.

To most countries the maximum length is 3 feet 6 inches length and girth combined 6 feet (New Zealand (lower rate) Pitcairn I., Tonga and Apia, 4 feet) for Paraguay, Portuguese Timor and St. Pierre and Miquelon the maximum length is 2 feet length and girth combined 4 feet. For Italy and Argentine maximum length 3 feet except where girth does not exceed 3 feet or 8 inches respectively when length may reach 3 feet 5 inches.

General Regulations Foreign and Colonial Post

DUTYABLE ARTICLES (except in certain cases) must be sent by Parcel or Insured Box Post.

REGISTRATION (except parcels and magazine post) is in force to almost all countries free 3d. Compensation on registered packets up to £2 is paid in the case of entire avoidable loss while in the custody of a country in the Postal Union (see p. 375) if claimed within a year.

INSURANCE (including, except for parcels, REGISTRATION) may be effected on packets to many countries (not U.S.A.) at the following rates—5d. for £12 and 2d. for every additional £12 up to 5, 11d. for £600. COMPENSATION up to £1 is also given on uninsured parcels to or from Egypt, Newfoundland, India, and the smaller colonies, with many larger foreign countries except U.S.A. if certificate of posting is produced. (Only securities etc., can be insured by letter post other valuable articles should be sent as insured parcels, or as insured boxes (see below).—

INSURED BOX POST—Jewellery and similar articles (not money bearer securities letters or commercial papers) may be sent in strong boxes by letter mail to Austria, Belgium, Denmark, Germany, Egypt, France, Germany, Holland, Hungary, Italy, Luxembourg, Palestine, Portugal, Spain, Sweden, Switzerland, East Afr. 2d. per box (minimum 6d.) maximum weight 2½ lb. size 12x6x4 in. Customs declarations must be filled in Insurance rates and limit as above.

CASH ON DELIVERY—A reciprocal service of cash on delivery of parcels has been established between the U.S. and the following: Algeria, Algeria, Bahamas, Bonaire, Barbados, Belgium, Bermuda, Brit. Guiana, Brit. Honduras, Brit. Somaliland, Ceylon, Corsica, Cyprus, Denmark, Egypt, Falkland Is. (Port Stanley only), Fiji Is., France, Guiana, (F.O.) Gibraltar, Grenada, Hong Kong, Iceland, India, Jamaica, Kenya, and Uganda, Iceland, Is. Fed. Malay States, Malta, Mauritius, Morocco (Tangier only), New Zealand, Norway, N. Borneo, Nyasaland, (F.O.) Rhodesia, N. (6 places), Rhodesia, St. Lucia, St. Vincent, Sarawak, (F.O.) Seychelles, Str. Settlements, Sudan, (F.O.) Sweden, Sw. Zealand, Tobago, Trinidad, Zanzibar. Fees for collection 4d. for Trade (large amount to be collected) not exceeding £1 with 2d. extra for each additional £1 of Trade (large up to the maximum which is £40 free & 6d.) where not otherwise shown in above list. Addresses have generally also to pay on delivery besides customs if sent in U.S.A. to 5d. fee (not payable) if Trade (large) cannot be collected at first or one alternative address parcel is returned at sender's expense unless abandonment is definitely requested.

INTERNATIONAL EXPRESS SERVICE—Delivery by special messenger of correspondence (locally including parcels

to or from certain countries (e.g. West and Central Europe (except Spain) and Union of S. Africa) or certain towns in the same has now been arranged 6d is paid by the sender the rest by addressee

Air Mail. Services change frequently latest information should therefore always be obtained from the nearest Head Office. Their general scope however may be gathered from the following notes showing services which have been in operation at one time or another during 1923 those marked * have been already discontinued at time of going to press. The hour of closing of mail at G.P.O. London is given and the latest time of delivery is shown after each destination. An unofficial note of proposed developments at the Croydon Aerodrome which should if carried out extend the facilities for Air Mails and Parcels will be found at the foot of p. 38.

(1) Every week-day 11.0 a.m. London to (a) Paris (evening) and most of France (next morn) also saving up to 24 hours for Spain Austria and Balkan Peninsula — (b) * (later altered to 6.0 a.m.) Brussels and Antwerp (aft. or even) — (c) * Rotterdam and Amsterdam (even) most of Holland (even or next morn) also saving up to 24 hours for Germany (N. and Central) Sweden Norway (exc. W.) Czechoslovakia Russia etc. — (d) Cologne (aft. or even for Rhine Army also for civilians if express) (e) Every week-day 6.0 a.m. London to (a) Rotterdam (aft. or even) (b) Cologne (even) — (b) Cologne (aft. or even) (c) (Air Fee 2d per oz.) Hamburg and Berlin (next morn same even if express) many other places in Germany (next morn) and saving up to 24 hours for Denmark Norway Sweden also (saving at present uncertain) for Czechoslovakia Austria etc. (3) Daily 7.30 a.m. Toulouse to Casablanca (morn of next day but one) and saving 2-4 days for Morocco (exc. Tangier and Spanish M.) Air Fee 4 oz. 3d 3/4 or 6d and 3d each further 3/4 or (4) Alternate Thurs. 8.0 p.m. Cairo to Bagdad (leath. day) saving up to 18 days for Iraq and Persia (N. and W.—Tehran Isfahan etc. as far as Bushire) Air Fee 6d per oz.

It should be noted that where ordinary mails are frequent and the air passage short (e.g. to France Holland and Belgium) time is saved by air mail only if packet reaches G.P.O. London before the closing of the ordinary mail (see p. 374) and that of the next following air mail. Air Mail letters which would arrive sooner if forwarded by the ordinary mail also so forwarded unless clearly marked otherwise.

The special Air Fee is 2d per oz. except where otherwise shown above. Except parcels (see below) any kind of packet can be sent by air mail registered or unregistered but cannot be insured. By Air Mail must be very prominently marked (preferably on special labels obtainable gratis) and the Air Fee prepaid as well as (if any) the express fee 6d (see preceding section). Special markings are necessary for services (3) and (4).

Air Parcels are accepted for (1) Paris only (not the rest of France) delivery by Handley Page Co. (charge, to addressee 1 2s 6d within 5 fr. without the city walls) Fee (inclusive of everything else) non-express 1s 6d to 4s 3d express 1s 6d to 6s. (2) Holland (any part) express only saving 2-3 days Fees (all inclusive) 3lb 3s 6d 7lb 6s 6d 11lb 9s

MONEY AND POSTAL ORDERS

The Chief Money Order Office is at Manor Gardens Holloway N 7

ADVICE OF PAYMENT 2d for inland, 3d for foreign and colonial orders (to certain countries) Payment may also be stopped Fee 4d

Inland Ordinary Money Orders

The poundage charged is for sums not exceeding £3, 4d., £10, 6d. £20, 8d. £30, 10d. £40 (maximum), 1s. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Customs, Excise and Inland Revenues (including Income Tax) if the official "notice to pay" is produced, or of Savings Certificates

Inland Telegraph Money Orders

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 2d. and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for postage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week days. They are also issued and paid in almost all parts of the Empire, in Egypt, and at the British Agencies in Morocco (T.P. 376 except Rabat) including Tangier. They are paid (but not issued) at 53 Canadian offices, in Iraq, and (to soldiers only) in Australia. They are issued with a counterfoil to be retained by the sender for every 6d up to 20s., and for 21s. Poundage 6d to 2s. 6d 1d., 3s. to 15s., 1 1/2d. 15s. 6d upward 2d. The name of payee must be inserted. They must be presented for payment within 3 months from last day of the month of issue, or a fresh poundage will be charged. Adhesive British Postage Stamps (not perforated, and not exceeding 3 in number) may (except for Canada) be affixed to the face of an order to increase its value by 1, 2, 3, 4 or 5 pence. Half pence are not paid.

Ordinary Money Orders Abroad.

These which are payable in nearly all countries should be taken out 1 or 2 days before despatch of mail. Poundage, £1 6d. £2, 1s. £3, 1s. 6d. and thereafter 1 3d. per £1 or part thereof. Limits of amount, £20 or £40. Period of validity 6-12 months.

Telegraph Money Orders Abroad

Only to certain countries (e.g., to Canada, India and U.S.A., but certain towns only in Australia, New Zealand South Africa Egypt and Palestine). Poundage at same rate as for Ordinary Money Orders abroad plus cost of official Telegram of Advice (at deferred rate if desired, in most British Possessions), plus supplementary fee of 6d. for Newfoundland and foreign countries 1s. for British Possessions (for Canada 6d. if the telegram is sent at full rates).

TELEGRAMS

Inland

Telegrams may be handed in at a telegraph office or, if prepaid, posted or handed to a rural postman. Rate throughout British Isles, 12 words or less 1s., each further word 1d. the address, which may be telephonic is charged for (an abbreviated address may be registered for £2 per annum). Payment in stamps affixed to the form by the sender. Original or re-directed telegrams, or replies, handed in on Sundays and (except in Scotland) Good Friday, or Christmas Day are charged 6d. extra. Replies may be prepaid up to 48 words, the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges 1d. Certified copy 6d., sometimes more. The charge includes delivery within 3 miles (1 in Irish F.S.) of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6d. per mile, calculated from the free delivery limit, to be paid by sender (in I.F.S. by addressee). Telegram forms are issued gratis.

Usual hours 9 a.m. to 7 p.m. larger offices 8 a.m. to 7 p.m. (see below and p. 382). For Sunday and Holiday telegrams, see above, below, and p. 382.

LATE FEES—A telegram may often be got through from an office which is open to one which may perhaps be closed for telegraphic business by payment of the following extra fee 1s. for the telegraphist 1s. for the messenger and 1s. an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1s. for the postmaster 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist.

COMPOSITION—Plain language &c. Latin or any modern European language is charged for according to the number of words. All other words or unintelligible combinations of letters are charged one word per 5 letters. The following count one word—(1) All names of towns and villages in U.K. (not of branch or sub offices or districts in towns unless in addition to street name). (2) All names of railway and coastguard stations (not in towns) with public telegraph. (3) Words ordinarily written as one or with hyphen including couldn't etc. (4) Names with prefix St. De. De la. O. Mac. but not hyphenated surnames (see each figure). (5) In initials count as two figures. (6) Each initial, except London Postal Districts (p. 374)—A—M—F—M—H—M. (in address) which are one word each group. (7) Signs of punctuation, and the symbols a/c. h/l. s/s. c/o. (count as one word or three figures). (8) Names of telegraph offices abroad if and written in the form in which they occur in the International List of Telegraph Offices.

NIGHT TELEGRAPH LETTERS in plain language for delivery (except on Sunday) by first morning post may be sent before midnight between towns whose *Day Telegraph Offices* are open always (see below) at 1s. for 36 words or less and 1d. per 3 words beyond 36.

TELEGRAPH OFFICES ALWAYS OPEN London—Central (Newgate St.) & West Strand & the following railway stations (nd) King's Cross (G.N.) London Bridge (S.E.) Liverpool Street (G.E.) Wakefield (Kirkgate) Worcester (G.W.) York.

Abroad.

In the following list the names of countries or places are followed first by the ordinary or Full RATE per word (minimum charge 10d.) from any part of the United Kingdom, whether transmitted by cable or by radio telegraphy (wireless). Various OTHER RATES are then given (indicated by signs referred to in footnotes).

Besides the *Imperial Cable* to Canada W. Indies, Australia New Zealand, etc., the State maintains several public wireless services to the Continent, as well as that from Oxford to Cairo (See p. 380).

Rules for counting of words are more or less as for inland. In address name of terminal office coming under class (6) p. 378 counts as one word. In plain language telegrams (which must be in roman characters) 18 letters in code 10 in cipher 5 is the maximum number counting as one word. *Prepaid Replies* (minimum 10d.) are allowed from most places but not at any Reduced Rate. The indication for this RP counting as one word must be paid for (RP) if urgent &c.

URGENT Telegrams or replies at three times Full Rates are allowed to or from all places or regions in the list except those followed by the sign *nd* and except by Marconi or North Atlantic Cable Co. Minimum charge 2s. 6d. the word. Urgent must be paid for where the Urgent Service is not available. *PREPAID* Telegrams are accepted for or to which tender which in the list the sign *p* occurs followed by the increase beyond ordinary rate.

REFERRED RATES (A) *Deferred Telegrams* in plain English (indication 100 charged one word) French (100) or sometimes language of country of destination (100) are accepted at (usually) half the Full Rate on condition that they may if necessary be deferred during transmission in favour of Full Rate Telegrams. This service applies to all regions places or rates in the list except (i) Europe (ii) those marked thus &. When the deferred rate is other than half the full rate it is given next after the sign *d* (Deferred rates are not available for radio telegrams). (B) *Week-end Letter Telegrams* (TWT) normally delivered on Monday morning must reach Central Telegraph Office London by Saturday night. *Night Letter Telegrams* (NTL) may be handed in at any time of any day for delivery next morning (unless it be Sunday). *Day Letter Telegrams* (DLT) are for delivery not less than 48 hours after acceptance. The indication (shown above) must be paid for (one word) according to the kind of letter telegrams sent. The signs *nd* & *nd* in the list below follow the full rate of the countries or to which tender which services extend the two prices following the sign denoting (i) the cost of the first 20 words or less (ii) the rate for each further word.

RADIOTELEGRAPHIC SERVICES

The principal Radiotelegraphic Services are
—*Trans Atlantic* for all parts of America, for
Australia and New Zealand to *Cauro* (for
Egypt and beyond) to *Amsterdam*, *Berlin* and
Cologne *Berne* *Bucarest*, *Budapest* (including
the service via *Yugo Slavia* for Greece and
Greek Islands) *Hapsal* (Esthonia) *Madrid*,
Paris, *Posen* (Poland and Danzig), and *Sarajevo*
(Yugo Slavia and Bulgaria). The rates for these
are included in the foregoing table of rates for
Telegrams Abroad.

Radiotelegrams (i.e. to or from Ships at sea) §§

The Address of a radiotelegram should contain name
of addressee, of ship and of coast station to be used.
Messages for H.M. Navy must have *Warship* before
the ship's name and the name of coast station must be
given (if unknown it may be obtained from the
Secretary Admiralty London by reply paid telegram
on letter stating proposed date of sending of message).
In the case of the Mercantile Marine Steamship
must precede the name if confusion with name of some
telegraph office is otherwise possible but if name of
nearest coast station is uncertain the message may yet
be got through by other means. Notes 1 and 2. *First*
payment of Replies is admissible except for messages
through Athens or St Pierre and Miquelon. *Counting*
of words etc. is subject to the rules for ordinary Tele
grams Abroad. The name of ship and if written in
standard form name of coast station count as one word
each.

The Cost of Transmission (per word) from any telegraph
office is the sum of three rates: rate for cable or other
message to the coast station (denoted by £ below) coast
station charge (c) and ship charge (s). The charges and
services may be classified as follows:—

A. ORDINARY DISTANCE. 1. Through Post Office coast
stations* (range about 200 miles). (i) 1 (c) 1d. Ship
charges (s) are as follows:—(i) H.M. Navy nu (ii) ships of
most nationalities including British 4d. (iii) Argen
tine Belgian Dutch Greek Norwegian Portuguese
and Swedish ships 4d. but with a minimum equal to
the charge of 10 words (6d.). (iv) Spanish ships 3d. with
a minimum equal to 10 words. 2. Through coast stations
abroad (i) = rate for full rate telegram to the country
in which coast station is situated. see list under heading
Telegrams Abroad p 378. (c) which varies from 2½d
to 3d is given in the same list at the end of each
reference to a country possessing a coast station after
the sum c (see Note 3). (s) is the same as given under
4.1.18.

B. LONG DISTANCE COMMUNICATION with ships beyond
range of ordinary stations. 1. Via P.O. station. *Devises*
radio (range about £ 500) to or from certain ocean liners
(at present about 200 rates same as under A. 1. 2. Via
P.O. station. *Ozfordradio* (which must appear in
address) at night only (range about £ 500 miles or more)
to the above-mentioned 200 liners as well as 317 others.
The ships are unable to reply to this station rates
(i) + (c) = 1s 3d. (s) = same as under A. 1. 3. Via

§1 The term Radiotelegram as used in the official
Postal Guide denotes only a message to or from a ship
at sea, and includes no other kind of radiotelegraphic
message.

* (Villarocta, Fishguard Grimsby Land End Malin
Head Nilton North Foreland Forthpatrick, Seaforth,
Valencia Wick.

§ No Deferred Rate. ** Reduced Rates (A) p 378
† Via Marconi 3d (def rate 1½d) less
‡ Via Marconi 4d (def rate 2½d) less
§ Via Brazilian Land Lines 3d (def rate 1½d, less
so Via Marconi 2d less than full rate (no def rate).
c m—Coast-station charges. See Radiotelegrams
below.
d, p—See Deferred Telegrams and Preferred do
respectively (p. 378).
nu—See Urgent Telegrams p 378.
tr—TR charged as one word must appear in
address.
tut dt—Letter Telegrams. See Reduced Rates
B. p. 378.
vm, v—Denote via Marconi via Indo European
Co respectively.
w—Via P.O. Wireless -/3 (def rate where any 4/d)
less
y—Denotes rate via Yugo-Slavia

Marconi Station, Clifdenradio (which must appear in address) at night only (range 2000 miles) to ships which are beyond range of ordinary P.O. coast stations and are not fitted with apparatus capable of receiving from Oxford or Devizes. Rates as under B 2 & 74d. *Louisburgnovascotia* (which must appear in address) to those of the 303 liners mentioned under B 1 which are in the N Atlantic services when out of range of Devizes rates (i) = 9d (c) = 6d. (s) = same as under A 1 (s)

C REDUCED RATES FOR CROSS-CHANNEL AND SHORT VOYAGE SHIPS 1 Through home stations the inclusive (inland coast and ship) rates per word are as follows in each case subject to a maximum charge equal to that for 10 words (a) to 222 such ships 3½d (b) to 36 ships 5½d (c) to Mecklenburg P.I.A. Orange Nazeau PDE Prins Hendrik Princess Juliana PDE 2½d (d) to Batavia II III IV V VI 3d (e) through foreign coast stations for the same groups of vessels respectively (a) Charges calculated as under A 2, but ship charge is reduced to 1d, with minimum of 10d (Exceptions in group (a) are (i) To the 8 Dover Ostend Packets through Antwerp or Ostend $t = 2½d$, $c + s = 2d$ for 10 words or less 3d each further word (ii) To 17 cross-Channel boats through Boulogne Cherbourg or Havre $t = 3½d$, $c = 1½d$, $s = 4d$ (b) Charges calculated as under A 2 but ship charge is 1½d with a minimum of 1s 3d (c) and (d) Through Scheveningen Haven the all-inclusive charge per word is (a) 10 words or less 1d 1½ (2½d per word) over 10 words 2½d per word (d) 10 words or less (ss 9d) + (2½d per word) over 10 words 7d per word

NOTE 1—In the case of services A 1 and B 1, but not C 1 the word Wireless may be substituted for name of P.O. coast station

NOTE 2—Messages intended to pass through ordinary distance coast stations in Newfoundland or east coast of Canada (not Lehigh) may have Montreal in place of the name of any particular station similarly those for coast stations on east coast of Canada (except Cape Race) or either coast of U.S.A. may bear New York. The total inclusive charge in both cases is 1s. 11d per word.

NOTE 3—If m follow the coast station charge shown after c in but not otherwise this charge is subject to a minimum equal to the cost of 10 words but if a number follow the m , then the minimum is equal to the cost of that number of words. Thus (c-7m 8d) denotes a coast station charge of 7d per word with a minimum of 10d.

SUNDAY AND HOLIDAY ARRANGEMENTS

On SUNDAY throughout the U.K. no Parcel Post Money and Postal Order or Savings Bank business is transacted nor is there any delivery even to callers of letters etc except by Express Services (4) and (5) below. In London all but 25 post offices are closed. These open in the morning 26 of them (including those mentioned in the next paragraph on p 378 or on pp 24-5, also in evening (stamp telegrams). About 63 stations, chiefly S. of the Thames besides those on p 378 send telegrams, mostly at train times. There is a general collection for Mon mails and deliveries between 10 p.m. and midnight. Correspondence for Sun night mails, if not posted in time for last Sat. collections, must bear an extra 2d stamp and be either (a) posted in special boxes at one of 24 among the 25 offices already referred to as open on Sundays or at one of 5 other offices up to times ranging from 4.45 p.m. to 6 p.m. (it may

be registered at the counter of the same 24 offices not less than 5 minutes before closing of box) or (b) posted in special boxes up to 8 p.m. at Cannon St. St. Pancras Victoria (S.E.) or (c) posted at sorting carriage at the appropriate terminus (among these mentioned under London Postal Arrangements Late Fees p 374 up to times ranging from 8.25 p.m. to 9.30 p.m. [registration may be effected at the sorting carriage up to the same times on payment of an additional late fee of 1s 6d.] Outside London all Head Offices and most country telegraphic Sub-offices open from 8.30-10 a.m. for stamps telegrams (Scotland 9-10 a.m.) but all town sub-offices and usually all non telegraphic offices are closed. Many railway stations send telegrams at train times. There is a collection and night despatch in most towns

EXPRESS SUNDAY DELIVERY (Service 4) is available only in and to London and a few Head Offices in the Provinces. The offices marked on p 378 together with the following in London complete the list G.P.O. W and S.W. District Offices and among Branch Offices (Camberwell Green Clapham Common Hammersmith Broadway Holloway Stratford and Swiss Cottage Packets (other than parcels) are accepted up to time of posting for general Saturday night mails fee is besides postage and usual express fees (calculated in London from G.P.O.—5d to 5s 6d). **EXPRESS DELIVERY** of a telephoned message (Service 5 p 374) is on Sundays restricted to the London Postal District, but if addressee is a telephone subscriber in the London Telephone Area a message reaching Central Telegraph Office London E.O. 1 on Sunday morning will be telephoned to him if the envelope be marked conspicuously. For Sunday telephonic delivery with a broad rectangular line back and front and if the usual postage be prepaid on the envelope and 3d per 30 words or part thereof be paid by stamps affixed to the enclosed paper bearing the message

CHRISTMAS DAY AND GOOD FRIDAY—In London there is one morning delivery of letters parcels &c on Christmas Day none even to callers on Good Friday. Offices open on Sundays are usually opened on these days also for the same kind of business but in some cases for shorter hours. Outside London. In Scotland business is as on week-days. In England and Ireland there is one delivery of letters and parcels no receipt of parcels and no express (Service 1) Offices open as Sundays

BANK HOLIDAYS—London. One morning delivery of letters and parcels. Collection of letters evening (from Head District and Branch Offices only) and late (general) parcels are accepted in the morning but are not despatched. Head District Offices (pp 24-5) open for most business except Savings ordinary M.O. P. Draft and Pension Office. Outside London. In Scotland business is generally as usual. In England and Ireland only one letter and parcel delivery and generally one despatch (early in rural districts) no Savings Bank ordinary M.O. P. Draft or Pension business is transacted. Smaller offices are closed the more important open in morning (Postal orders) some also in evening. Telegraph offices nearly all open 9.30 to 11 a.m. and generally at the same hours if any as on Sunday evenings

PUBLIC HOLIDAYS—In Scotland Telegraph as usual delivery only to 10 a.m. from rural sub-offices under Glasgow) other business as English Bank Holidays. One delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel M.O. P. &c and hours as on Sundays

WORLD'S LARGEST AIR STATION—The largest air station in the world is to be established at Croydon by the Air Ministry, the scheme involving the diversion of the road and the building of a railway station at the aerodrome, with electric trains to run to the terminal stations of the Southern Railway at Victoria and London Bridge. Some hundreds of acres are to be added to the existing aerodrome in order to provide a clear area for several large aeroplanes to alight or take off simultaneously, and steel and concrete hangars, in which the air expresses will be housed, are to be erected, together with addi-

tional bonded warehouses and customs sheds. A new hotel for air travellers is also to be provided, and separate platforms will be built for the arrival and departure of passenger air lines from and to different parts of the Continent of Europe. It is anticipated that factories and warehouses will be erected in the vicinity of the air station, so that advantage may be taken of the rapid transport facilities provided. These extensions if carried out as at present indicated, will undoubtedly increase the facilities not only for passengers but for letter and parcel mails.

382 Customs Tariff of the United Kingdom (1923-1924)

Showing the several Articles subject to Import and Export Duties in the United Kingdom, and the Duty levied upon each Article, according to the Tariff in operation upon the 1st day of November 1923.

ARTICLES	Rates of Duty	ARTICLES	Rates of Duty	ARTICLES	Rates of Duty
Import Duties	£ s d.	KEY INDUSTRY DUTY—<i>could</i>	£ s d.	Spirits &c.—<i>continued.</i>	£ s d.
Bees called Mum Spruce or Black Beer or Berlin White Beer or other preparations, whether fermented or not fermented of a similar character where the words thereof are or were before fermentation of a specific gravity—not exceeding 2255	36 gals 20 s 0	(Goods consigned from and grown produced or manufactured in British Empire exempt.)		In bottle, entered in such a manner as to indicate that the strength is not to be tested	5 s 5
Exceeding 2255	36 gals 23 11 0	Matches 1 for every 2000 on any number in a box not exceeding 80	0 s 5	Additional in respect of immature Spirits —	
Beer of any other description where the words thereof were before fermentation of a specific gravity of 2055	36 gals 5 0 6	Do in excess of 80	0 s 3 5	Not warehoused or warehoused less than 3 years	0 s 2 0
And so on in proportion for any difference in gravity		Motor Cars including motor bicycles and tricycles and accessories and component parts thereof other than tyres except cars for use as omnibuses or ambulances or for trade purposes an amount equal to 33 1/3 per cent of the value of the article		Warehoused 3 years and less than 3 years	0 s 2 5
CARDS LAYING doz packs	0 s 3 9	Watches at least 15 in including gramophones pianolas and similar instruments and accessories and component parts thereof an amount equal to 33 1/3 per cent of the value of the article		Warehoused 3 years and less than 3 years	0 s 2 7
CHOCOLAT Raw or kiln dried	cwt. 2 6 6	Whisky (including substances of like nature or use) of	0 s 8 3	Upon payment of the difference between the full or Preferential duty as the case may be, on Imported Spirits and the Excise Duty on British Spirits Imported Spirits may be delivered under certain conditions for use in the manufacture of Methylated Spirits	
Roasted or ground	lb 0 4 4	SHRUBS AND SHRUB VARIETIES

Gifts made by deceased during his life for public or charitable purposes are charged unless made more than twelve months before death: other gifts are charged unless made more than three years before death. Gifts made in consideration of marriage or as part of deceased's reasonable normal expenditure excepted. Gifts not exceeding £100 in value or amount also excepted.

Payment of Estate or Succession Duties may by agreement with the Commissioners be made wholly or in part in the form of real or leasehold property comprised in the estate.

Small estates up to £300 and £500 gross are charged at the option of the accounting parties either by the preceding scale or with fixed duties of 30s and 50s and are exempt from all other death duties.

Interest at 4 per cent per annum is also payable on the Estate Duty on personality from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid if desired by light yearly or sixteen half-yearly instalments and that on certain annuities may at option be paid in four yearly instalments and 4 per cent interest is charged on all unpaid portions of duty in these cases from twelve months after death.

FACTORY OR DISPENSATION

In England, in all cases £ 0 0
In Scotland or Ireland in some cases £ 25 0 0

On Houses let in tenements or flats, see 3 Edw 7 c 46 s 11

INCOME TAX

The tax is chargeable under five Schedules A, B, C, D and E, and the standard rate for the year

1923-24 is

Schedule A Lands, Tenements &c 0 4 6

Owner must allow deduction from next payment of rent when tax paid by tenant.

Relief is given in certain cases in respect of Income Tax under Schedule A to the extent of 1/4 part of the assessment in the case of lands, and in the case of houses where the amount of the assessment—

Does not exceed £40 1/4
Exceeds £40 but not £100 1/2
Exceeds £100 1/2 plus 1/4 of amount in excess of £100

Allowance to Owners of Land and Houses for average cost of maintenance, repairs, insurance and management, may be claimed in addition five years average taken.

A Clergyman or Minister using part of his house mainly for his duties may obtain an allowance not exceeding the tax on one eighth of the rent or annual value.

Schedule P In respect of the Occupation of lands used for the purposes of husbandry only, or mainly for those purposes on an amount equal to the Annual Value or by special request, if made before 5th June (5th August in Scotland) in the current income tax year on profits of husbandry as in case of Trades under Schedule D. In the case of all other lands on an amount equal to one third of the annual value.

Schedule C Dividends or Annuities from public revenue (Government Stocks &c.)

Schedule D Trades, Professions, Earnings from Abroad, Interest &c.

Schedule E Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c.

LIFE INSURANCE—Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 7 per cent of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £100 in all.

RESIDENTS ABROAD—No exemption or other relief is given to persons not residing in the United Kingdom. *Exceptions* British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family

DOMINION INCOME TAX—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income

SCHOLARSHIPS—Income from a scholarship held by a person receiving full time instruction at a university, college, school or other educational establishment is exempted from Income tax (including Super Tax)

STANDARD RATES OF INCOME TAX—The Income Tax year is from April 6 to the following April 5 the following were the standard rates for the years mentioned—

	£	s	d
1907-8 and 1908-9	0	1	0
1909-10 to 1913-14	0	1	2
1914-15	0	1	8
1915-1916	0	3	0
1916-17 and 1917-18	0	5	0
1918-19 to 1921-22	0	6	0
1922-1923	0	6	0

SUPER TAX—An additional duty of Income Tax imposed at the following rates on persons whose total incomes exceed £2,000—

In respect of the first £2,000	nil
In respect of the excess over £2,000—	
For every £ of the first £500 of the excess	0 1 6
For every £ of the next £500 of the excess	0 2 0
For every £ of the next £1,000 of the excess	0 2 6
For every £ of the next £1,000 of the excess	0 3 0
For every £ of the next £1,000 of the excess	0 3 6
For every £ of the next £1,000 of the excess	0 4 0
For every £ of the next £1,000 of the excess	0 4 6
For every £ of the next £12,000 of the excess	0 5 0
For every £ of the next £10,000 of the excess	0 5 6
For every £ of the remainder of the excess	0 6 0

Notes on Income Tax

Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions abatements and reliefs were replaced by the various reliefs set

out below. In introducing the new system, the Act employs two terms not previously used in connection with the Income Tax, viz, "assessable income" and "taxable income".

"*Assessable Income* means, in the case of "earned income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned income allowance mentioned below and in the case of other income the actual amount of such income as computed for Income Tax purposes

"*Taxable Income* means that part of the 'assessable income' upon which income tax is actually charged, that is the 'assessable income' less the various deductions referred to below

Deduction in arriving at Assessable Income
Earned Income Allowance—The differentiation in favour of "earned income is made, not as heretofore by reducing the rate of tax chargeable upon such income as compared with investment income but by deducting one tenth of the "earned income in order to arrive at the assessable income. The deduction is given in respect of the amount of the total income but must not exceed £200 for any one individual. The assessable income of a taxpayer is therefore his total income as computed for Income Tax purposes after making the appropriate deduction in respect of any earned income

Total Exemption—Exemption from tax may be claimed where the total assessable income does not exceed £135 or in the case of an individual whose wife is living with him, £225. Where the income is wholly earned, these limits are equivalent to £150 and £250 respectively. See above

Deductions from Assessable Income in order to arrive at Taxable Income—Where the taxpayer is not totally exempt the following deductions may be claimed from the total assessable income in order to arrive at the 'taxable income'. The deductions may be claimed in respect of the amount of the taxpayer's total income

Personal allowance may be claimed of £135 or in the case of an individual whose wife is living with him £225

Wife's Earned Income—When a taxpayer's total income includes any earned income of his wife the personal allowance of £225 is increased by a sum equal to nine tenths of the amount of such earned income subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) House-keeper taking Charge of Children—A deduction of £45 may be claimed, under certain conditions by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (see below) is given or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose

Deduction in respect of Widowed Mother, &c, taking Charge of Children—A deduction of £45 may be claimed, under certain conditions, by an Unmarried Person who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband)

or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (see below) is given

Deduction for Children—A deduction may be claimed in respect of each child, step child, or adopted child under the age of 16 years, or who if over that age, is receiving full time instruction at any university, college, school, or other educational establishment. The deduction allowable is £35 in respect of one child, and £7 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £40 a year.

Deduction in respect of Dependent Relatives—A deduction of £25 may be claimed in respect of (a) any person whom the taxpayer maintains at his own expense and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself or (b) his or his wife's widowed mother whether incapacitated or not or (c) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (a) or (b) is conditional, however, upon the income of the dependent relative not exceeding £50 a year. The deduction applies in the case of a female taxpayer with the substitution of 'husband for' wife above.

Rates of Tax chargeable on the Taxable Income—The following provisions as to the rates of tax chargeable on the taxable income (i.e., that part of the income on which tax is actually charged) apply *whatever the total amount of the income*. The first £25 of the taxable income is chargeable at half the standard rate of tax, i.e., for the year ending April 5, 1924, at 2s 3d in the £. The remainder of the taxable income is chargeable at the standard rate of tax, i.e., at 4s 6d in the £.

Relief in respect of Life Assurance Premiums—Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities the allowance is deducted from the amount of tax arrived at under the preceding paragraph and calculated at following rates—one half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1926, in respect of the claimant's total income, and on policies taken out before June 22, 1926, a deduction of tax at one half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000.

Deeds Stamped after Execution
REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution —
WITHOUT PENALTY ON PAYMENT OF DUTY ONLY
Agreements under hand only liable to the duty of 6d — Agreements for letting furnished houses for less than a year — Appraisements — Attested copies, within 14 days of first execution
Foreign sea policies, within 10 days of arrival in U.K.
Deeds and Instruments not otherwise excepted within 30 days of first execution
NOTE—Where the deed or instrument has been wholly executed abroad the period within which it may be stamped begins to reckon from the date of its arrival here
WITH PENALTY IN ADDITION TO DUTY —
Articles of Clerkship
Bills of exchange upon stamps of sufficient amount but of improper denomination
Charter parties Receipts within certain limits of time — Vide Table of Penalties
Contract notes
Letters of Allotment and Renunciation Scrip certificates
Share warrants Warrants for goods
Policies of insurance, other than Marine policies
INSTRUMENTS WHICH CANNOT LEGALLY BE STAMPED AFTER EXECUTION —
Bills of exchange (except as before mentioned) — Bills of lading
Marine policies executed in the United Kingdom Proxies and Voting Papers (except those first executed abroad which may now be stamped within 30 days after first receipt in U.K.)
PENALTIES ENFORCEABLE ON STAMPING —
Agreements under hand only Attested copies or extracts after 14 days from their first execution
Charter parties within 7 days from their first execution
Charter parties after the expiration of 7 days but within one month
Receipts within 14 days after they have been given
Receipts, after 14 days but within one month
Other Instruments presented after the proper time (subject to special provisions in some cases)
COMPANIES (CONSOLIDATION) ACT, 1908
FEES TO BE PAID BY STAMPS
On registration, with a capital of £2,000, £2 exceeding £2,000 —
For every £1,000 or part of £1,000, up to £5,000
Do, after first £5,000 up to £100,000
Do, after first £100,000
Maximum Fee
For registering any document required or authorised by the Act
For making a record of any fact required or authorised to be recorded by the Registrar
Deed stamp fee to be put both upon Memorandum and Articles of Association
Fees on Registration of Mortgage fee up to £500, £1 above £500.
Hours at Somerset House.
Inland Revenue Office, 10 to 4 (Saturdays, 1).

BIRTHS

WHEN a birth takes place personal information of it must be given to the Registrar, and the register signed in his presence by one of the following persons — 1. The father or mother of the child. 2. If they fail — 3. The occupier of the house in which the birth happened. 4. A person present at the birth. 5. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register the Registrar may write to any one of the above mentioned persons requiring him or her to come to him for that purpose at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided but the registration of a birth will be free when it takes place within 42 days (but in Scotland the period is 21 days) unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born when the Registrar so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar and on payment of fees amounting to five shillings to him and the Registrar. After twelve months a birth can be registered only on the Registrar General's express authority, and on payment of further fees amounting to ten shillings. In Scotland, after the lapse of three months it can only be registered on the authority of the Sheriff of the County. The regulation which provides that no birth in England and Wales could be registered after the lapse of seven years was revoked in 1922, but late registration cannot be allowed unless satisfactory evidence is supplied to the Registrar General. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 36 hours of the birth and is to be in addition to and not in substitution for the notices above mentioned.

Birth Control

The relative fertility of different occupations in England and Wales is shown by the following table, which gives the number of children per 1,000 married couples when the age of the occupied husband is below 55 years —

Teachers	95	Policemen	153
Nonconformist ministers	96	Postmen	159
Church of England ministers	101	Carmen	207
Doctors	103	Dock labourers	211
Authors & Editors	104	Barmen	234
		Miners	258
		General labourers	436

Ireland	89,325	99,536	—

Total 888,031 & 194,068 —

BRITISH NATIONALITY

The law as to British Nationality is mainly to be found in the British Nationality and Status of Aliens Act, 1914, as amended by certain Acts passed in 1918 and 1922. It is important to notice, however, that the first section of the act of 1914—which defines a natural born British Subject—does not affect the status on any person born before Jan 1, 1915.

The following are deemed to be natural born British Subjects namely

1 Any person born within His Majesty's dominions and allegiance

2 Every person born out of His Majesty's Dominions before Jan 1, 1915, whose father's father was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject

3 Every person to whom a Certificate of Naturalization under the British Nationality and Status of Aliens Act 1914 or of Re-Admission to British Nationality has been granted or who has acquired British nationality by special Act of Parliament or by conquest or annexation

4 The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage

5 The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions —

(a) in the case of a child born before January 1st, 1915

(i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915 and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915 and his name is included therein

(b) in the case of a child born after January 1, 1915

(i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein

6 Any person born out of His Majesty's dominions whose father was at the date of the birth a British subject, and who fulfils any of the following conditions—*et c.*, if either

(i) his father was born within His Majesty's allegiance or

(ii) his father had a certificate of Naturalization, or

* See Acquisition of British Nationality p. 395

- (iii) his father had become a British subject by reason of any annexation of territory, or
- (iv) his father was, at the date of the birth, in the service of the Crown, or
- (v) his birth was registered at the British Consulate within one year or, in special cases, two years or, in the case of a person born on or after Jan 1, 1915, who would have been a British Subject if born before that date, within 22 months after August 1, 1922.

A child of a British Subject is deemed to have been born within the allegiance if born anywhere where by treaty &c. His Majesty exercises jurisdiction over British subjects.

A person whose British nationality depends upon his registration at a Consulate ceases to be a British Subject unless he asserts his nationality by declaration within a year after attaining 21, and abandons any other nationality he may have acquired.

7 A person born on a British ship

LOSS OF BRITISH NATIONALITY—A British subject loses his British nationality—

- (a) if by any voluntary or formal act he becomes naturalized in a foreign country
- (b) if, in certain cases, he makes a declaration of allegiance. These cases are—
 - (i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship and is also by birth or becomes during minority a subject of any foreign State,
 - (ii) where a person is a British subject but was born out of His Majesty's Dominions, and
 - (iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that State who has been naturalized as a British subject may divest himself of that status
- (c) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality
- (d) in the case of a woman, if she marries an alien
- (N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)
- (e) in the case of a person to whom a Certificate of Naturalization is granted after January 1, 1915, if the Secretary of State revokes the Certificate
- (f) if the territory of which he is an inhabitant is severed from the Crown, e.g., the cases of the inhabitants of Hanover and Heligoland

ACQUISITION OF BRITISH NATIONALITY—An alien may acquire British nationality—

- (a) by special Act of Parliament,
- (b) by the conquest, annexation, or cession of the territory of which he is an inhabitant,
- (c) in the case of a woman, by marriage with a British subject, and
- (d) by naturalization

Naturalization—All Certificates of Naturalization granted in the United Kingdom between May 13, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after Jan 1, 1915 is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must—

- (a) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown
- (b) be of good character and have an adequate knowledge of the English language, and
- (c) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization may be obtained free on application to the Home Office, Whitehall, London, S.W.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day and is at present £20, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application is not returnable whether or not a Certificate is granted.

N.B.—In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.

STATUS OF ALIENS—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate linguae* but are triable in the same manner as if they were natural born subjects.

UNDESIRABLE ALIENS—An undesirable alien—e.g., one who is without means, or who is a lunatic, or an idiot or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be "undesirable" within the meaning of the Aliens Act, 1905. His Majesty may by Order in Council impose further restrictions on aliens (see Aliens Restriction Act, 1914 as extended and amended 1919).

ALIEN IMMIGRATION

During the year 1922 a total of 316,159 alien passengers landed at United Kingdom ports, and 315,765 embarked for destinations overseas. The arrivals in 1922 were 294,569, and the departures 305,886. 1,997 were refused leave to land in 1922, as against 1,712 in 1921. The arrivals consisted of the following—

Residents returning from abroad	61,117
Passengers in transit to other countries	33,306
Visitors on holiday	127,380
Visitors on business	68,554
Members of foreign diplomatic and other missions	5,492
Seamen ..	11,029
Other passengers	9,381

Total 316,159

BUSINESS NAMES REGISTRATION

REGISTRATION OF BUSINESS NAMES ACT, 1916

This Act received the Royal Assent on 22 Dec 1916, and its provisions were explained on pp. 414-415 of the 1921 'WHITAKER'

CERTIFICATES**OF BIRTHS MARRIAGES OR DEATHS**

England and Wales—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 2s 7d viz 1s for search, 2s 6d for the certificate and 1d for the stamp affixed thereto. (When application is made by post the charges are 5s 1d.) They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 1896; Birth or Death in Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth 6d; Savings Banks Act, 1887; Birth, Death or Marriage, 1s; National Insurance Acts, 1911 and 1913; Birth, 6d; Marriage, 1s; Industrial Assurance Companies Act, 1896; and Trade Unions Amendment Act, 1876; death of child under 10 years of age, 1s, but only from the local Registrar.

English Registers—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the *Society of Genealogists* at 5 Bloomsbury Square, London, W.C.

Scottish Registers of Births Marriages and Deaths—Parish registers were instituted for these in 1551, but until the Registration of Births &c (Scotland) Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of 2s 1d for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar-General, H.M. General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar-General, and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1919 are now in his possession. There is a general index to the registers which may be searched on payment of 2s. A search of the index of a particular parish is 1s. A fee of 20s is payable for a search of all the Scottish registers and 1s is payable for a search of a particular parish. An extract of an entry may be obtained on payment of 2s 1d. The office of the Registrar-General is open on weekdays between 10 a.m. and 4 p.m.

COPYRIGHT

The law of copyright is contained in the Copyright Act, 1911, which repeals all the earlier acts. It should be stated that no registration of copyright at Stationers' Hall is now necessary; copyright arises from mere authorship. The provisions of the Copyright Act, 1911, were explained on pp. 415-416 of the 1921 'WHITAKER'.

DAYS OF GRACE

Bills of Exchange or Promissory Notes payable at any time after date have *three days of grace* allowed; thus a bill dated 1 Jan. at two months date is not due until March 4. If a bill or note is payable by instalments to be paid punctually, this does not exclude the days of grace (*Schaffers' Manual* 371 L.R. 366). There is, however, no such extension in the case of bills drawn at sight or on demand and these must be paid on presentation. In the United Kingdom bills falling due on Sunday are payable the previous Saturday and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

DEATHS

In England and Wales—When a death takes place personal information of it must be given to the Registrar, and the register signed in his presence by one of the following persons—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fall 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death or the occupier of the house in which the death happened. If all the above named fail 4. An inmate of the house or the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register or must within the same time send him written notice of the death accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last

illness. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the registrar signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the registrar in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not however delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the funeral, to notify the Registrar thereof within seven days. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may by written application require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above mentioned periods unless on request it is effected at an informant's house or at the house where the death happened when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority and on payment of fees amounting to ten shillings.

In Scotland the rules of registration are similar, but (1) the death must be registered within 8 days (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c (Scotland) Act 1854, within 7 days (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

CORONERS INQUESTS—Sudden deaths are supposed by the law to demand inquiry and Coroners inquests are held in cases of violent and unnatural deaths such as the case of a person slain or drowned or dying suddenly and of any person dying in prison. Coroners do not intrude into the houses of persons for the purpose of holding inquests but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*, and the

number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a witness is bound to attend or renders himself liable to be fined in any sum not exceeding 40s the fine for defaulting juriesmen being 2s.

In Scotland there is no Coroner. In ordinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County see p. 547). The result of such inquiry is reported to the Lord Advocate. In the case of a death occurring in the course of an industrial employment and in every case in which the Lord Advocate may so order a public enquiry is held before the Sheriff and a jury.

Statistics of Deaths

	1929	1930	1931
England & Wales	504,203	466,213	458,710
Scotland	75,149	68,179	66,211
Ireland	78,612	66,538	-
Total	657,964	600,930	-

DIVORCE

Preliminary—Matrimonial suits may be conveniently divided into three classes, viz (1) those in which a declaration against marriage is sought (2) those in which the marriage is sought to be upheld and (3) those in which the marriage being admitted partial or complete divorce is sought.

(1) **Nullity of Marriage**—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity if it was bigamous if there was no consent or if one of the parties was insane but it is only voidable if one of the parties was under the age of consent (14 in the case of males and 12 in the case of females). Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) **Restitution of Conjugal Rights**—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion (as to the significance of which see paragraph (6) *infra*) and such desertion if coupled with the husband's adultery, whether committed before or after the decree of restitution is a ground for granting to the wife a decree of dissolution of marriage.

(3) **Judicial Separation and Divorce**—The third class of suit mentioned in paragraph (1) *supra* includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful) dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or

desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

Divorce—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely (1) those which are offences under ecclesiastical law e.g. cruelty, adultery and unnatural offences, (2) those which are offences by statute, e.g., incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case he may obtain damages from the adulterer. If a wife seeks divorce it was formerly not sufficient that she prove mere adultery. But now, by an Act which came into force on July 18, 1923, a wife may petition for divorce on the ground that, since the marriage and the passing of the Act, her husband has been guilty of adultery. A wife can also obtain divorce if the husband has been guilty of bigamy with adultery, of rape or certain other criminal offences, or of adultery coupled with such cruelty as without adultery would have entitled her to a divorce *a mensa et thoro* or of adultery coupled with desertion. 'Cruelty is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty to wilfully and recklessly communicate a venereal disease and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other wilfully without cause or reasonable excuse makes the other live apart for two years or more. It is, however, a question of intention. *Pouell v. Pouell* (1922) P. 278. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights but now desertion without cause may enable the deserted spouse to obtain a decree of judicial separation. If coupled with adultery, it enables a wife to obtain a divorce.

When the decree will be refused—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent, (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion) (iii) condonation, i.e. complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation (*Crocker v. Crocker* (1921), P. 15). There are also certain discretionary bars, as e.g. where the petitioner has been guilty of unreasonable delay, or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

Intervention by King's Proctor—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree nisi is made absolute, the King's Proctor may

intervene to show cause against making a decree absolute.

Decree Absolute—Every decree of dissolution or nullity is in the first instance a decree nisi, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again but a man may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

Children—When a suit has been commenced, the children should not be removed from the person in whose custody they are *de facto*. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance and education of children. Either spouse may make applications for access to the children.

Alimony—A wife may in any cause file a petition for alimony (i.e. means of support) pending suit, provided *prima facie* evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties, otherwise one fifth of the joint incomes is generally allowed. An order for permanent alimony may be obtained by a wife who has obtained a final decree of judicial separation.

Protection Orders—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

Costs—Where a suit is about to be set down for hearing the wife if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for dissolution of marriage. If a suit be decided against a wife who has separate estate she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

SEPARATION BY AGREEMENT

Husband and wife may agree with or without consideration, to separate and live apart, but the agreement to be valid, must be followed by an immediate separation. Although usually made by deed, a mere oral agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A wife is not bound by a separation agreement if she was forced to make it by threats of violence. A clause which binds the husband to give up the custody of the children will be enforced unless the Court is of opinion that it is not for their benefit. The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

SUMMARY JURISDICTION

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty, or of wilful neglect to maintain her or her infant children, and by such cruelty or neglect has caused her to leave him, or where he is an habitual drunkard the wife may obtain relief from a Court of Summary Jurisdiction. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £2. Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be committed to an inebriate home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation, and if, having obtained an order she commits adultery, the order may be discharged. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

DIVORCE STATISTICS

England and Wales

The number of matrimonial suits in the High Court of Justice of England and Wales during the nine years 1913-1921 is shown below—

Year	Poor Persons.	Other Suit	Total
1913	—	1,267	1,267
1914	88	1,360	1,348
1915	255	1,127	1,372
1916	340	1,073	1,413
1917	494	1,214	1,708
1918	1,034	1,055	2,089
1919	2,342	3,422	5,763
1920	2,126	3,058	5,184
1921	677	2,767	3,464

In the occupation groups of husbands professional employments account for 1,148 cases; manufactures 826, trade 899, inland transport 215, mining 85, agriculture 102, navigation and fishing 46, and domestic service 26. Among the professions are included—

Soldiers and Naval	Accountants	26
Seamen	Civil Servants	24
Engineers, Architects	Schoolmasters	18
&c	Authors	15
Navy, Army and Air	Police	14
Officers	Students	12
Actors, musicians, &c	Municipal Offis	9
Physicians, surgeons, &c	Clergymen	6
Legal profession	Painters	3

DIVORCE FOR THE POOR

England and Wales.—A special department in the High Court of Justice for the assistance of poor persons in litigation including divorce was established in 1914. The official name of the department is "London Prescribed Officers (Poor Persons)."

Under the procedure of this department, Solicitor and Counsel are provided for a litigant who is not possessed of the means to employ legal assistance.

Although no fees are payable for the help

given by the department the applicants must find the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings need not cost more than £10, and can in some cases be completed for less, compared with from £50 to £60 necessitated by the normal procedure. Before a case is taken up, the applicant has to satisfy the department that he or she is really poor—not possessed of more than £50, exclusive of wearing apparel and trade tools. She must also show that her own income does not exceed £2 a week, or in special cases, £4. If this condition is fulfilled, and if he has reasonable grounds for bringing or defending a suit in the Divorce Court, he may apply to the Court for leave to do so. An application for leave is submitted to and is reported on by counsel and solicitor, who give their services voluntarily. If the report is favourable the Court may give the necessary leave, and thereupon another solicitor and counsel are assigned to the poor person to act for him. Such a litigant is not liable for Court fees nor (generally) is he liable to pay costs to any other party. Counsel acting for him must charge him no fee, while the solicitor assigned to him generally gets nothing but his out-of-pocket expenses. Where however, property of value is recovered for such litigant, the solicitor may (under the rules) get his usual costs. Numbers of persons take advantage of this procedure *in forma pauperis*. This explains the very large number of cases in the Divorce Court.

Scotland.—In every town there are Solicitors for the Poor, and in the Court of Session there are Counsel for the Poor all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the 'Poor's Roll' is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poor's Roll are not fixed and each application depends on its own circumstances. The Poor's Roll was established in 1244.

THE FRANCHISE

The Representation of the People Act, 1918, abolishes the voting qualifications of property owners, freemen and lodgers but extends the franchise to women, subject to certain limitations. To be entitled to be registered as Parliamentary or as Local Government electors, the following conditions are now required—

PARLIAMENTARY

MFN—21 years of age. Residence only for the qualifying six months in any one constituency or in any contiguous constituency or county. The occupation of land or premises of £10 annual value, for business purposes, for the same period.

A man of full age who has received a degree at any university forming, or part of, a constituency, is entitled to be registered as a voter for that constituency. Honorary degrees do no qualify.

WOMEN—30 years of age, must be entitled to be registered as a Local Government elector for

the occupation of land or premises of £5 yearly value, or of a dwelling house, or is the wife of a husband who is entitled to be so registered.

A woman is entitled to be registered as a parliamentary voter for a university constituency if she is of the required age and has been admitted to a degree or has passed the final examination and followed the conditions required of a woman by such university which did not at the time the examination was passed admit women to degrees.

ABSENT VOTERS AT GENERAL ELECTION

In the lists which came into force on Oct. 15, 1922, the absent voters for Great Britain and Northern Ireland totalled 284,570 and for the contested constituencies in the General Election of 1922 178,451. Excluding three constituencies (in the Borough of Stoke on Trent) for which particulars are not available 97,530 ballot papers were issued to absent voters whose recorded addresses were in the United Kingdom and 40,295 of them were returned in time for the counting of the votes at the General Election of 1922. The number of absent voters who had appointed proxies in the contested constituencies was 4,173.

LOCAL GOVERNMENT

MEN—21 years of age. Must have occupied for the qualifying six months, as owner or tenant, any land or premises in a local government electoral area. A person who occupies rooms as a lodger is entitled provided the rooms are let unfurnished.

WOMEN—21 years of age. Is entitled to be registered as a local government elector where the conditions of her occupation of property would entitle her if she were a man.

Thirty years of age, where she is the wife of a man who is entitled to be so registered in respect of premises in which they both reside.

REGISTRATION

The qualifying periods (at present fixed by Order in Council) are for six months ending 15 Dec for the Spring Register, and 15 June for the Autumn Register. It is the duty of the Registration Officer (in counties the clerk to the county council, in boroughs, the town clerk) to compile the Spring and Autumn Registers containing the names of all persons entitled to vote. For this purpose instructions may be issued to the overseers of parishes who cause house to house enquiries to be made to ascertain the names of all qualified voters. A householder's return may be issued, and the failure of the householder to give the required information renders such person liable to a penalty of £50. The prepared lists are publicly exhibited by the Registration Officer, together with a notice specifying the mode in which, and the time within which, claim and objections are to be made. Subsequently the Registration Officer shall make all necessary corrections of the electors lists, and carry out all that is required to form those lists into a register with a separate index letter and a separate series of numbers for each polling district.

ILLEGITIMACY

England and Wales—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish, and the Justice, on his being proved to be the father of the child, may make an order requiring him

to pay for its maintenance and education a sum not exceeding 5s a week. By an Act which came into force on Sept. 30, 1923 the putative father may be ordered to pay 20s a week instead of 10s as hitherto. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A domestic servant found to be *enconcinate* may be peremptorily dismissed without notice but any attempt to examine without her consent a servant supposed to be *enconcinate* renders the employer liable to an action.

In 1922 the Home Secretary introduced a Bill for legitimating illegitimate children on the marriage of their parents, but the Bill had not passed both Houses of Parliament at the time of going to press.

Scotland—The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court but usually is in the Sheriff Court. The father pays half of the inflying expenses, the amount usually decreed being £2 2s. The rate of aliment varies, but in 1919 it was settled by a decision of the Court of Session that £11 14s per annum was a proper amount. The mother has the custody of the child until the age of 7 if a male and 10 if a female.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by International Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

Illegitimate Births—Great Britain

INFECTIOUS DISEASES

PRECAUTIONS NECESSARY TO BE OBSERVED—By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided

that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street public place, shop inn or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering or, (2) Being in charge of any person so suffering so exposes such sufferer or causes or permits such sufferer to be so exposed or (3) Gives lends sells transmits or exposes, without previous disinfection, any bedding, clothing rags or other things which have been exposed to infection from any such disorder shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40s and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house &c, in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner as testified by a certificate signed by him—penalty not exceeding £50 or imprisonment with or without hard labour not exceeding one month. By the Public Health Act 1907 the Local Government Board (i.e. the Ministry of Health Act, 1909 has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease, nor may he take any book from a public or circulating library or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairy men must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation or is lodged in a room occupied by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that

any house is in such a condition that the health of any person is affected or endangered thereby or that whitewashing &c would tend to prevent or check infectious disease they may give notice in writing to the owner or occupier of such house to whitewash, &c, the same

NOTIFICATION OF INFECTIOUS DISEASES

By the Infectious Disease (Notification) Extension Act, 1899 the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the January 1, 1899. Every case of infectious disease as defined by the Act is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance or by the occupier of the building. In addition to this the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s fine. No payment is made for the notices required to be given by persons in the house but the medical man gets 2s 6d for every case in his private practice and 1s for every case in a public institution of which he is officer.

The diseases to which the Act applies are small pox cholera diphtheria membranous croup erysipelas scarlatina or scarlet fever and the following fevers typhus typhoid enteric relapsing continued or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious measles rheumatism or German measles, whooping cough, chicken pox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act 1891 are similar to those now extended to the rest of the country.

Statistics of Notifiable Diseases — The total numbers of cases of the chief notifiable diseases in England and Wales, excluding cases among soldiers and sailors, are set out below —

	(cases notified)	Rate per 1,000 of population
Tuberculosis (pulmonary)	61,655	1.65
Tuberculosis (other forms)	15,851	0.41
Small pox	263	0.01
Typhus fever	2	0.00
Scarlet fever	119,490	3.19
Diphtheria	69,481	1.86
Enteric fever	3,109	0.08
Continued fever	35	0.00
Relapsing fever	7	0.00
Puerperal fever	2,898	0.08
Erysipelas	15,051	0.43
Cerebro spinal fever	583	0.01
Pollomyelitis	293	0.01
Ophthalmia neonatorum	10,304	10.76*
Encephalitis lethargica	890	0.02
Polio-encephalitis	36	0.00

Dysentery	1,353	0.04
Malaria (contracted in England)	38	0.00
Pneumonia	38,899	1.04

* Rate per 1,000 births.

JURY SERVICE

Preliminary—The juries with which the public are most concerned are, first and foremost, the grand juries; secondly, those which are summoned to try causes in the High Court, at assizes and county courts; and thirdly those summoned to try criminal cases at assizes, the Old Bailey, and courts of Quarter Sessions and to assist at coroners' inquests.

Qualifications—All natural born subjects of the King and aliens domiciled for ten years or more, being men or women between 21 and 65 (60 after March 1, 1923), are liable to serve as jurors.

Although women could not formerly serve, the sex disqualification was removed in 1919, and women are now liable to serve, subject to this, that a judge may make an order that the jury shall be composed of men only or of women only, or may, on an application made by a woman to be exempted from service on a jury in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried, grant such exemption.

The qualification of a juror is a *property* one—that is to say, he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £100, a resident in a county or borough owning £10 a year in real estate or rent charge or £50 in leaseholds, or a householder in a county or borough assessed to the poor rate at not less than £30 a year in Middlesex and the County of London, or £50 in other counties, and occupiers of houses with not less than fifteen windows, are all compellable to serve as jurors unless exempted or disqualified.

Exemptions and Disqualifications—Aliens (subject as above) felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries while the following classes of persons (amongst others) are exempt—peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of protestant dissenters and Jews whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs, officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaolers, superintendents etc., of lunatic asylums, doctors and chemists (if actually practising), dentists, officers and men in Army, Navy, and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

Special exemption—A judge, and, by virtue of s. 3 of the Juries Act 1922, the sheriff may for good reason excuse attendance on any particular jury.

Jury Lists—Lists of juries are now prepared in accordance with the Juries Act 1922. Persons who deem themselves to be entitled to be exempted should communicate with the registration officer for all whose names appear on the lists are liable to serve.

Grand Juries—The function of the grand jury is to make presentments on oath to judicial bodies or personages, mainly of accusation against persons against whom criminal proceedings are pending. The jurors have to say in effect whether there is a *prima facie* case against the accused, against whom an indictment has been prepared, and if they are satisfied of this they find "a true bill." If not, they "ignore the bill" and the accused is discharged.

Unlawful Jurors—A jury is sometimes summoned by the judge in lunacy to enquire whether a man is or is not of sound mind.

Juries in Criminal and Civil cases—An accused person against whom a true bill has been found is tried by a "jury sworn." A "panel" of jurors are summoned to attend the court on a particular day, and it is from amongst them that the jury who are to try the prisoner are selected at random (an interesting note on the selection of jurors will be found in *Halsbury's Laws of England*, Vol. 18, p. 246). In a criminal case the prisoner has a right of challenge which is of two kinds—a challenge to the array—that is, the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll—that is to individual jurors which may be peremptory or for cause. Peremptory challenge or challenge without cause exists only as of right in treason and felony, and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury. 'Challenge for cause' sometimes takes place on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous.

Except upon trials for murder, treason, and treason felony juries after being sworn may separate, e.g., for lunch and at night. The verdict must be given in open court in the presence of all the jurors, and in cases of treason and felony in the presence of the defendant. It must be unanimous except that in civil cases the parties may agree to take a majority verdict.

Special Juries—Special Jurors are selected from persons having larger property qualifications, e.g., the occupier of dwelling house in a large town rated at not less than £100. Trial is generally by Common Jury, but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

Payment of Jurors—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 1s on each case tried in the High Court or a County Court, and on Circuit, 8d. In Criminal Cases the jury is entitled to and, in fact, receives nothing. At Inquests, held before Coroners the jurors are entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action lie against him, in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £20 while non-appearance at a county court may involve a fine of £5.

Coroners Juries—A coroner who has decided to hold an inquest must summon a jury to inquire into the cause of death. This absolute duty however, was suspended during the War and for six months thereafter by an Act passed in 1918. A coroner's jury may be fined £5 for non-attendance. Broadly speaking, any "good and lawful man or woman" may be summoned on a coroner's jury. Although there is no age limit fixed by statute, the custom is to summon only persons of full age. Not less than twelve must be summoned, and at least twelve must agree on a verdict.

MARRIAGES

BY Banns OR LICENCE.

Banns of Marriage—“Banns” formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. The Marriage Act 26 Geo II c. 33 prescribes audible publication according to the rubric on three Sunday days preceding the ceremony, after the Second Lesson. The law is now chiefly contained in the Marriage Act, 4 Geo IV c. 76 which repealed most of the laws then in force (see also 6 & 7 Will IV c. 83 and 1 Vict c. 22). Where the parties reside in different parishes the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church in whatever church the parties are married. It may be noted that by Scottish law only, omission to publish the banns does not invalidate the marriage because it would still stand as an irregular marriage carried out by consent before witnesses (see sub tit. “Marriages in Scotland” post). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise the case is different and the marriage may be null and void (*Mudgeley v Wood* 4 Sw & Tr 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages, but where a district has been assigned to a chapel, and it becomes a vicarage or ecclesiastical parish the option ceases and the banns must be proclaimed and marriage celebrated therein and not in the “mother church” or that of the civil parish.

If three months be permitted to elapse the banns become useless and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are “forbidden.” By the Act 6 & 7 Will IV c. 83 a marriage may be performed in church on the superintendent registrar’s certificate without banns, provided that the incumbent’s consent is obtained. One of the parties must be resident within the Ecclesiastical parish of the church in which the marriage is to take place.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates for marriage in any church or chapel duly licensed for marriages, (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 404). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence, and every Registrar or other person who knowingly unduly solemnizes

a marriage is also guilty of felony. By a subsequent alteration in the law the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two or more witnesses present and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery but must allow another clergyman of the diocese to perform the service.

Marriage with a deceased wife’s sister—including a sister of half blood—was legalised in 1907. No clergyman, however, can be compelled to solemnize such a marriage, but he can allow his church to be used for the purpose by another minister.

A marriage certificate is nothing more than a copy of the entry in the church register, and the customary fee is *ss* 6d and a stamp duty of *sd* 3s. Searches in the register books may be made on payment of small fees viz. *ss* 1s for a single year, and 6d additional for every other year. There are small fees regulated by custom on the certificate, given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman and *ss* 2 to the clerk, and the usual fees are paid although a stranger clergyman be invited to perform the service.

MARRIAGE LICENCES

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office at the Vicar General’s Office and at the Bishop of London’s Registry, all within the old area known as Doctors Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops Registrars but licences obtained at the Bishop’s Diocesan Registry only enable the parties to be married in the diocese in which they are issued, those procured at the Faculty Office 23 Knight Rider Street Doctors Commons, E.C. are available for London and all England and Wales. Those procured at the Vicar-General’s Office 3 Creed Lane Ludgate Hill, E.C. (hours in both offices 10 to 4 Saturdays 10 to 1) are available for London and all England and Wales, except the Province of York. No instructions, either verbal or in writing can be received except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp *ss* 6d. No previous notice is required and the licence is available as soon as it is issued. The cost of licences through a clerical surrogate in the country varies, according to the diocese, from *£*1 15s to *£*2 12s 6d. By the 4th George IV c. 76 it is enacted in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage, and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church or

the district parish in the church of which the marriage is to be solemnized

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above mentioned affidavit may be taken and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES

SPECIAL LICENCES are granted by the Archbishop of Canterbury under special circumstances, for marriage at any place with or without previous residence in the district or at any time &c but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knightbridge Street, Doctors Commons F C 2 (tel. 6834 Central). Fees for licence stamp, &c £25.

BEFORE A REGISTRAR AND IN NON CONFORMIST BUILDINGS

Marriages can take place in a District Registrar Office or in a Nonconformist building registered for marriages, (a) by Certificate, (a) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar a Registrar of Births and Deaths a Registrar of Marriages or the deputy of such officer. A marriage at a registrar office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar, a marriage at a registered building takes place in the presence of the Registrar of Marriages unless it is had under the provisions of the Marriage Act 1896 respecting which see below. In each case the presence of at least two witnesses is necessary.

NOTICE OF MARRIAGE BY CERTIFICATE

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

NOTICE OF MARRIAGE BY LICENCE

One notice only is necessary whether the parties live in the same or in different registration districts and either party may give the notice.

If both live in the same district one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage and, in the case of minors, that the consent of the person whose consent to the marriage is required by law has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

ISSUE OF CERTIFICATE (WITHOUT LICENCE) FOR MARRIAGE

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice book the Superintendent Registrar may provide no impediment is shown issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

ISSUE OF CERTIFICATE AND LICENCE FOR MARRIAGE

After the lapse of one week day (not Christmas Day or Good Friday) from the date of entry of the notice the Superintendent Registrar may, provided no impediment is shown issue his certificate and licence for the marriage which can then take place on any day within three calendar months from the date of entry of the notice.

DOCUMENTS TO BE PRODUCED AT THE MARRIAGE

(1) Marriage by Certificate —

a If both parties live in the same district — The certificate of the Superintendent Registrar of that district.

b If they live in different districts — A certificate from the Superintendent Registrar of each district.

(2) Marriage by Licence — The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

PLACE OF MARRIAGE

The marriage must generally take place at a building within the district of residence of one of the parties but there are exceptions as follows —

a Section 14 of 19 & 20 Vict cap 119 provides that if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship provided that it is not more than two miles distant from the boundary of the district in which the notice is given.

b The Act 3 and 4 Vict cap 72, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong the marriage may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Gudet v Gudet*, 27 T I R 416).

MARRIAGE CEREMONY

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m. with open doors. Each of the parties must declare as follows —

I do solemnly declare that I know not of any lawful impediment why I, A B, may not be joined in matrimony to C D, and each of the parties must say to the other, 'I call upon these persons here present to witness that I, A B do take thee, C D, to be my lawful wedded wife (or husband). A wedding ring may be, and is generally, used at a marriage at a register office.

MARRIAGE ACT, 1896.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the

provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an 'authorised person' (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted the fact must be stated when notice of the marriage is given and the consent of the minister or trustees to the Registrar's attendance must be obtained.

The parties must at some time during the ceremony make the following declarations—

'I do solemnly declare that I know not of any lawful impediment why I, *A B*, may not be joined in matrimony to *C D*.

Also each of the parties must say to the other—

'I call upon these persons here present to witness that I, *A B*, do take thee, *C D*, to be my lawful wedded wife [or husband]

or in lieu thereof—

I, *A B*, do take thee, *C D*, to be my wedded wife [or husband]

Rules and Regulations relating to this Act were published in October 1909 (*See Statutory Rules and Orders, 1909 No 1332*.)

NAVAL MARRIAGES ACT 1908

This Act which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage.

It provides that any officer seaman or marine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays. He can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act.

FEES

For entering notice of a marriage by certificate in the marriage notice book	1 0
For entering notice of a marriage by licence in the marriage notice book	1 0
For a certificate for marriage without licence	1 0
For a certificate for marriage by licence	1 0
For a licence for marriage	30 0
Stamp duty on a licence for marriage	10 0
For a marriage by certificate in the presence of a Registrar	5 0
For a marriage by licence in the presence of a Registrar	10 0

Exclusive of the fee for a certificate of the marriage (marriage lines), the total fees for a marriage by certificate, when the parties live in

the same district amount to 7s, if they live in different districts to 9s.

For a marriage by licence the total fees are £2 12s 0d.

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar to whom a copy of the divorce decree must be produced.

In Wales and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the Marriages and Registration Act 1837.

If both parties are Jews they must give notice to a registration officer in the usual way and may marry according to their usages in a synagogue or private dwelling house at any hour. The marriage must be registered by the secretary of the synagogue of which the man is a member.

If both parties are members of the Society of Friends (Quakers) or if not being in membership they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer and may be married in a Friends meeting house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1907. The Act forbids the marriage of a man with the sister of his divorced wife during the wife's lifetime. The marriage of a woman with her deceased husband's brother was rendered legal in 1921.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland the party there after a residence of fifteen days should apply to the session clerk to publish banns, as regards Ireland, the party there after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD

Act passed June 27, 1892, came into force Jan. 1, 1893. Order in Council dated Nov. 22, 1913, whereby previous Orders are repealed and regulations for marriages under the Act are laid down.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act 1892. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

- (a) That both the parties are British subjects or,
- (b) If only one of the parties is a British subject, that the other is not a subject or citizen of the country or,
- (c) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country or
- (d) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

- (a) That the marriage will be recognized by the law of the country to which the foreigner belongs or,
- (b) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs or,
- (c) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the above named Act.

It is necessary for one of the parties to the intended marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (a) notice must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars,

and in Scotland must be given by proclamation of banns and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode or (b) the permission of the Secretary of State has been obtained notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make an oath

- (a) That he or she believes that there is no impediment

- (b) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district, two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 28,

ages, and are payable to His Majesty's Government —

For receiving notice of an intended marriage—	£ s d
For receiving notice of a caveat	0 10 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0 10 0
For certificate by a Marriage Officer of notice having been given and posted up in case of one of the parties residing outside the consular district in which the marriage is to take place	0 5 0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1 0 0

Marriages may be solemnized 8 a.m. to 3 p.m. No religious ceremony is required but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is however necessary to render the marriage valid. If the ceremony be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects and also when only one of them is a British subject but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so. In order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Brand v Brand* 1909 25 1 L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1836" before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW

ACT OF 1906 — Under the *Marriage with Foreigners Act 1906*, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be

recognised as valid by the English courts (*re Green v Rogers v Pitkin*, 1909, 25 1 L.R. 222).

MARRIAGES IN SCOTLAND

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 14 years of age and a female over 12. Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 15 days before the ceremony. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2s 6d. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act 1878 a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate fee, 2s 6d. Such certificate of publication is only valid for three months. Under the Naval Marriages Act 1908 banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the ship may grant a certificate.

Irregular Marriages are survivals of modes of marriage which were general throughout Europe in mediæval times. Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages, Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de presenti*), (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise *subsequente copula*). The promise, however, can only be proved by the writing or the oath of the party when action is brought. (3) by constant living together as husband and wife (called marriage by *habit and repute*), i.e., the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in 1856 by the Act 19 and 20 Victoria, Chap. 98. Marriages thus contracted may be registered if

the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5s 1d. The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that if one party has resided in Scotland for 22 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner or marriage of two foreigners may be contracted irregularly if one or other of the parties has resided in Scotland for 22 days.

Statistics of Marriages

	1920	1921

PASSPORTS

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application) and must be accompanied by two copies of a photograph of the applicant, one copy being duly certified by the recommender. Applications should be enclosed in a cover addressed to 'The Passport Office, 1 Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S.W. 1' or to 'The Branch Passport Office, 36 Dale Street, Liverpool.' Applications should, if possible, reach the Passport Office not less than four days before that on which the Passport is to be issued. The charge for a Passport is 7s 6d. Passports are issued in London between the hours of 10 and 4 (Saturdays 10 to 1), and in Liverpool, 9.30 to 4 (Saturdays 9.30 to 1) except on Sundays and Public Holidays, when the Passport Offices are closed. They may also be obtained through the post if a Postal Order for 7s 6d., made payable to the Passport Office, is forwarded with the application. Postage stamps will not be received in payment.

Foreign Office Passports are granted (1) to natural born British subjects (2) to the wives and widows of such persons and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

Passports are granted (1) in the case of natural born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by a member or official of any Banking Firm established in the United Kingdom or by any Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary Public, resident in the United Kingdom, the applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers, (2) in the case of children under

the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B) to be obtained upon application to the Foreign Office (3) in the case of persons naturalised in any of the British self governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent General in London of the State concerned and in the case of natives of British India and persons naturalised therein, upon production of a letter of recommendation from the India Office. Persons naturalised or ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a naturalised British subject his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects will be described as such in their Passports which will be issued subject to the necessary qualifications.

British Passports are only available for travel to the countries named therein, but may be endorsed for additional countries. The possession of a Passport so endorsed does not however, exempt the holder from compliance with any Immigration Regulations in force, or from the necessity of obtaining a visa where required.

Foreign Office Passports are not available beyond two years from the date of issue. They may be renewed for four further periods of two years each after which fresh Passports must be obtained. The fee for each renewal is 2s.

A Passport cannot be issued on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate. Passports must not be sent out of the United Kingdom by post.

PAWNBROKERS' REGULATIONS

For the TICKET on goods pledged for 10s or

less 1d

On goods pledged for more than 10s 2d

For INTEREST on pledges not exceeding 40s, 1d

for every 2s or part of 2s per month 1/2d

And after the first month any time not exceeding 14 days to be charged as half a month

Note.—In addition to the above charge an additional charge of 1d for each 5s or part of 5s lent is authorized (*Pawnbrokers' Act, 1922*).

On pledges exceeding 40s, for every half

crown or part of half a crown per month 1/2d

FORFEITURE.—Pledges for 10s and under must be redeemed within twelve calendar months and

seven days from the date of pledging. After that

they become the property of the pawnbroker.

Pledges above 10s if not redeemed within

twelve calendar months and seven days from the

day of pledging, may be sold by auction by the

pawnbroker, but may be redeemed at any time

before the day of sale.

Within three years after sale the pawnner may

inspect the account of the sale in the pawnbroker's

books on payment of one penny, and receive any

surplus produced by the sale. Should there be a

deficit, the pawnner, or the person producing the

ticket is liable to pay the deficiency. Any deficit

on sale of one pledge may be set off by the pawn

broker against surplus on another.

If any pledge is destroyed or damaged by fire

the pawnbroker will be bound to pay the value of

the pledge after deducting the amount of the loan

and profit—i.e., the loan and profit and 2s per

cent on the amount of the loan.

If any ticket is lost mislaid or stolen, the pawnbroker should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is *gs* or under, the charge on form of declaration is one halfpenny when the loan is above *gs*, one penny.

SPECIAL CONTRACTS—A pawnbroker may make a special contract with a pawn in respect of a pledge on which the pawnbroker makes a loan of above *40s* provided always that—

(x) The pawnbroker at the time of the pawning shall deliver to the pawn a special contract pawn ticket signed by the pawnbroker.

(y) The duplicate of the special contract pawn ticket shall be signed by the pawn.

The pawnbroker may also charge—For ticket, profit per calendar month, for storage of the pledge and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction inspection of account of sale payment of surplus produced by sale and loss of ticket, as are set forth above in the case of ordinary pledges for more than *10s*.

RECEIPTS

RECEIPTS should be kept for six years from the date of payment after which period no action can be brought concerning the goods, &c., received.

RENT RESTRICTION

AND OTHER MODIFICATIONS OF THE LAW OF LANDLORD AND TENANT

The Increase of Rent and Mortgage Interest (Restrictions) Act, 1920 was dealt with on pp 427-428 of the 1921 edition of "WHITAKER'S

STREETS AND FOOTPATHS

STREETS AND FOOTPATHS—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods wares or merchandise, or any cask, tub, basket, pail &c. or to place over any footway any blind shade, covering awning, or other projection less than eight feet in height from the ground or to place any goods wares, merchandise matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway or to roll any cask, tub, hoop, or wheel upon any footway except for the purpose of crossing the footway or to throw or lay down any materials in any street or beat or shake any carpet rug, or mat in any street after the hour of eight in the morning.

VACCINATION

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it, have the child vaccinated by a registered private

medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties but a person who does not obtain a certificate or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898 by the Local Government Board the due vaccination of every child not exempted is secured by a very complete system of registration and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians and the Boards will have no power to prevent such prosecutions. [See also Vaccination Order, 1907.]

WILLS

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases and is safer in every case to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate having foolishly put off making a will until it is too late their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers but has to be shared with a distant cousin of her husband's. Negligence or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow for her life, or until remarriage and on her death or remarriage the capital being divided among his children equally. The tying up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to

express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of legal terms, such as "heirs" and "issue, when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, signed by the testator in presence of two witnesses, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife, or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will revoking the old one or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. A will should be written in ink and very legibly on a single sheet of paper. Although of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who in cases of emergency, are called upon to draw up wills, either for themselves or others.

TESTATOR OR TESTATRIX—The person who makes the will is the testator, or if the will maker be a woman the testatrix.

ESTATE—By this word is to be understood property of all kinds both real and personal. Real property includes tithes and advowsons as well as freehold land and houses while personal property includes debts due, arrears of rents money leasehold property, house furniture goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATES—It is well in all cases to leave to some person or persons the residue of my estate and effects although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL—A form in which a will may be commenced is—This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street Reading, in the county of Berks.
